Macromolecule-metal Complexes Mmc8:

Macromolecule-Metal Complexes (MMC-8) Eishun Tsuchida, 2000-12-07 The IUPAC 8th International Symposium on Macromolecule Metal Complexes MMC 8 Tokyo was held at the International Conference Center of Waseda University Tokyo in September 1999 Topic areas presented included several basic and applied topics in the field of advanced MMC such as preparation characterization and fundamental aspects macromolecules for advanced technologies including the sub topics of electron and ion conductors separation adsorption transport of gas molecules electronic magnetic photonic properties catalysis and photocatalysis liquid crystals and biological medical and environmental use

Metal Complexes and Metals in Macromolecules Dieter Wöhrle, Anatolii D. Pomogailo, 2003-07-09 Metals and metal complexes can form compounds with organic macromolecules that show amazing properties As is so often the case nature leads by example Synthetically produced model compounds such as phthalocyanines porphyrines or metalloproteins as well as metallorganic polymers have aroused much interest in materials science Their special magnetic electrochemical and photochemical properties open up new perspectives in microelectronics and sensors This compact manual is aimed at all organic inorganic polymer and physical chemists as well as materials scientists looking for competent and detailed information on the current state of this interdisciplinary area of research It covers all questions relating to the targeted design of metallic macromolecules from proven synthesis methods right up to the latest strategies It also treats major progress in the determination of their structures the physical chemical properties of promising compounds and their potential in microelectronics and sensors Furthermore the most important methods of synthesis and investigation are presented in detail in an experimental section while a comprehensive collection of pertinent original literature rounds off this unique reference on all matters relating to macromolecular metal complexes
