Nursing Theorists and Their Work Martha Raile Alligood, PhD, RN, ANEF,2013-09-24 The most comprehensive of its kind Nursing Theorists and Their Work 8th Edition provides an in depth look at 39 theorists of historical international and significant importance Each chapter features a clear consistent presentation of a key nursing philosophy or theory Case studies critical thinking activities and in depth objective critiques of nursing theories help bridge the gap between theory and application Critical Thinking Activities at the end of each theorist chapter help you to process the theory presented and apply it to personal and hypothetical practice situations A case study at the end of each theorist chapter puts the theory into a larger perspective demonstrating how it can be applied to practice A Brief Summary in each theorist chapter helps you review for tests and confirm your comprehension A Major Concepts Definitions box included in each theorist chapter outlines

the theory's most significant ideas and clarifies content-specific vocabulary. Each theorist chapter is written by a scholar specializing in that particular theorist's work, often having worked closely with the theorist to provide the most accurate and complete information possible. Beginning chapters provide a strong foundation on the history and philosophy of science, logical reasoning, and the theory development process. Diagrams for theories help you visualize and better understand inherently abstract concepts. Pictures of theorists, as well as a listing of contact information for each individual, enables you to contact the source of information directly. Theorist chapters have been reviewed and edited by the theorist, validating the accounts set forth in the text for currency and accuracy. An extensive bibliography at the conclusion of each theorist chapter outlines numerous primary and secondary sources of information, ideal for both undergraduate and graduate research projects. NEW Quotes from the theorist make each complex theory more memorable. NEW Chapter on Afaf Meleis profiles a theorist who has shaped theoretical development in nursing and explores her transition theory. NEW Need to Know Information is highlighted to streamline long complex passages and help you review key concepts. NEW Points for Further Study at the end of each chapter direct you to assets available for additional information.

Dr. Nurse Dominique A. Tobbell, 2022-12-28. An analysis of the efforts of American nurses to establish nursing as an academic discipline and nurses as valued researchers in the decades after World War II. Nurses represent the largest segment of the U.S. health care workforce and spend significantly more time with patients than any other member of the health care team. Dr. Nurse probes their history to examine major changes that have taken place in American health care in the second half of the twentieth century. The book reveals how federal and state health and higher education policies shaped education within health professions after World War II. Starting in the 1950s, academic nurses sought to construct a science of nursing distinct from that of the related biomedical or behavioral sciences that would provide the basis for nursing practice. Their efforts transformed nursing's labor into a valuable site of knowledge production and proved how the application of their knowledge was integral to improving patient outcomes. Exploring the knowledge claims, strategies, and politics involved as academic nurses negotiated their roles and nursing's future, Dr. Nurse highlights how state-supported health centers have profoundly shaped nursing education and health care delivery.

Nursing a Radical Imagination Jess Dillard-Wright, Jane Hopkins-Walsh, Brandon Brown, 2022-11-18. Examining the historical context of healthcare whilst focusing on building a more just equitable world, this book proposes a radical imagination for nursing and presents possibilities for speculative futures embracing queer, feminist, posthuman, and abolitionist frames. Bringing together radical and emancipatory perspectives from an international selection of authors, this book reflects on the realities created by the COVID-19 pandemic, recognizing that our situation is not new but the result of ongoing hegemonies and injustices. The authors attend to the history of nursing and related institutions, examining the assumptions, ideologies, and discourses that shape the discipline and its place within healthcare. They explore the impact of this context on contemporary nursing and look at alternative visions for the future. The final section specifically focuses on
