Madness In The Multitude Human Security And World Disorder:

Madness in the Multitude Fen Osler Hampson, Jean Daudelin, 2002 *Madness in the Multitude* explores the nature of human security in the contemporary world At one level human security is about freedom from fear and alleviating the plight of innocent victims of armed conflict Civil strife in many corners of the globe East Timor Bosnia Kosovo Rwanda Burundi Sudan Georgia Tajikistan have witnessed extraordinary violence directed at civilians especially the most vulnerable citizens in society such as women and children International efforts to curb the production and use of anti personnel landmines half the proliferation and spread of small arms and strengthen international prohibitions against the most egregious violations of human rights through the establishment of an International Criminal Court are directed at augmenting human security But at another level the concept of human security addresses a much wider set of concerns There are those who argue that human security is not just about freedom from fear but also freedom from want and other kinds of deprivation These advocates point to the adverse affects of globalization on human development and the problems of achieving social justice in a world where the forces of globalization have unequal impacts on the distribution of wealth and income According to this view the widening gap between the world s richest and poorest countries is a major cause for concern as are a wide range of nonmilitary threats to human health and survival such as AIDS water and air borne pollutants and the general deterioration of the biosphere In a wide ranging theoretical and empirical analysis *Madness in the Multitude* examines the different meanings and understanding of the concept of human security and how the concept of human security has evolved over the past two centuries Through case studies of the International Criminal Court the Anti personnel Landmines Treaty international efforts to control small arms military intervention in Kosovo and elsewhere and the work of international development agencies and lending institutions this book asks whether there is a new human security paradigm of international politics and what the implications of this paradigm for international order are The volume suggests that human security constitutes a new kind of global public good whose provision challenges our traditional conceptions about the purpose and function of international institutions the role of civil society and the nature of power in international politics This book explores how our conceptions of human security have evolved in the latter half of the twentieth century analyzing the debate about how best to promote and advance human security

State Responses to Human Security Courtney Hillebrecht, Tyler R.

White, Patrice C. McMahon, 2013-11-07 The aim of this book is to analyse why and how states respond to human security both at home and abroad Although states still define security as the defense of territory from military attack increasingly security pertains to the protection of human beings from violence This violence can emerge from rebels drug traffickers terrorism and even environmental and demographic changes While previous literature in this field has provided rich empirical detail about human security crises it is generally quiet about how states respond to these crises *State Responses to Human Security* fills

this lacuna by bringing in concepts from international security studies and focusing on states' perceptions of power and the changing nature of human security. Instead of debating whether or not human security exists, the authors in this volume agree that human security has been redefined to include policies associated with violence toward individuals and groups and draw on recent events in the Middle East, China and Mexico to understand how and when human security issues prompt state responses and affect international relations. The case studies analysed in this book suggest that states respond to human security threats differently but in both the domestic context and abroad, power and perceptions matter greatly in shaping states' reactions to human security concerns. This book will be of much interest to students of human security, foreign policy, international relations and security studies in general.

Environmental Security Rita Floyd, Richard A. Matthew, 2013
Economic development, population growth and poor resource management have combined to alter the planet's natural environment in dramatic and alarming ways. For over twenty years, considerable research and debate have focused on clarifying or disputing linkages between various forms of environmental change and various understandings of security. At one extreme lie sceptics who contend that the linkages are weak or even non-existent; they are simply attempts to harness the resources of the security arena to an environmental agenda. At the other extreme lie those who believe that these linkages may be the most important drivers of security in the 21st century; indeed, the very future of humankind may be at stake. This book brings together contributions from a range of disciplines to present a critical and comprehensive overview of the research and debate linking environmental factors to security. It provides a framework for representing and understanding key areas of intellectual convergence and disagreement, clarifying achievements of the research as well as identifying its weaknesses and gaps. Part I explores the various ways environmental change and security have been linked and provides principal critiques of this linkage. Part II explores the linkage through analysis of key issue areas such as climate change, energy, water, food, population and development. Finally, the book concludes with a discussion of the value of this subfield of security studies and with some ideas about the questions it might profitably address in the future. This volume is the first to provide a comprehensive overview of the field. With contributions from around the world, it combines established and emerging scholars to offer a platform for the next wave of research and policy activity. It is invaluable for both students and practitioners interested in international relations, environment studies and human geography.

Sorpong Peou,2008-11-19 Since the end of the Cold War the number of interstate wars has remained relatively low although whilst states may be more secure than ever this does not mean that individual human beings are too This has led to a growing recognition of the importance of human security in contrast to the traditional realist focus on state security This book explores human security in East Asia focusing in particular on the challenges to collaboration among actors involved in the process of human security promotion It examines the theoretical complexities of conceptual arguments about human security drawing on the ideas of scholars from Asia and the West to provide a global perspective on what causes human insecurity and how security can best be achieved It considers in detail case studies of military interventions in East Asia in particular East Timor and assesses how successful collaborative efforts have been in providing human security It also explores case studies of non military intervention including international criminal justice in Cambodia and East Timor It discusses the relationship of regional great powers such as China and Japan to human security promotion arguing that it will be better served if these powers engage less in the traditional game of geopolitics and if human security objectives do not work against actors interests It shows how interventions to uphold human security have not always succeeded to the extent that was hoped despite the best of intentions and considers how improved collaboration can be achieved so that future interventions enjoy more consistent success *Globalization, Development and Human Security* Anthony G. McGrew,Nana K. Poku,2007-02-12

Whether globalization development and human security are inescapably trapped within a vicious circle or a virtuous circle is the central concern of this book Post-Conflict Peacebuilding Vincent Chetail,2009-03-26 Post Conflict Peacebuilding comes at a critical time for post conflict peacebuilding Its rapid move towards the top of the international political agenda has been accompanied by added scrutiny as the international community seeks to meet the multi dimensional challenges of building a just and sustainable peace in societies ravaged by war Beyond the strictly operational dimension there is considerable ambiguity in the concepts and terminology used to discuss post conflict peacebuilding This ambiguity undermines efforts to agree on common understandings of how peace can be most effectively built thereby impeding swift coherent action Accordingly this lexicon aims to clarify and illuminate the multiple facets of post conflict peacebuilding by presenting its major themes and trends from an analytical perspective To this end the book opens with a general introduction on the concept of post conflict peacebuilding followed by twenty six essays on its key elements

including capacity building conflict transformation reconciliation recovery rule of law security sector reform and transitional justice Written by international experts from a range of disciplines including political science and international relations international law economics and sociology these essays cover the whole spectrum of post conflict peacebuilding In reflecting a diversity of perspectives the lexicon sheds light on many different challenges associated with post conflict peacebuilding For each key concept a generic definition is proposed which is then expanded through discussion of three main areas the meaning and origin of the concept its content and essential components and its means of implementation including lessons learned from past practice

Human and Water Security in Israel and Jordan Philip Jan Schäfer, 2012-10-28 The work aims at answering the question as to how far discourses on human security are present in Jordan and Israel if they converge and if political solutions for the issue of water

security could be derived The analysis is based on the assumption that from human security perspective common solutions for urgent problems can be derived more easily than out of a perspective of national security Yet it is acknowledged that according to a new security perspective different security threats are being identified by relevant actors An empirical analysis of written statements and utterances of the respective security elites establishes the methodological tool for the identification of human security discourses in Israel and Jordan Subsequently it is estimated how far water is presented as a matter of national security in Israel and Jordan using the theory of securitization
