A Phonological Grammar of Kenyan Sign Language Hope E. Morgan, 2022-07-05 This grammar of Kenyan Sign Language KSL phonology adds to a sparse literature on the units of categorical form in the world's sign languages At the same time it brings descriptive and theoretical research on sign language phonology into better alignment by systematically evaluating current models of sign language phonology for each of the main parameters handshape location and movement against the KSL data This grammar also makes a methodological contribution by using a unique dataset of KSL minimal pairs in the analysis demonstrating that minimal pairs are not as infrequent in sign languages as previously thought The main content of the book is found in five chapters on handshape location core articulatory movement manner of movement and other distinctive features e.g. orientation mouth actions The book also contains two large appendices that document the phonological evidence for each of the 44 handshapes and 37 locations This book will be a key reference for descriptive and typological studies of sign phonology as well as a helpful resource for linguists interested in understanding the similarities and differences between current models of sign phonology and identifying promising avenues for future research

Recurrent Gestures of Hausa Speakers Izabela Will, 2021-11-15 Is the relation between gestures and language conventionalized Is it possible to investigate the backgrounds of the users by means of these gestures This book offers an in depth analysis and description of five recurrent gestures used by Hausa speakers from northern Nigeria examined from a cross cultural perspective The method based on studying naturalistic data available online sermons interviews and talk shows can be applied to other languages with no speech corpora Particular attention is paid to cultural practices and routinized behavior that affect both the form of a gesture and its meaning Everyday activities such as greetings and religious rituals as well as social hierarchy and gender differences are reflected in gestures The results show that gestures and language reveal the shared cultural background of the speakers and reflect identical
