Why Everyone (Else) Is a Hypocrite Robert Kurzban, 2012-05-27 The evolutionary psychology behind human inconsistency. We're all hypocrites. Why? Hypocrisy is the natural state of the human mind. Robert Kurzban shows us that the key to understanding our behavioral inconsistencies lies in understanding the mind's design. The human mind consists of many specialized units designed by the process of evolution by natural selection. While these modules sometimes work together seamlessly, they don't always, resulting in impossibly contradictory beliefs, vacillations between patience and impulsiveness, violations of our supposed moral principles, and overinflated views of ourselves. This modular evolutionary psychological view of the mind undermines deeply held intuitions about ourselves as well as a range of scientific theories that require a self with consistent beliefs and preferences. Modularity suggests that there is no I. Instead, each of us is a contentious we, a collection of discrete but interacting systems whose constant conflicts shape our interactions with one another and our experience of the world. In clear language, full of wit and rich in examples, Kurzban explains the roots and implications of our inconsistent minds and why it is perfectly natural to believe that everyone else is a hypocrite.

Timeless Toys Tim Walsh, 2005-10 The book *Why Didn't I Think of That* includes the passage: If a toy has magic when people see it, they say, 'Oooh! What is that?' It appeals to the kid in everybody. That same kind of magic captures the kid in everybody when they pick up Timeless Toys. Classic Toys and the Playmakers Who Created Them. Timeless Toys represents one of the finest documentaries and displays of modern toys ever written. Author Tim Walsh, a successful toy inventor himself, reveals a world of commerce, toys, and wonder that is equally fun, fascinating, and nostalgic. Readers of every age and background will find it impossible to pick up this book, turn a few pages, and not become spellbound by its insightful stories and the personal memories that the text and 420 brilliantly colored photographs bring forth. Slinky, Lego, Tonka trucks, Monopoly, Big Wheel, Frisbee, Hula Hoop, Super Ball, Scrabble, Barbie, Radio Flyer Wagons. All of these and many, many more are featured in this fascinating tome, along with the toys' histories, insider profiles, and rare interviews with toy industry icons. It's simply magic.

They probe many objections to traditional internalism and focus on three key topics: non-inferentially justified belief, inferentially justified belief, and the best response to skepticism **It's Not About the Shark** David Niven, 2014-11-04 In the spirit of *The Tipping Point* and *Freakonomics*, David Niven presents a new way of decoding the riddles of the everyday choices we make. *It's Not About the Shark* opens the door to the groundbreaking science of solutions by turning problems and how we solve them upside down. When we have a problem, most of us zero in, take it apart, and focus until we have it solved. David Niven shows us that focusing on the problem is exactly the wrong way to find an answer. Putting problems at the center of our thoughts shuts down our creative abilities, depletes stamina, and feeds insecurities. *It's Not About the Shark* shows us how to transform our daily lives, our work lives, and our family lives with a simple but rock-solid principle: If you start by thinking about your problems, you'll never make it to a solution. If you start by thinking about a solution, you'll never worry about your problems again. Through real-life examples and psychology research, Niven shows us why focusing on the problem first makes us 17 times less likely to find an answer. Being afraid of a problem is natural; we're biologically primed to be afraid. Finding a problem creates power, which keeps you from finding a solution. Working harder actually hides answers. Absolute confidence makes you less likely to find the answer. Looking away from a problem helps to see a solution. Listening only to yourself is one of the best ways to find an answer. Combining hard facts, good sense, and a strong dose of encouragement, Niven provides fresh and positive ways to think about problem solving **Code Like a Girl: Rad Tech Projects and Practical Tips** Miriam Peskowitz, 2019-08-13 Welcome to *Code Like a Girl*, where you'll get started on the adventure of coding with cool projects and step-by-step tips from the co-author of the bestselling *The Daring Book for Girls*. Coding is about creativity, self-expression, and telling your story. It's solving problems and being curious, building things, making the world a better place, and creating a future.
