Library Times International ,1996 **Libricide** Rebecca Knuth,2003-07-30 Where they have burned books they will end in burning human beings declared German poet Heinrich Heine This book identifies the regime sponsored ideologically driven and systemic destruction of books and libraries in the 20th century that often served as a prelude or accompaniment to the massive human tragedies that have characterized a most violent century Using case studies of libricide committed by Nazis Serbs in Bosnia Iraqis in Kuwait Maoists during the Cultural Revolution in China and Chinese Communists in Tibet Knuth argues that the destruction of books and libraries by authoritarian regimes was sparked by the same impulses toward negation that provoked acts of genocide or ethnocide Readers will learn why some people even those not subject to authoritarian regimes consider the destruction of books a positive process Knuth promotes understanding of the reasons behind extremism and patterns of cultural terrorism and concludes that what is at stake with libricide is nothing less than the preservation and continuation of the common cultural heritage of the world Anyone committed to freedom of expression and humanistic values will embrace this passionate and valuable book Directory of Library Automation Software, Systems, and Services Information Today Inc,2004 Published biennially since 1983 the Directory of Library Automation Software Systems and Services is recognized as the primary reference source for software packages used in automating libraries This entirely new expanded edition provides detailed descriptions of hundreds of currently available microcomputer minicomputer and mainframe software packages and services This new edition contains more comparative information on library applications software than is available from any other source *Memory's Library* Jennifer Summit,2008-11-15 In Jennifer Summit s account libraries are more than inert storehouses of written tradition they are volatile spaces that actively shape the meanings and uses of books reading and the past Considering the two hundred year period between 1431 which saw the foundation of Duke Humfrey s famous library and 1631 when the great antiquarian Sir Robert Cotton died *Memory's Library* revises the history of the modern library by focusing on its origins in medieval and early modern England Summit argues that the medieval sources that survive in English collections are the product of a Reformation and post Reformation struggle to

redefine the past by redefining the cultural place function and identity of libraries By establishing the intellectual dynamism of English libraries during this crucial period of their development Memory s Library demonstrates how much current discussions about the future of libraries can gain by reexamining their past
