The Age of Promiscuity Doru Pop, 2018-11-15. This book presents an original and engaging look at contemporary popular culture, opening with the provocative idea that this is a day and age of complete exhaustion of ideas, images, stories and myths. Questioning the effects of content recycling in cinema and other media, the author further elaborates on the repurposing of cultural junk, the reassembling of narratives and myths. The thought-provoking hypothesis proposed in this research is that we have entered an age of cultural promiscuity. By analyzing the mutations of myth-making practices and connecting them with larger cultural manifestations, the author explains these transformations as integral to the development of a myth-illogical imagination. Cinematic and mythological representations in mainstream Hollywood films have reached a point of amalgamation with no return, which marks the beginning of a fourth age of representations where signs and meanings are manifested in illogical permutations. This is more explicit in films that commingle aliens, cowboys, undead American presidents and zombie Nazis joining together in the same narrative, ghosts, werewolves and vampires aggregating disjointed storylines and historical fake facts, all coalesced in an orgy of empty burlesque and infantile masquerades. This interdisciplinary research combines cultural studies, film criticism, art and myth.

interpretations bringing into the debate multiple concepts from related fields such as critical theory and media criticism The book also opens up to innovative approaches from a wide array of academic disciplines offering researchers students and those fascinated by the transformations happening in contemporary cinema an interpretative tool based on a revised dialectic approach The conclusion is that we are now victims of a zombie semiotics Meaning making in contemporary culture politics and aesthetics is dominated by a process of incessant desecration of significations specific to the total mishmash of representations analyzed here

Crosslinguistic Approaches to the Psychology of Language Jiansheng Guo, 2009 This volume covers state of the art research in the field of crosslinguistic approaches to the psychology of language The forty chapters cover a wide range of topics that represent the many research interests of a pioneer Dan Isaac Slobin who has been a major intellectual and creative force in the field of child language development linguistics and psycholinguistics for the past four decades Slobin has insisted on a rigorous crosslinguistic approach in his attempt to identify universal developmental patterns in language learning to explore the effects of particular types of languages on psycholinguistic processes to determine the extent to which universals of language and language behavior are determined by modality vocal auditory vs manual visual and finally to investigate the relation between linguistic and cognitive processes In this volume researchers take up the challenge of the differences between languages to forward research in four major areas with which Slobin has been concerned throughout his career language learning in crosslinguistic perspective spoken and sign languages the integration of language specific factors in narrative skill theoretical issues in typology language development and language change and the relationship between language and cognition All chapters are written by leading researchers currently working in these fields who are Slobin's colleagues collaborators or former students in linguistics psychology anthropology and cognitive science Each section starts with an introductory chapter that connects the themes of the chapters and reviews Slobin's contribution in the context of past research trends and future directions The whole volume focuses squarely on the central argument universals of human language and of its development are embodied and revealed in its diverse manifestations and utilization *Crosslinguistic Approaches to the Study of Language* is a key resource for those interested in the range of differences between languages and how this impacts on learning cognition and language change and a tribute to Dan Slobin's momentous contribution to the field
