The Interpretation of International Law by Domestic Courts

Helmut Philipp Aust, Georg Nolte, 2016-01-21 The Interpretation of International Law by Domestic Courts assesses the growing role of domestic courts in the interpretation of international law It asks whether and if so to what extent domestic courts make use of the international rules of interpretation set forth in the Vienna Convention on the Law of Treaties Given the expectation that rules of international law are to have a uniform interpretation and application throughout the world the practice of domestic courts is considerably more diverse The contributions to this book analyse three key questions first whether international law requires a coherent interpretive approach by domestic courts Second whether a common or convergent methodological outlook can be found in domestic court practice Third whether a common interpretive approach is desirable from a normative perspective The book identifies a considerable tension between international law s ambition for universal and uniform application and a plurality of different approaches This tension between unity and diversity is analysed by a group of leading international lawyers from a wide range of geographical disciplinary and methodological approaches Drawing on domestic practice of number of jurisdictions including among others Colombia France Japan India Israel Mexico South Africa the United Kingdom and the United States the book puts the interpretative practice of domestic courts in a wider context Its chapters offer doctrinal practical as well as theoretical perspectives on a central question for international law

The UN Convention on the Rights of Persons with Disabilities in Practice Lisa Waddington, Anna Lawson, 2018-05-24 Introduced in 2008 the UN Convention on the Rights of Persons with Disabilities has existed for nearly a decade This comprehensive study examines how courts in thirteen different jurisdictions make use of the Convention The first sustained comparative international law analysis of the CRPD Waddington and Lawsons ground breaking text illuminates the intersection between human rights law disability law and international law through an examination of the role of courts The first part of the book contains chapters specific to each jurisdiction The second part consists of comparative chapters which draw on the rich analysis of the jurisdiction specific chapters These chapters reflect on emerging patterns of judicial usage and interpretation of the CRPD and on the wider implications for human rights theory and the nascent field of international comparative human rights law This volume is a vital and thought provoking addition to the literature on comparative international law and disability rights

The Law and Politics of International Human Rights Courts Alec Stone Sweet, Wayne Sandholtz, 2024-09-24 Combining perspectives from law and the social sciences this book provides an account

of the origins and evolution of six regional human rights courts In each of these cases judges sought to overcome political forces and legal obstacles that threatened to render the regime stillborn Alec Stone Sweet and Wayne Sandholtz focus on the struggle to raise standards of rights protection within multi level transnational systems of justice A transnational system of justice is comprised of three components a charter of rights a court tasked with enforcing the charter and the right of individuals to petition the court with a claim that their rights have been violated The book analyzes the law and politics of such systems in diverse areas including torture inhuman treatment non discrimination due process and access to justice free expression privacy and family and other freedoms In some cases state officials have at times strongly supported enhancing the effectiveness of rights protections In others the activities of the courts have generated significant political backlash leading state officials to act to curb the court s authority or to exit the regime altogether The book describes and evaluates these attempts the results of which have been mixed with most court curbing exercises failing

Constitutional Reasoning in Latin America and the Caribbean Johanna Fröhlich, 2024-09-05 This book examines the reasoning practice of 15 constitutional courts and supreme courts including the Caribbean Commonwealth and the Inter American Court of Human Rights Enriched by empirical data with which it strives to contribute to a constructive and well informed debate the volume analyses how Latin American courts justify their decisions Based on original data and a region specific methodology the book provides a systematic analysis utilising more than 600 leading cases It shows which interpretive methods and concepts are most favoured by Latin American courts and which courts were the most prolific in their reasoning activities The volume traces the features of judicial dialogue on a regional and sub regional level and enables the evaluation and comparison of each country s reasoning culture in different epochs The collection includes several graphs to visualise the changes and tendencies of the reasoning practices throughout time in the region based on information gathered from the dataset To better understand the current functioning and the future tendencies of courts in Latin America and the Caribbean the volume illuminates how constitutional and supreme courts have actually been making their decisions in the selected landmark cases which could also contribute to future successful litigation strategies for both national constitutional courts and the Inter American Court for Human Rights This project was made possible due to the collaboration and funding provided by the Rule of Law Programme for Latin America of the Konrad Adenauer Foundation and the Law School of the University of San Francisco de Quito

The Necropolitical Production and Management of Forced Migration Ariadna Estevez, 2021-11-04 Using examples from the United States Mexico border Central America and South America this book argues that forced migration is not a spontaneous phenomenon but rather a product of necropolitical strategies designed to depopulate resource rich countries or regions Estevez merges necropolitical analysis with postcolonial migration and offers a new framework to study the set of policies laws institutions and political discourses producing a profit in a legal context in which habitat devastation is legal but mobility is a crime Violence deprivation of food or water environmental contamination

and rights exclusion are some of the tactics used in extractivist capitalism Private and state actors alike use necropower both its first and third world versions to make people living and dead a commodity

UN Human Rights Treaty Bodies Helen Keller, Geir Ulfstein, 2012-04-16 The effective implementation of human rights treaty obligations in national law is subject to increasing attention The main responsibility for the international monitoring of national implementation at the global level is entrusted to the UN human rights treaty bodies These bodies are established by the respective human rights conventions and are composed of independent experts This book examines three aspects of these bodies the legal aspects of their structure functions and decisions their effectiveness in ensuring respect for human rights obligations and the legitimacy of these bodies and their decisions Containing contributions from a variety of eminent legal experts including present and former members of the treaty bodies the analysis should be read in light of the ongoing effort to strengthen treaty bodies under the auspices of the UN High Commissioner for Human Rights and with the involvement of relevant stakeholders

The Idea of International Human Rights Law Steven Wheatley, 2019-01-17 International human rights law has emerged as an academic subject in its own right separate from but still related to international law This book explains the distinctive nature of this discipline by examining the influence of the idea of human rights on general international law Rather than make use of a particular moral philosophy or political theory it explains human rights by examining the way the term is deployed in legal practice on the understanding that words are given meaning through their use Relying on complexity theory to make sense of the legal practice of the United Nations the core human rights treaties and customary international law the work demonstrates the emergence of the moral concept of human rights as a fact of the social world It reveals the dynamic nature of this concept and the influence of the idea on the legal practice a fact that explains the fragmentation of international law and special nature of international human rights law

The Rule of Law in Global Governance Monika Heupel, Theresa Reinold, 2016-11-08 This book explores whether the co existence of partially overlapping and sometimes competing layers of authority which characterizes today s global order undermines or rather strengthens efforts to promote the rule of law on a global scale Heupel and Reinold argue that whether multi level governance and global legal pluralism have beneficial or detrimental effects on the international rule of law depends on specific scope conditions Among these are the mobilization of powerful states and courts as well as the fit between soft law and hard law arrangements The volume comprises seven case studies written by International Relations and International Law scholars Bridging the gap between political science and legal scholarship the volume enables an interdisciplinary perspective on the emergence of an international rule of law It also provides much needed empirical research on the implications of multi level governance and global legal pluralism for the rule of law beyond the nation state
