Resources in Education ,2001-10 *The Pre-instructional and Reading Comprehension Strategies Special Education Teachers Use to Engage and Instruct Elementary Student Readers with ASD* Murfet Amean Alnemr,2020

Lyon 1998 called reading critical to a child s overall well being Given the ubiquity of text in their lives today reading skills can help students lead productive meaningful lives But what about elementary student readers with ASD Senokossoff 2016 argued that in addition to the social and emotional difficulties that children with ASD experience many also struggle with reading comprehension Research indicates that students with ASD can face deficits associated with self regulation and sensory overload associated with visual hearing and touch and this can threaten learning and comprehension Bogdashina 2003 Thus it could be argued that pre instruction strategies focused on visual hearing and touch concepts may be used to prepare students for reading comprehension instruction and have a positive impact on aschivement for student readers with ASD Founded on this consideration this study sought to identify a connection between pre instruction strategies and reading comprehension for students with ASD A multiple case study approach was applied to this qualitative study I used interviews and observations to collect data from four special education teacher participants in four different Midwest elementary schools Interview transcriptions field notes and an observation checklist comprised the data to be analyzed Interviews made of open ended questions sought to uncover and understand the pre instruction and reading comprehension strategies special education teachers used with the student readers with ASD Questions focused on visual hearing and touch based strategies

which I referred to as pre instruction strategies Computer Based Interventions CBI and reading comprehension strategies Observations were conducted in the classroom prior to and during reading instruction and guided by an observation checklist developed following teacher interviews Observations were designed to link strategies discussed during interviews with those used during real time classroom instruction Each observation sought to determine if special education teachers used pre instruction strategies to prepare their students for reading comprehension instruction as well as to observe those strategies used for reading instruction Analysis of the data led to findings which suggest that while special education teachers tend to believe in the benefits of and make pre instruction strategies available to students with ASD in their classrooms they do not apply these strategies in the preparation of reading comprehension instruction Findings also shed light on the types of reading comprehension strategies teachers use in their classrooms which are framed through the lens of the existing studies and the What Works Clearinghouse as well as the ways teachers implemented reading strategies often optimizing their efficacy through strategy combinations My study revealed significant gaps in the literature and led to recommendations encouraging future studies which examine larger populations possibly nationwide those which include participants who work with and instruct student readers with ASD outside of the classroom such as parents librarians and museum educators studies which include more participatory observations over a longer period of time studies which examine pre instruction and reading comprehension instruction strategies for middle and high school readers with ASD and how if special education teachers collaborate with school occupational therapists to prepare students for reading instruction

Intensifying Classroom Routines in Reading and Writing Programs Michael P. Ford, 2017-06-15 Three common routines are seen in almost every primary language arts programs morning messages shared readings and word walls These routines should be integrated to support the total language arts program but are teachers of grades K 2 getting the most bang for their buck out of these activities Morning messages can become very routinized and repeat the same experiences over and over again Shared readings are sometimes conducted with little variation in spite of changing demands from the texts being used and changing needs in the learners with whom they are being used Word walls might be put up with some attention early in the year and remain virtually unchanged as the year moves forward *Intensifying Classroom Routines in Reading and Writing Programs* focuses on how teachers can get more instructional mileage out of these three common classroom routines Author Michael P Ford lays out step by step day by day plans to put those three key routines on a cycle that changes as students move through developmental phases This resource helps teachers plan for emergent and early readers and writers It also looks at how teachers can assist students as they move through critical areas including concepts of print alphabetic knowledge phonological awareness sound symbol relationships high frequency words structural analysis context clues comprehension strategies and composition strategies With these intensified routines in place students will clearly see connections between reading and writing
