Rumor **Constructing Questions for Interviews and Questionnaires** William Foddy, William H. Foddy, 1993 The success of any interview or questionnaire depends upon good question design yet most of the available literature has been devoted to interview techniques rather than question formulation This practical book provides a coherent theoretical basis for the construction of valid and reliable questions for interviews and questionnaires The theoretical framework used in the book provides a set of principles that when followed will increase the validity and reliability of verbal data collected for social research Dr Foddy outlines the problems which can arise when framing questions with clarity and commonsense He has written a wide ranging useful book for survey practitioners working in the social sciences Reference Group Theory as a Predictor of Message Source Effects Stuart H. Surlin, 1974 **Paradigms and Conventions** Young Back Choi, 1993 Paradigms and Conventions presents a viable alternative to the standard neoclassical economic approach of a rational maximizing model Young Back Choi develops the concept of convention and uses it to build our understanding of the working of the market as a social learning process This approach offers a unique perspective on entrepreneurs and innovators by carefully analyzing the nature of decision making under uncertainty and the problem of modeling it and then systematically exploring its behavioral implications Paradigms and Conventions presents propositions and their corollaries logically derived from the principles that human beings must judge situations before they can act and that when faced with an unfamiliar situation human beings will endeavor to form a judgment of it By putting the human mind at the center of the analysis Professor Choi creates a surprisingly fruitful way of thinking about these issues that promises a new view of decision making This book offers the stimulus of new ideas and the insights of a new approach that will be attractive to students and faculty in psychology sociology anthropology political science and philosophy as well as economics **Bass & Stogdill's Handbook of Leadership** Bernard M. violence This authoritative reference work is aimed at anyone with a serious interest in contemporary academic thinking about the individual in society **Japanese Sense of Self** Nancy R. Porter,Sean A. Adams,2016-11-03 This two volume set is part of a growing body of literature concerned with the history of biblical interpretation The ample introduction first situates key players in the story of the development of the major strands of biblical interpretation since the Enlightenment identifying how different theoretical and methodological approaches are related to each other and describing the academic environment in which they emerged and developed Volume 1 contains fourteen essays on twenty two interpreters who were principally active before 1980 and volume 2 has nineteen essays on twenty seven of those who were active primarily after this date Each chapter provides a brief biography of one or more scholars as well as a detailed description of their major contributions to the field This is followed by an often new application of the scholar s theory By focusing on the individual scholars and their work the book recognizes that interpretive approaches arise out of certain circumstances and that scholars are influenced by and have influences upon both other interpreters and the times in which they live This set is ideal for any class on the history of biblical interpretation and for those who want a greater understanding of how the current field of biblical studies developed **Advisors and Counterparts** United States.
