Abhayawansa, 2007 *Readings in Auditing Volume II* is a new selection of contemporary readings in auditing that builds upon the first volume of this widely used collection. The second volume has a particular focus on audit independence and audit planning, fraud and corporate governance, earnings management and auditor's legal liability. The text also provides an integrated consideration of regulation and regulatory reform with regard to the new legally enforceable Australian auditing standards (ASA) introduced from 1 July 2006. The objective of this volume is to present both academics and students with a range of current audit issues that reflect professional practice and to contextualise various audit issues and their implications for students. The readings can be set as a companion resource to an audit and assurance textbook or as an independent resource. The volume is suitable to both undergraduate and postgraduate subjects on auditing assurance services.

READINGS IN AUDITING. J.T.(ED). JOHNSON, *Auditing with the Computer* Wayne S. Boutell, 2024-03-29 *Auditing with the Computer* examines the transformative impact of electronic data processing (EDP) systems on modern auditing practices. This forward-looking book explores the challenges and opportunities posed by integrating computerized information systems into business operations. It highlights the growing tension between the efficient design of computer-driven systems and the need for robust control mechanisms, offering practical strategies for auditors to navigate this evolving landscape. The author traces the historical evolution of auditing theory, addresses the current demands of business information systems, and presents methodologies for adapting auditing practices to computerized environments. Through real-world observations, case studies, and survey data from practicing auditors, the book provides actionable insights into auditing in the digital age. Focused on both present challenges and future trends, the book advocates for leveraging computers as powerful tools in the auditing process. By introducing innovative approaches like computer-assisted audits and system-integrated controls, it shows how auditors can enhance efficiency and accuracy while maintaining professional standards. Accessible to professionals and students alike, *Auditing with the Computer* bridges traditional auditing practices with the realities of digital transformation, equipping readers to meet the demands of an increasingly computerized business world.
