Heim,2007 **Look at the Evidence** John Clute,2016-11-24 For more than 50 years John Clute has been reviewing science fiction and fantasy Look at the Evidence is a collection of reviews from a wide variety of sources including Interzone the New York Review of Science Fiction and Science Fiction Weekly about the most significant literatures of the twenty first century science fiction fantasy and horror the literatures Clute argues should be recognized as the central modes of fantastika in our times It covers the period between 1987 and 1992 *Science-fiction Studies* ,1993 *Speculative Epistemologies* John Rieder,2021-09-15 Speculative Epistemologies is about truth effects in sf which stands for both science fiction and speculative fiction It examines six narratives one from each decade from the 1960s to the 2010s that challenge dominant assumptions about the normal the possible and the real It asks what the patterns of overlap and interference generated by texts located in border territories that make their identification as sf problematic and sometimes controversial can reveal about the dynamics of sf s multiple subcultures e g professionals academics and fans the complexity of the genre s communities of practice and their routes of production distribution and reception and the genre s shifting position within a broadly conceived field of literary and cultural production The speculative epistemologies in these stories are counter hegemonic ways of knowing ways of imagining knowing differently and the focus of this study is their effect on the formation of identities and communities Combining the methods of genre theory reception theory and the sociology of cultural production the readings of these six narratives trace a history of sf s increasingly feminist racially and ethnically diverse philosophically ambitious and politically engaged character from the 1960s to the present **Science Fiction, Fantasy & Horror** ,1991 A comprehensive bibliography of books and short fiction published in the English language **Redshift Blueshift** Leslie Peterson,2010-01-28 The first aliens to arrive on planet Earth were the Dorts They were amoebalike and frighteningly large but they did favor us with the Theory of Transformationa brilliant advance over prior attempts by theoretical and particle physicists to create the ultimate Unified Theory of Everything but like all great theories even theirs had limitations Centuries after the first Dorts arrived Laura Shane was born She reinterpreted the Dort Theory by giving it the finishing touch of her genius It led to the faster than light removal of miles deep cone shaped plugs from planet Earth The latest and largest such Cone carried a crew of thousands It was named the Great Cone of Transformation Through his 3T Corporation Ned Keller directed the creation of Cones Despite Lauras unease about her first voyage into space she and Ned went together on the Great Cones maiden mission Two weeks later they were light years from home when Neds boss Jack Lewis arrived to inform them of an event on Earth with implications for their mission Unfortunately his concern did not include awareness of what those implications might be but they were already in peril It was sabotagethe first in a series of calamities Before the final calamity began to close in on them the Big Rip set to destroy the entire local multiverse and before Jacks recent arrival it was still teatime on the Great Cone Laura and Ned were having a pleasant morning beside her pool The story begins there with our attractive young genius sipping tea and deep in thought about her bewildering circumstances

Science Fiction & Fantasy Book Review Annual ,1991 *Science Fact and Science Fiction* Brian Stableford,2006-09-06 Science fiction is a literary genre based on scientific speculation Works of science fiction use the ideas and the vocabulary of all sciences to create valid narratives that explore the future effects of science on events and human beings Science Fact and Science Fiction examines in one volume how science has propelled science fiction and to a lesser extent how science fiction has influenced the sciences Although coverage will discuss the science behind the fiction from the Classical Age to the present focus is naturally on the 19th century to the present when the Industrial Revolution and spectacular progress in science and technology triggered an influx of science fiction works speculating on the future As scientific developments alter expectations for the future the literature absorbs uses and adapts such contextual visions The goal of the Encyclopedia is not to present a catalog of sciences and their application in literary fiction but rather to study the ongoing flow and counterflow of influences including how fictional representations of science affect how we view its practice and disciplines Although the main focus is on literature other forms of science fiction including film and video games are explored and because science is an international matter works from non English speaking countries are discussed as needed

The Hugo, Nebula and World Fantasy Awards Howard DeVore,1998 Science fiction fans have voted for the Hugo Awards for best science fiction almost every year since 1953 Science fiction professionals have presented the Nebula Awards to their peers since 1965 In all this time lists of winners have been widely available but the losers have usually been ignored In 1970 long time fan Howard DeVore started publishing a complete listing of Hugo and Nebula awards including the stories that were nominated but did not win The fact that stories were nominated implied that they had considerable merit Mr DeVore felt that a complete listing would let fans compare them The International Fantasy Awards may have inspired the Hugos so he added them DeVore brought out new editions year by year publishing and distributing them himself with the aid of a number of devoted science fiction fans By 1998 the task had grown to the point where Mr DeVore happily relinquished the job to Advent This edition includes introductory and historical essays explaining how each award got started and how nominees and winners are chosen plus commentary in the yearly listings
