Reel Politics American Political Movies From Birth Of A Nation To Platoon:

Reelpolitik Ideologies in American Political Film Beverly Merrill Kelley, 2012-03-22 In *Reelpolitik Ideologies in American Political Film* Beverly Merrill Kelley examines more than a century of political movie history providing a thorough historical background for diametrically opposed political ideologies in order to facilitate debate and dialectical learning. Kelley explores 185 American political movies categorized by ideological themes and presented in chronological order in order to illustrate the history of film as well as the history of the specific political ideology. Each chapter includes a case study which provides an in depth analysis of the single film that best illustrates the ideology at hand including *The Candidate*, populism, Wall Street elitism, *The Godfather*, fascism, *All the President's Men*, anti fascism, Patton, interventionism, and M A S H isolationism. *Reelpolitik Ideologies in American Political Film* establishes a paradigmatic analysis of political films that details the cyclical nature of ideological dialectic throughout American history and identifies the values, attitudes, and beliefs of the voters who choose not to affiliate with Republicans and Democrats and who often determine the outcomes of elections. The text also includes an extensive ideological filmology spanning more than 100 years of American cinema. This study represents a bold investigation of the political and social values of American film and is an essential text in the study of the relationship between culture and politics.

Friend Or Foe? Michael J. Strada, Harold Martin Troper, Harold R. Troper, 1997 During the nearly sixty years of filmmaking the always uneasy and often fractious Soviet American relationship has been mirrored in Hollywood's portrayal of Russians and the Soviet Union. *Friend or Foe* examines the portrayal of the Soviet Union in American film and shows how these films reflect the attitudes of Americans as well as how each portrayal changed with the often uneasy relations between the two countries. The authors show how films as rich repositories of national consciousness can be analyzed to reveal time bound insights into popular fears and obsessions. History lovers and film buffs will appreciate the tongue in cheek approach to many of the absurdist films. Scholars in history, film studies, and political science will find the depth and breadth of research useful. A filmography, bibliography, and photographs further complement the study.

Blue-Collar Hollywood John Bodnar, John E. Bodnar, 2006-09-26 Selected by *Choice Magazine* as an Outstanding Academic Title for 2003. From Tom Joad to Norma Rae to Spike Lee's *Mookie*, in *Do the Right Thing*, Hollywood has regularly dramatized the lives and struggles of working people in America. Ranging from idealistic to hopeless, from sympathetic to condescending, these portrayals confronted audiences with the vital economic, social, and political issues of their times while providing a diversion, sometimes entertaining, sometimes provocative, from the realities of their own lives. In *Blue Collar Hollywood*, John Bodnar examines the ways in which popular American films made between the 1930s and the 1980s depicted working class characters, comparing these cinematic representations with the aspirations of ordinary Americans and the promises made to them by the country's political elites. Based on close and imaginative viewings of dozens of films from every genre among them *Public Enemy*, *Black Fury*, *Baby Face*, *The Grapes of Wrath*, *It's a Wonderful Life*, *I Married a Communist*, *A*

Streetcar Named Desire Peyton Place Taxi Driver Raging Bull Coal Miner s Daughter and Boyz N the Hood this book explores such topics as the role of censorship attitudes toward labor unions and worker militancy racism the place of women in the workforce and society communism and the Hollywood blacklist and faith in liberal democracy Whether made during the Great Depression World War II the Cold War or the Vietnam era the majority of films about ordinary working Americans Bodnar finds avoided endorsing specific political programs radical economic reform or overtly reactionary positions Instead these movies were infused with the same current of liberalism and popular notion of democracy that flow through the American imagination *Evaluating American Democracy and Public Policymaking* William D. Schreckhise, 2018-03-02 Lurking in the back of the minds of many students of American government is the question How well does the American political system work This book examines this in a way that is broad in approach and accessible to readers Such an ambitious examination of the effectiveness of the American policymaking system leads to one inescapable question how can you measure effectiveness The answer taken in this book is to employ a number of different criteria These criteria include the public s attitudes towards the institutions of government the degree in which all participate equally in political activities the level of which public policy is responsive to public opinion the ability of the actors in the process to create effective public policy the extent the political system imposes costs and benefits on us equally regardless of our economic condition race gender or age In doing so this book ties together and expands upon numerous scholarly studies conducted on American public policymaking and uses David Truman s Systems Model as a conceptual guide Because of the large amount of data presented the book will also serve as a reference source for others conducting research on American public policy

groups into the consumer society the changes the women s movement demanded in textbooks school curricula media and advertising that led to a new image of women in the consumer market and the ascent of fast food education Spring carries the story into the 21st century by examining the evolving marriage of schools advertising and media and its ongoing role in educating the consumer citizen and creating an integrated consumer market This book will be of wide interest to scholars professionals and students across foundations of education history and sociology of education educational policy mass communications American history and cultural studies It is highly appropriate as a text for courses in these areas

Pedagogies of Globalization Joel Spring, 2012-10-12. In this ground breaking book Joel Spring examines globalization and its worldwide effects on education. A central thesis is that industrial consumerism is the dominant paradigm in the integration of education and economic planning in modern economic security states. In the twenty first century national school systems have similar grades and promotion plans, instructional methods, curriculum organization and linkages between secondary and higher education. Although there are local variations the most striking feature is the sameness of educational systems. How did this happen? How was education globalized? Spring explains and analyzes this phenomenon and its consequences for human life and the future improvement of social and economic organizations. Central themes include the elements of the educational security state and the industrial consumer paradigm in relationship to classical forms of education such as Confucianism, Islam and Christianity and their concerns with creating a just and ethical society; the role of the other in the globalization of educational structures; as international military and economic rivalries spark competition between educational systems; the transition from the Confucian village school to Western forms of education as exemplified in the lives of Ho Chi Minh and Mao Zedong; the effect of the cultural and economic rivalry between the Soviet Union and the United States and its impact on schooling in both countries; the rise of the educational security state in China; the Soviet Union and the United States as these countries focus their educational efforts on military and economic development; the evolution of progressive education as it appeared in revolutionary movements in South America, Cuba, Nicaragua and El Salvador; the transition from traditional to Westernized forms of Islamic education against the background of European imperialism; Arab nationalism and wars of liberation and the uneasy tension between Western educational ideals and Islamic religious values; socialist education in the Democratic People's Republic of Korea; current developments in educational security states such as China, Japan, the United States, the new Russia and the European Union and the consequences of English as the global language and the global spread of the industrial consumer paradigm. Readership for this book includes scholars and students in comparative international and multicultural education, educational policy and politics, historical, social and philosophical foundations of education and curriculum studies. It is a particularly timely, informative, engaging text.
