Religion Vs. Science Elaine Howard Ecklund, Christopher P. Scheitle, 2018 At the end of a five year journey to find out what religious Americans think about science Ecklund and Scheitle emerge with the real story of the relationship between science and religion in American culture Based on the most comprehensive survey ever done representing a range of religious traditions and faith positions Religion vs Science is a story that is more nuanced and complex than the media and pundits would lead us to believe The way religious Americans approach science is shaped by two fundamental questions What does science mean for the existence and activity of God What does science mean for the sacredness of humanity How these questions play out as individual believers think about science both challenges stereotypes and highlights the real tensions between religion and science Ecklund and Scheitle interrogate the widespread myths that religious people dislike science and scientists and deny scientific theories Religion vs Science is a definitive statement on a timely popular subject Rather than a highly conceptual approach to historical debates philosophies or personal opinions Ecklund and Scheitle give readers a facts on the ground empirical look at what religious Americans really understand and think about science

Catastrophes and Conflicts Klaus Gottstein, 2018-12-17 First published in 1999 this book describes what the International community of scientific institutions could do to reverse this trend by pooling its know how and resources in International and interdisciplinary working groups and standing committees by preparing options for action and by standing the possibilities for overcoming the political and economic obstacles to the implementation of expert advice The reasons are given why neighboring groups of people sooner or later start fighting each other unless certain conditions are fulfilled These conditions are enumerated Historical examples are presented Since lack of mutual trust often based on inherited enemy images is at the roots of many conflicts is shown how trust among former opponents can be created by working on joint projects particularly when both sides are threatened by the same danger In previous history this danger was often a common enemy Today we must learn that all of mankind is threatened by environmental and other global problems which can only be mastered by joint efforts forgetting the enmities of earlier generations Furthermore it is explained that many catastrophes could be avoided if risks were properly assessed and taken seriously and necessary precautions not avoided for financial reasons just hoping for the best

Proceedings of the 1st International Conference on Psychology and Health Issues (ICOPHI 2022) Izzanil Hidayati, Rizal Kurniawan, Rahmadiani Aulia, 2023-08-14 This is an open access book We are now heading into the era of society 5.0 The era of society 5.0 was developed by Japanese Government to describe the integration between physical and virtual spaces that can solve social problems Many things in this era are run based on the concept of internet based big data technology that will make human life easier The effect of this era will be felt in various aspects of our lives such as health education transportation industry etc If we look at Indonesia specifically Indonesia is currently still in the era of 4.0 It can be seen in various fields one of them is education field Education in Indonesia currently already uses online learning method However for the 5.0 era online learning method will use various technology based educational tools For this reason it is important for educators to not only use

technology in teaching but also focus and put attention on student's character moral and discipline. Although there are so many benefits and positive aspects we will feel in the era of 5.0, we also need to open our eyes to the negative aspects that may occur when students are exposed to too much technology. The opportunity to get the freedom to access the internet and unlimited access of information can have negative impact on students such as game and social media addiction, cyber bullying etc. These problems can have an impact to student's mental health as we can find in several studies which say that internet addiction has a tendency to make a person apathetic, addicted, and PTSD. Mental health is important because this kind of health is related to many aspects in human such as physical and cognitive functions. One of interesting topics related to this issue is how human cognitive functions especially about the brain and nervous system in addiction and mental health issues which we called neuroscience. For these reasons, an international seminar entitled INTERNATIONAL CONFERENCE ON PSYCHOLOGY AND HEALTH ISSUES carries the theme advancement in health science and psychology for society 5.0.
