[How Moral Philosophy Broke Politics](#) Robert A. Johnson, 2022-06-29 We live in a remarkable world science and technology has shifted our understanding of what is possible

and transformed our lives Rain dances and sun worshipping have been replaced by quantum computers speed of light rockets and our ever closer inching towards genuine artificial intelligence But somehow more and more of us are feeling hopeless we are still ruled by political systems that haven't hugely changed since they fell into place hundreds arguably thousands of years ago The part of our society that makes decisions on everything from our health to our work is almost completely dysfunctional Politicians aren't held to account by truth aren't striving for shared visions of human thriving and are allowed to mix and mash their policies based upon sound bites and media furores rather than actually progressing humankind All the while having to focus on short term goals rather than sustainable ideas How Moral Philosophy Broke Politics argues that a rational evidence based framework for ethics can be developed by drawing all of our moral opinions back to three basic principles that underlie all of our concerns By doing this we can rationally judge and weigh new policies and decisions in a way which is accountable and whilst still debatable much easier to find consensus on If we were to accept this new framework then we would be much better off not just in politics but in all those areas of life which politics affects The world has changed unrecognisably in the last thousand years whilst politics hasn't changed much at all We need to start using reason to develop it into something useful
