Scientific Practice And Ordinary Action Ethnomethodology And Social Studies Of Science:

Scientific Practice and Ordinary Action Michael Lynch, 1993 This controversial book disputes the idea that science is the application of a unified method or the outgrowth of a progressive history of ideas Expert Evidence and Scientific Proof in Criminal Trials Paul Roberts, 2017-07-05 Forensic science evidence and expert witness testimony play an increasingly prominent role in modern criminal proceedings Science produces powerful evidence of criminal offending but has also courted controversy and sometimes contributed towards miscarriages of justice The twenty six articles and essays reproduced in this volume explore the theoretical foundations of modern scientific proof and critically consider the practical issues to which expert evidence gives rise in contemporary criminal trials The essays are prefaced by a substantial new introduction which provides an overview and incisive commentary contextualising the key debates The volume begins by placing forensic science in interdisciplinary focus with contributions from historical sociological Science and Technology Studies STS philosophical and jurisprudential perspectives This is followed by closer examination of the role of forensic science and other expert evidence in criminal proceedings exposing enduring tensions and addressing recent controversies in the relationship between science and criminal law A third set of contributions considers the practical challenges of interpreting and communicating forensic science evidence This perennial battle continues to be fought at the intersection between the logic of scientific inference and the psychology of the fact finder's common sense reasoning Finally the volume's fourth group of essays evaluates the limited success of existing procedural reforms aimed at improving the reception of expert testimony in criminal adjudication and considers future prospects for institutional renewal with a keen eye to comparative law models and experiences success stories and cautionary tales **The Oxford Handbook of**

Phenomenologies and Organization Studies François-Xavier de Vaujany, Jeremy Aroles, Mar Pérezts, 2023 Phenomenologies are a major stream of philosophy Our aim with this handbook is to explore critically and reflexively the plurality of phenomenologies and their becoming in the context of Management and Organization Studies We detail in the introduction the genealogy of the phenomenological moment and make a distinction between four streams of phenomenologies phenomenology as a phenomenological moment post phenomenologies anti phenomenologies and non phenomenologies Beyond many clichés about phenomenologies we argue that phenomenologies cultivate critical perspectives ontologies and even for some of them metaphysics that make them particularly interwoven with other philosophical traditions We draw implications for Management and Organization Studies as a field *Discourse and Cognition* Derek Edwards, 1997-02-10 For those already familiar with discursive work it will be a joy Edwards writes with enormous clarity and insight For psychologists whose work involves an understanding of the relations between language and cognition this book will be essential reading This is a demanding book that will repay close attention It can also be dipped into as a resource for the brilliant reworkings of traditional psychological topic areas such as emotion language cognition categories

Habermas s theory of communicative action is in fact the defining feature of conversational practice Establishing Scientific Classroom Discourse Communities Randy K. Yerrick, Wolff-Michael Roth, 2004-12-13 Establishing Scientific Classroom Discourse Communities Multiple Voices of Teaching and Learning Research is designed to encourage discussion of issues surrounding the reform of classroom science discourse among teachers teacher educators and researchers The contributors some of the top educational researchers linguists and science educators in the world represent a variety of perspectives pertaining to teaching assessment research learning and reform As a whole the book explores the variety complexity and interconnectivity of issues associated with changing classroom learning communities and transforming science classroom discourse to be more representative of the discourse of scientific communities The intent is to expand debate among educators regarding what constitutes exemplary scientific speaking thinking and acting This book is unparalleled in discussing current reform issues from sociolinguistic and sociocultural perspectives The need for a revised perspective on enduring science teaching and learning issues is established and a theoretical framework and methodology for interpreting the critique of classroom and science discourses is presented To model and scaffold this ongoing debate each chapter is followed by a metalogue in which the chapter authors and volume editors critique the issues traversed in the chapter by opening up the neatly argued issues These metalogues challenge extend and deepen the arguments made Central questions addressed include Why is a sociolinguistic interpretation essential in examining science education reform What are key similarities and differences between classroom and scientific communities How can the utility of common knowledge and existing classroom discourse be balanced toward alternative outcomes What curricular issues are associated with transforming classroom talk What other perspectives can assist in creating multiple access to science through redefining classroom discourse Whether this volume improves readers science teaching assists their research or helps them to better prepare tomorrow s science teachers the goal is to engage them in considering the challenges faced by educators as they navigate the seas of reform and strive to improve science education for all **The SAGE Handbook of Digital**

Technology Research Sara Price, Carey Jewitt, Barry Brown, 2013-08-06 Research on and with digital technologies is everywhere today This timely authoritative Handbook explores the issues of rapid technological development social change

and the ubiquity of computing technologies which have become an integrated part of people's everyday lives. This is a comprehensive up-to-date resource for the twenty-first century. It addresses the key aspects of research within the digital technology field and provides a clear framework for readers wanting to navigate the changeable currents of digital innovation. Main themes include: Introduction to the field of contemporary digital technology research; New digital technologies; key characteristics and considerations; Research perspectives for digital technologies; theory and analysis; Environments and tools for digital research; Research challenges. Aimed at a social science audience, it will be of particular value for postgraduate students, researchers, and academics interested in research on digital technology or using digital technology to undertake research.

Rendering Life Molecular Natasha Myers, 2015-08-27 What are living bodies made of? Protein modelers tell us that our cells are composed of millions of proteins intricately folded molecular structures on the scale of nanoparticles. Proteins twist and wriggle as they carry out the activities that keep cells alive. Figuring out how to make these unruly substances visible, tangible, and workable is a challenging task, one that is not readily automated even by the fastest computers. Natasha Myers explores what protein modelers must do to render three-dimensional atomic resolution models of these lively materials. *Rendering Life Molecular* shows that protein models are not just informed by scientific data; model building entangles a modeler's entire sensorium, and modelers must learn to feel their way through the data in order to interpret molecular forms. Myers takes us into protein modeling laboratories and classrooms, tracking how gesture, affect, imagination, and intuition shape practices of objectivity. Asking, "What is life becoming in modelers' hands," she tunes into the ways they animate molecules through their moving bodies and other media. In the process, she amplifies an otherwise muted liveliness, inflecting mechanistic accounts of the stuff of life.

Adversarial Case-Making Thomas Scheffer, 2010-09-24 Cases are not objects at hand for legal decision making; cases are not echoes from a past crime. Cases are first of all made within compound discourse apparatus: here, the English Crown Court and the procedure's attached to it. This book reveals the legal production of cases, including their relevant features. The socio-legal ethnography visits the natural sites of adversarial case making: law firms, barristers' chambers, and Crown Courts. It examines the role and dynamics of client-lawyer meetings, pre-trial hearings, plea bargaining sessions, and jury trials. It focuses on the lawyers' case-making activities, their procedural contexts, and the resulting cases. As an ethnographic discourse study, the book develops a trans-sequential perspective on the interrelated events and processes of case making and, by doing so, overcomes the shortcomings of talk bias and text bias. The trans-sequential approach pays out in detailed case studies on an alibi on guilt or the barrister's notes; it pays out as well in cross-case studies dealing with legal care, procedural infrastructure, or the case system in the common law tradition.

The Everyday Life of an Algorithm Daniel Neyland, 2018-12-17 This open access book begins with an algorithm a set of IF THEN rules used in the development of a new ethical video surveillance architecture for transport hubs Readers are invited to follow the algorithm over three years charting its everyday life Questions of ethics transparency accountability and market value must be grasped by the algorithm in a series of ever more demanding forms of experimentation Here the algorithm must prove its ability to get a grip on everyday life if it is to become an ordinary feature of the settings where it is being put to work Through investigating the everyday life of the algorithm the book opens a conversation with existing social science research that tends to focus on the power and opacity of algorithms In this book we have unique access to the algorithm s design development and testing but can also bear witness to its fragility and dependency on others Design Research Through Practice Ilpo Koskinen, 2011-09-26 Human Computer Interaction HCI user interface design en usability

Alcohol, Tobacco and Obesity Kirsten Bell, Darlene McNaughton, Amy Salmon, 2012-03-29 First Published in 2011 Routledge is an imprint of Taylor Francis an informa company *Handling Digital Brains* Morana Alac, 2011-04-22 An analysis of how fMRI researchers actively involve their bodies with hand movements in particular in laboratory practice The results of fMRI brain scanning require extensive analysis in the laboratory In *Handling Digital Brains* Morana Ala shows that fMRI researchers do not sit passively staring at computer screens but actively involve their bodies in laboratory practice Discussing fMRI visuals with colleagues scientists animate the scans with gestures and talk as they work with computers Ala

argues that to understand how digital scientific visuals take on meaning we must consider their dynamic coordination with gesture speech and working hands These multimodal actions she suggests are an essential component of digital scientific visuals A semiotician trained in cognitive science Ala grounds her discussion in concepts from Peirce s semiotics and her methodology in ethnography and multimodal conversation analysis Basing her observations on videotaped records of activity in three fMRI research labs Ala describes scientists manual engagement with digital visuals of the human brain Doing so she turns her attention to the issue of practical thinking Ala argues that although fMRI technology directs scientists to consider human thinking in terms of an individual brain scientific practices in the fMRI lab demonstrate thinking that engages the whole lived body and the world in which the body is situated The turn toward the digital does not bring with it abstraction but a manual and embodied engagement The practical and multimodal engagement with digital brains in the laboratory challenges certain assumptions behind fMRI technology it suggests our hands are essential to learning and the making of meaning

Thinking Practices in Mathematics and Science Learning James G. Greeno, Shelley V. Goldman, 2013-04-03

The term used in the title of this volume thinking practices evokes questions that the authors of the chapters within it begin to answer What are thinking practices What would schools and other learning settings look like if they were organized for the learning of thinking practices Are thinking practices general or do they differ by disciplines If there are differences what implications do those differences have for how we organize teaching and learning How do perspectives on learning cognition and culture affect the kinds of learning experiences children and adults have This volume describes advances that have been made toward answering these questions These advances involve several agendas including increasing interdisciplinary communication and collaboration reconciling research on cognition with research on teaching learning and school culture and strengthening the connections between research and school practice The term thinking practices is symbolic of a combination of theoretical perspectives that have contributed to the volume editors understanding of how people learn how they organize their thinking inside and across disciplines and how school learning might be better organized By touring through some of the perspectives on thinking and learning that have evolved into school learning designs Greeno and Goldman begin to establish a frame for what they are calling thinking practices This volume is a significant contribution to a topic that they believe will continue to emerge as a coherent body of scientific and educational research and practice
