Scientist Of The Empire Sir Roderick Murchison Scientific Exploration And Victorian Imperialism:

Scientist of Empire Robert A. Stafford, 2002-07-18 Sir Roderick Murchison 1792 1871 was a giant of the imperial age His career was tied intimately to the expansion of the political economic and scientific realm of the British Empire A founding father of geological science and geographical exploration he was both President of the Royal Geographical Society and Director General of the Geological Survey His identification of the Silurian system in geology and subsequent prediction of the location of economic riches are as notable as his patronage of David Livingstone and other figures of Victorian exploration More than any contemporary Murchison emerged as the eminent Victorian who sold science to the imperial government on the grounds of utility as much as prestige Robert Stafford uses this study of a man s life and work to investigate the bargain struck between science and the forces of imperialism in mid Victorian Britain This illuminates the broader and still present intimacy between science and government *Biographies of Scientists for Sci-Tech Libraries* Tony Stankus, 2019-12-05 This book first published in 1991 is an invaluable guide to biographies of scientists from a wide variety of scientific fields The books selected for this highly descriptive bibliography help librarians shatter readers stereotypes of scientists as monomaniacal and uninteresting people by providing interesting and provocative titles to capture the interest of students and other readers The biographies included in this very special bibliography were carefully selected for their humour and human insights to give future scientists encouragement inspiration and an understanding of the origins of particular scientific fields These biographies are unique in that they explore the whole personality of the scientist giving students a glimpse at the variety and drama of the lives beyond well known contributions or Nobel prize accomplishments

The Arctic in the British imagination 1818-1914 Rob David, 2017-03-01 The Arctic region has been the subject of much popular writing This book considers nineteenth century representations of the Arctic and draws upon an extensive range of evidence that will allow the widest connections to emerge from a cross disciplinary analysis using different methodologies and subject matter It positions the Arctic alongside more thoroughly investigated theatres of Victorian enterprise In the nineteenth century most images were in the form of paintings travel narratives lectures given by the explorers themselves and photographs The book explores key themes in Arctic images which impacted on subsequent representations through text painting and photography For much of the nineteenth century national and regional geographical societies promoted exploration and rewarded heroic endeavor The book discusses images of the Arctic which originated in the activities of the geographical societies The Times provided very low key reporting of Arctic expeditions as evidenced by its coverage of the missions of Sir John Franklin and James Clark Ross However the illustrated weekly became one of the main sources of popular representations of the Arctic The book looks at the exhibitions of Arctic peoples Arctic exploration and Arctic fauna in Britain Late nineteenth century exhibitions which featured the Arctic were essentially nostalgic in tone The Golliwogg s Polar Adventures published in 1900 drew on adult representations of the Arctic and will have confirmed and reinforced

children's perceptions of the region Text books board games and novels helped to keep the subject alive among the young

The Spiritual in the Secular Patrick Harries, David Maxwell, 2012-07-20 David Livingstone's visit to Cambridge in 1857 was seen as much as a scientific event as a religious one But he was by no means alone among missionaries in integrating mission with science and other fields of research Rather many missionaries were remarkable pioneering polymaths This collection of essays explores the ways in which late nineteenth and twentieth century missionaries to Africa contributed to various academic disciplines such as linguistics ethnography social anthropology zoology medicine and many more This volume includes an introductory chapter by the editors and eleven chapters that analyze missionary research and its impact on knowledge about African contexts Several themes emerge including many missionaries positive views of indigenous discourses and the complicated relationship between missionaries and professional anthropologists Contributors John Cinnamon Erika Eichholzer Natasha Erlank Deborah Gaitskell Patrick Harries Walima T Kalusa John Manton David Maxwell John Stuart Dmitri van den Bersselaar Honor Vinck

Danielsson, 2016-03-16 Whilst terms such as Lebensraum are commonly associated with National Socialist ideology of the 1930s and 40s ideas of racial living space were in fact generated in the previous decades by an international geographic community of explorers and academics Focusing on one of the most influential figures within this group Sven Hedin this is the first study that systematically connects the geographic community to the intellectual history of the development of National Socialist ideology and genocidal practices The book demonstrates how colonial racial and nationalistic policies were often spearheaded by explorers and geographers such as Hedin In Germany Britain France and Russia their positions as publicly recognized authors and reputable academics made them highly influential with politicians

Whilst this influence was to become most visible within Hitler's Germany the debates were not by any means restricted to or even originated in Germany. Germany was the home of some of the most prominent geographers but this scientific community had a tradition of international debate and exchange with especially British, French and Russian geographic societies and institutions. Many issues that were later discussed and championed by National Socialist ideology were aired and debated in this international setting, raising important questions about the international character and impact of National Socialism. Tracing the intellectual history of the international geographic community and its relationship to National Socialism, this study provides an assessment of Hedin's close involvement with the Nazi elite as a culmination of decades of political and scientific work. In so doing, the book uncovers a long ignored or overlooked important connection between exploration, geographers and genocide.

A Global History of Gold Rushes Benjamin Mountford, Stephen Tuffnell, 2018-10-16 Nothing set the world in motion like gold. Between the discovery of California placer gold in 1848 and the rush to Alaska fifty years later, the search for the precious yellow metal accelerated worldwide circulations of people, goods, capital and technologies. A Global History of Gold Rushes brings together historians of the United States, Africa, Australasia and the Pacific World to tell the rich story of these nineteenth-century gold rushes from a global perspective. Gold was central to the growth of capitalism; it whetted the appetites of empire builders, mobilized the integration of global markets and economies, profoundly affected the environment and transformed large-scale migration patterns. Together, these essays tell the story of fifty years that changed the world.

The Inglorious Arts of Peace Elsbeth Heaman, 1999-01-01 Heaman examines the ways in which British North America was advertised at home and abroad in the pursuit of productivity, markets, capital and immigrants, and evaluates the exhibitions' impact on private industry, the government and Canadian identity. She also considers the participation of women and native peoples at local and international exhibits, showing how they transcended the limited spheres of representation imposed upon them.

Learning to Divide the World John Willinsky, 1998 The barbarian rules by force; the cultivated conqueror teaches. This maxim from the age of empire hints at the usually hidden connections between education and conquest. In *Learning to Divide the World*, John Willinsky brings these correlations to light, offering a balanced, humane and beautifully written account of the ways that imperialism's educational legacy continues to separate us into black and white, east and west, primitive and civilized.

[The Cambridge Companion to John Herschel](#) Stephen Case, Lukas M. Verburgt, 2024-05-09 The first ever comprehensive account of John Herschel's life, work and legacy, shedding new light on the history of Victorian science.
