On Essays Thomas Karshan, Kathryn Murphy, 2020-09-04 Montaigne called it a ramble Chesterton the joke of literature and Hume an ambassador between the worlds of learning and of conversation But what is an essay and how did it emerge as a literary form What are the continuities and contradictions across its history from Montaigne's 1580 *Essais* through the familiar intimacies of the Romantic essay and up to more recent essayists such as Virginia Woolf James Baldwin and Claudia Rankine Sometimes called the fourth genre the essay has been overshadowed in literary history by fiction poetry and drama and has proved notoriously resistant to definition *On Essays* reveals in the essay a pattern of paradox at once a pedagogical tool and a refusal of the methodical languages of universities and professions politically engaged but retired and independent erudite and anti pedantic occasional and enduring intimate and oratorical allusive and idiosyncratic Perhaps because it is a form of writing against which literary scholarship has defined itself there has been surprisingly little work on the tradition of the essay Neither a comprehensive history nor a student companion *On Essays* is a series of seventeen elegantly written essays on authors and aspects in the history of the genre essays which taken together form the most substantial book yet published on the essay in Britain and America

Systems Failure Andrew Franta, 2019-04-16 How eighteenth century writers stretched systems designed to explain social relations to their breaking point showing the flaws in their design The Enlightenment has long been understood and often understood itself as an age of systems In 1759 Jean Le Rond d'Alembert one of the architects of the *Encyclopédie* claimed that the true system of the world has been recognized developed and perfected In *Systems Failure* Andrew Franta challenges this view by exploring the fascination with failure and obsession with unpredictable social forces in a range of English authors from Samuel Johnson to Jane Austen Franta argues that attempts to extend the Enlightenment's systematic spirit to the social world prompted many prominent authors to reject the idea that knowledge is synonymous with system In readings of texts ranging from novels by Sterne Smollett Godwin and Austen to Johnson's literary biographies and De Quincey's periodical essays Franta shows how writers repeatedly take up civil and cultural institutions designed to rationalize society only to reveal the weaknesses that inevitably undermine their organizational and explanatory power Diverging from influential accounts of the rise of the novel *Systems Failure* audaciously reveals that in addition to representing individual experience and social reality the novel was also a vehicle for thinking about how the social world

resists attempts to explain or comprehend it Franta contends that to appreciate the power of systems in the literature of the long eighteenth century we must pay attention to how often they fail and how many of them are created for the express purpose of failing In this unraveling literature arrives at its most penetrating insights about the structure of social life

Scott's Shadow Ian Duncan, 2016-08-02 Scott's Shadow is the first comprehensive account of the flowering of Scottish fiction between 1802 and 1832 when post Enlightenment Edinburgh rivaled London as a center for literary and cultural innovation Ian Duncan shows how Walter Scott became the central figure in these developments and how he helped redefine the novel as the principal modern genre for the representation of national historical life Duncan traces the rise of a cultural nationalist ideology and the ascendancy of Scott's Waverley novels in the years after Waterloo He argues that the key to Scott's achievement and its unprecedented impact was the actualization of a realist aesthetic of fiction one that offered a socializing model of the imagination as first theorized by Scottish philosopher and historian David Hume This aesthetic Duncan contends provides a powerful novelistic alternative to the Kantian Coleridgean account of the imagination that has been taken as normative for British Romanticism since the early twentieth century Duncan goes on to examine in detail how other Scottish writers inspired by Scott's innovations James Hogg and John Galt in particular produced in their own novels and tales rival accounts of regional national and imperial history Scott's Shadow illuminates a major but neglected episode of British Romanticism as well as a pivotal moment in the history and development of the novel
