Billig, 2002-03-01 The Advances in Service Learning Research book series was established to initiate the publication of a set of comprehensive research volumes that would present and discuss a wide range of issues in this broad field called service learning Service learning is a multifaceted pedagogy that crosses all levels of schooling has potential relevance to all academic and professional disciplines is connected to a range of dynamic social issues and operates within a broad range of community contexts In terms of research there is much terrain to cover before a full understanding of service learning can be achieved This volume the first in the annual book series explores various themes issues and answers that bring us one step closer to understanding the essence of service learning The chapters of this volume focus on a broad range of topics that address a variety of research issues on service learning in K 12 education teacher education and higher education Through a wide scoped research lens the volume explores definitional foundations of service learning theoretical issues regarding service learning the impacts of service learning and methodological approaches to studying service learning Collectively the chapters of the book provide varying and at times opposing perspectives on some of the critical issues regarding service learning research and practice **Resources in Education** ,2001-10 **Democracy in Higher Education** Maximilian T. Schuster, 2025-12-05 This volume explores how colleges and universities can respond to divisive political environments by carefully and intentionally cultivating students civic learning and democratic flourishing Structured in five cohesive sections each chapter offers adaptable frameworks promising practices and tangible strategies for building positive momentum toward civic minded student learning in higher education Chapters explore how dialogue inside and outside the classroom community involvement and student agency can shape inclusive engaged campus environments that directly support students civic learning and development Together the text presents a comprehensive approach that acknowledges the interconnected challenges faced by students faculty and staff and demonstrates how higher education institutions can foster environments that not only educate but also renew their promise to cultivate democratically informed and socially responsible citizens **Research in Education** ,1974 *Handbook of Moral and Character Education* Larry Nucci, Tobias Krettenauer, 2014-04-24 There is widespread agreement that schools should contribute to the moral development and character formation of their students In fact 80% of US states currently have mandates regarding character education However the pervasiveness of the support for moral and character education masks a high degree of controversy surrounding its meaning and methods The purpose of this handbook is to supplant the prevalent ideological

The Translational Design of Schools Kenn Fisher, 2016-10-13 This book summarises the deep level of research carried out since 2008 within the emerging evidence based translational design EBD approach to learning environments research This

programme has been carried out by the Learning Environments Applied Research Network of the University of Melbourne its partners and colleagues The chapters are based on ten 3 4 year full time doctoral research dissertations with each chapter outlining the key findings from these studies The book links the chapters through the lens of evidence based design which originates from the health planning sector The rigour of that sector is based on the well accepted methodology of translational research used in clinical medicine for many years In adapting that practice translational medicine is akin to translational development When applied to other sectors and disciplines this becomes EBD health planning translational engineering or in the case of evidence based architecture translational design Thus educational planning becomes the translational design of learning environments These doctoral dissertations are examples of this approach The chapters are organised into a narrative that examines evidence based design through three key themes The first explores key issues in learning environments with three chapters covering spatial literacy in pedagogical practice engaging students in learning spaces and re placing classrooms through flexibility The second theme focusses on the socio cultural implications of learning environments exploring student identity formation aligning learning environment affordances for effective professional development in an innovative senior secondary school and occupying curriculum as space in the arts The third theme investigates the design implications for learning environments with four chapters covering corridors nooks and crannies making space for learning the role of the primary school library in learning plans and pedagogies school design as socio spatial assemblage and evaluating the spatial changes in a technology enabled primary years setting
