Sex Drugs And The Continuing Spread Of Aids:

Sex, Drugs, and the Continuing Spread of AIDS Clyde B. McCoy, James A. Inciardi, 1995 The book covers the nature and origins of AIDS its social dimensions and impact on people and institutions and alternatives for reducing the continuing spread of the disease McCoy and Inciardi offer a breadth of perspectives on important issues from a wide array of sources without pitting these viewpoints against each other The chapters largely follow the chronology of the AIDS epidemic Written in plain English the book's direct illustrative style bridges the gap between scholarly literature and the literate lay reader with a tasteful synthesis of information research and themes in popular culture It brings students directly to grips with the AIDS epidemic illustrating that AIDS is not someone else's problem One of the book's strengths is that it not only presents material but actively helps the student make sense of it *Sex Drugs and the Continuing Spread of AIDS* offers an alternative to existing books many of which are edited collections It covers previously ignored topics and includes original field research In the United States men who have sex with men and injection drug users represent the vast majority of individuals with AIDS while other members of the HIV AIDS caseload reflect relatively small numbers However the heterosexual spread of HIV in the U S is increasing particularly in those cities and communities where rates of injection drug use are high Elsewhere in the world especially in developing nations heterosexual spread is the major route of transmission At issue is the extent to which heterosexual transmission has an impact on the general spread of AIDS During the past decade there have been conflicting arguments in this regard *Sex Drugs and the Continuing Spread of AIDS* addresses this ongoing debate

Sex, Drugs, And Hiv/aids In Brazil James Inciardi, Hilary Surratt, Paulo R. Telles, 2000-12-04 At the beginning of the twenty first century Brazil ranked second only to the United States in the number of reported cases of AIDS Because Brazil's extensive poverty and inequality its fragile economic situation and its limited network of health services the scarce prevention intervention resources targeted only the most visible at risk populations gay men sailors prostitutes and street children Virtually forgotten were Brazil's hidden drug users as well as the tens of millions of individuals living in the country's thousands of favelas or shantytowns which are a characteristic part of almost every Brazilian city In *Sex Drugs and HIV AIDS in Brazil* the authors examine the emergence of AIDS in Brazil its linkages to drug use and the sexual culture and its epidemiology in such populations as cocaine users street children and male transvestite prostitutes Special attention is focused on an HIV AIDS community outreach program established in Rio de Janeiro which represented the first such prevention intervention program in all of Brazil targeting indigent cocaine users This 6 year initiative was funded by the U S National Institute on Drug Abuse and carried out by the authors of this book The research combines anthropological sociological and biological perspectives all data were gathered through empirical and ethnographic techniques

Women, Drug Use, and HIV Infection Sally J. Stevens, Stephanie Tortu, Susan L. Coyle, 1998 In *Women Drug Use and HIV Infection* you'll see why AIDS is the fourth leading cause of death among women of childbearing age and you'll come to understand why it disproportionately affects

minority women many of whom are poor addicted to drugs and or the sexual partners of drug users You ll gain instantaneous access to the data collected by a national multi site Cooperative Agreement funded by the National Institute on Drug Abuse The quantitative and qualitative studies contained in this publication will familiarize you with the lives of women especially susceptible to HIV infection You ll also discover descriptions of prevention strategies that will lower the risk of infection in this high risk population of women In *Women Drug Use and HIV Infection* at least two chapters focus on each main topic giving you a deeper multilayered look at each issue Even after a few chapters you ll find that your understanding of this national societal illness will expand tremendously in these and other areas cultural contexts of various geographical areas of the United States perceptions of HIV risk among the women who use drugs the difference in risk behaviors of drug using women in cities of different sizes with different rates of HIV seroprevalence how past and current domestic violence changes the HIV risk behavior of women who are sexual partners of drug users how the trading of sex for drugs and or money is critical in tracking HIV risk behavior in women *Women Drug Use and HIV Infection* takes its data from a wide variety of U S locations and from a wide variety of women and organizes it in a way that you can understand process and ultimately turn toward transformative action in your rural or urban area of the country You ll get the latest in outreach and intervention efforts and you ll find yourself with more and more recommendations for future prevention

Safer Sex in Personal Relationships Tara M. Emmers-Sommer, Mike Allen, 2004-12-13 This book focuses on safer sex discussion and practice in close personal relationships emphasizing research on individuals in personal relationship types that are experiencing a rise in HIV infection and AIDS Moving beyond studies of gay adult males and IV drug users this work paints a clear picture of the very real risk that exists for these less studied more general populations so individuals may better personalize the risk and engage in more preventative measures Authors Tara M Emmers Sommer and Mike Allen examine issues surrounding safer sex utilizing research that focuses on how individuals struggle with personalizing the HIV and AIDS risk and how they cope with safer sex issues *Safer Sex in Personal Relationships* takes readers on a journey through a variety of close relationship types It begins by highlighting awareness to the global enormity of HIV and AIDS and providing a link between the global and personal and the need to make HIV and AIDS awareness part of everyday talk and personal relationship structure It then focuses on safer sex in close relationships both heterosexual and homosexual marital relationships and the importance of safe sex discussion and awareness in marriages HIV and AIDS from a multicultural perspective HIV and AIDS in aged populations and increasing awareness understanding and compassion of those living with HIV and AIDS This book will appeal to scholars and students concerned with HIV and AIDS in personal relationships It will be an invaluable text for courses on interpersonal communication and relationships family marital human sexuality sex and gender gay and lesbian relationships and sexual education and relational conflict across communication psychology and sociology disciplines

Elwood, 1998-11-01 In this single volume William N Elwood has gathered potent evidence of the impact that the HIV AIDS epidemic has had on the world its communities and its inhabitants and he addresses the role of communication in affecting the way in which people respond to AIDS With a multidisciplinary group of contributors and topics ranging from political rhetoric to interpersonal discourse Power in the Blood offers a multitude of ways in which to think about power politics HIV prevention and people living with HIV Readers will be able to use this information in class discussions program designs grant applications and research as well as in their own lives With this volume Elwood makes a thoroughly convincing argument that communication is the key to understanding treating and preventing AIDS and he inspires further action toward the goal of ending the AIDS crisis *HIV Pioneers* Wendee M. Wechsberg, 2018-07-02 Wechsberg Wayne Wiebel William A Zule David Solomon Anglia Ruskin University Nursing Times Preventing HIV Infection Among Injecting Drug Users in High-Risk Countries Institute of Medicine, Board on Global Health, Committee on the Prevention of HIV Infection Among Injecting Drug Users in High-Risk Countries, 2006-12-20 Drug dependence is a complex chronic relapsing condition that is often accompanied by severe health psychological economic legal and social consequences Injecting drug users are particularly vulnerable to HIV and other bloodborne infections such as hepatitis C as a result of sharing contaminated injecting equipment All drug dependent individuals including injecting drug users IDUs may be at increased risk of HIV infection because of high risk sexual behaviors There are an estimated 13.2 million injecting drug users IDUs world wide 78 percent of whom live in developing or transitional countries The sharing of contaminated injecting equipment has become a major driving force of the global AIDS epidemic and is the primary mode of HIV transmission in many countries In some cases epidemics initially fueled by the sharing of contaminated injecting equipment are spreading through sexual transmission from IDUs to non injecting populations and through perinatal transmission to newborns Reversing the rise of HIV infections among IDUs has thus become an urgent global public health challenge one that remains largely unmet In response to this challenge the Institute of Medicine convened a public workshop in Geneva in December 2005 to gather information from experts on IDU driven HIV epidemics in the most affected regions of the world with an emphasis on countries throughout Eastern Europe the Commonwealth of Independent States and significant parts of Asia Experts from other regions also provided information on their experiences in preventing HIV infection among IDUs This report provides a

summary of the workshop discussions Preventing HIV Infection among Injecting Drug Users in High Risk Countries describes the evidence on the intermediate outcomes of drug related risk and sex related risk prior to examining the impact on HIV transmission This report focuses on programs that are designed to prevent the transmission of HIV among injecting drug users These programs range from efforts to curtail non medical drug use to those that encourage reduction in high risk behavior among drug users Although the report focuses on HIV prevention for IDUs in high risk countries the Committee considered evidence from countries around the world The findings and recommendations of this report are also applicable to countries where injecting drug use is not the primary driver but in which injection drug use is nevertheless associated with significant HIV transmission
