Superconductivity And Particle Detection - Proceedings Of The International Workshop G Waysand,A Morales,T A Girard,1995-03-07 Superconductors today constitute a major focus of activity in the development of high resolution detectors for many applications This volume collects the papers of an international workshop on the basic theoretical and experimental issues involved in the interaction between particles and superconductors It emphasizes the involved condensed matter aspects of non equilibrium time dependent Ginzburg Landau equations metastable superconductivity quasiparticle and phonon lifetimes and quasiparticle trapping as well as low noise pulse electronics detector fabrication and low background cryogenics **Production Yield of Muon-Induced Neutrons in Lead** Holger Kluck,2015-07-28 The work presented in this book is a major step towards understanding and eventually suppressing background in the direct search for dark matter particles scattering off germanium detectors Although the flux of cosmic muons is reduced by many orders of magnitude in underground laboratories the remaining energetic muons induce neutrons through various processes neutrons that can potentially mimic a dark matter signal This thesis describes the measurement of muon induced neutrons over more than 3 years in the Modane underground laboratory The data are complemented by a thorough modeling of the neutron signal using the GEANT4 simulation package demonstrating the appropriateness of this tool to model these rare processes As a result a

precise neutron production yield can be presented Thus future underground experiments will be able to reliably model the expected rate of muon induced neutrons making it possible to develop the necessary shielding concept to suppress this background component *Low Temperature Physics and Chemistry* ,1996 *Proceedings of the International Conference on Radioscience, Equatorial Atmospheric Science and Environment and Humanosphere Science, 2021* Erma Yulihastin,Prayitno Abadi,Peberlin Sitompul,Wendi Harjupa,2022-09-29 This book presents recent advances in the area of Radioscience Equatorial Atmospheric Science and Environment from the international symposium for equatorial atmosphere of the celebration of the Equatorial Atmosphere Radar EAR 20th Anniversary conducted by Indonesian National Institute of Aeronautics and Space LAPAN and Kyoto University in 2021 It provides a scientific platform for all participants to discuss ideas and current issues as well as to design solutions in the areas of atmospheric science environmental science space science and related fields
