

NATURE, CONSCIOUSNESS, AND METAPHYSICS IN MERLEAU-PONTY'S EARLY THOUGHT

DIMITRIS APOSTOLOPOULOS

Loyola University Chicago

La structure du comportement details consciousness-nature relations by navigating between realist and intellectualist alternatives. A phenomenological reading of form guides its attempt to formulate a view that does not reduce consciousness to matter or perceptual structure to a product of mind. I show that this strategy relies on hitherto overlooked idealist commitments. Forms are perceived objects whose intentional structure is intelligibly organized. Having denied that forms are constituted by mind or emergent from matter, Merleau-Ponty likens form-constitution to an ideal process of intentional self-organization. Despite recognizing that Gestalt psychology develops fruitful models of perceptual self-organization, and adopting the transcendental view that form is significant for consciousness, his revisionary interpretation of form outstrips these accounts' ontologies of mind and nature, and is better understood in light of a post-Kantian philosophical heritage. These results cast Merleau-Ponty's relation to the Gestalt, post-Kantian, and phenomenological traditions in new light, challenge naturalizing interpretations of *Structure*, and motivate a rethinking of the status of metaphysics in his early thought.

1. Introduction

La Structure du comportement attempts a first solution to a problem that occupies Merleau-Ponty throughout his career: how best to define "the relations between consciousness and nature" (SC 1/3).¹ *Structure's* proposal rests on its reading of form (*la forme*) or structure (*la structure*).² Like behaviour (*le comportement*), form

2. Following Merleau-Ponty, who in turn follows Guillaume (1937/1979) on this point, I use these two terms interchangeably. As a reviewer suggests, however, there is reason to think that

False Expectations Dale Eisler,University of Regina. Canadian Plains Research Center,2006 Myth has played an important and ongoing role in the development of Saskatchewan's political economy First during the time of the National Policy Saskatchewan was portrayed to immigrants as a promised land This period served as the psychological and economic foundation for the province When belief in Saskatchewan as a promised land was shattered by the Great Depression and Dirty Thirties the myth was reconstituted through the inspiration of the social gospel It was then politically reinvigorated in the meaning of medicare and has been expressed in recent decades through the competing visions for economic development Through all these eras no matter what the tides of politics there remained one constant the singular collective idea that Saskatchewan was a special place with unrealized potential The challenge for the public dialogue of Saskatchewan as the province enters its second century is to not replay the mistakes of the past Saskatchewan people must recognize the role that myth has played and must continue to play in the life of the province But at the same time they must differentiate it from reality by understanding the power of myth as a force for progress and its potential to create false expectations *Leo Strauss* Neil G. Robertson,2021-05-28 Leo Strauss's lifelong intellectual mission was to recover classical rationalism a pursuit that has made him a controversial figure to this day While his critics see him as responsible for a troubling anti democratic strain in modern politics others argue that his thought is in fact the best defence of responsible democracy Neil Robertson's new introduction to Strauss aims to transcend these divides and present a non partisan account of his thought He shows how

Strauss intellectual formation in Weimar Germany and flight from Nazism led him to develop a critique of modernity that tended to support a conservative politics while embracing a radical sense of what philosophy is and can be. He examines the way in which Strauss built upon the thought of Nietzsche and Heidegger in order to show how their nihilism led not to a standpoint beyond western rationality but to a recovery of its roots. This skillful reconstruction of the coherence and unity of Strauss thought is the essential guide for anyone wishing to fully grasp the contribution of one of the most contentious and intriguing figures in 20th century intellectual history.

Russian and Soviet Views of Modern Western Art, 1890s to Mid-1930s
Ilia Dorontchenkov, 2009-06-10 From the first Modernist exhibitions in the late 1890s to the Soviet rupture with the West in the mid 1930s, Russian artists and writers came into wide contact with modern European art and ideas. Introducing a wealth of little known material set in an illuminating interpretive context, this sourcebook presents Russian and Soviet views of Western art during this critical period of cultural transformation. The writings document complex responses to these works and ideas before the Russians lost contact with them almost entirely. Many of these writings have been unavailable to foreign readers and until recently were not widely known even to Russian scholars. Both an important reference and a valuable resource for classrooms, the book includes an introductory essay and shorter introductions to the individual sections.
