CALL Teacher Education Models, Methods, and Theoretical Groundings: A Systematic Review of the Studies in Under-Represented Contexts

Fatemeh Nami

Abstract This chapter reports a systematic literature review of CALL teacher education research conducted in under-represented geographical contexts, namely Asia, the Middle East, and Africa over the past two decades. The main objective was twofold: first, to explore how CALL professional development (PD) is approached in these contexts with special attention to the educational and geographical contexts of the studies, their design features, and their study-related qualities; and second, to identify research gaps. Drawing on the PRISMA model as the main analysis procedure, 89 articles published in peer-reviewed scholarly journals were screened from a pool of 3495 works. Applying geographical context filtering, 12 papers were finally selected as eligible to be included in the study, of which 61.6% were conducted in the Middle East and 38.4% belonged to Eastern Asia. No accounts of CALL PD attempts in African educational settings were found in scholarly journals. Several design-, context-, and study-related categories were explored to understand the approaches toward CALL PD and the research gaps. The analyses revealed the dominance of qualitative studies and self-report data sources in the CALL PD studies. Drawing on the findings, some pedagogical implications are generated for future research.

Keywords Computer-Assisted Language Learning Professional Development (CALL PD) • Asia • Africa • The Middle East • Systematic review

1 Introduction

Language teachers, as one of the key determinants of successful integration of the pedagogical approaches, require relevant and adequate professional development (PD). Second and foreign language teacher education is not a new concept in PD research. Despite this, teacher preparation for computer-assisted language learning (CALL) is a more recent research focus. Technology-enhanced language education has come under the spotlight over the past few decades. This young research

Papers On Literature Models And Methods:

Papers on Literature Robert Lawrence Beum, James W. Sire, 1970 **Models and Methods in the Philosophy of Science: Selected Essays** Patrick Suppes, 2013-03-14 The thirty one papers collected in this volume represent most of the articles that I have published in the philosophy of science and related foundational areas of science since 1970 The present volume is a natural successor to *Studies in the Methodology and Foundations of Science* a collection of my articles published in 1969 by Reidel now a part of Kluwer The articles are arranged under five main headings Part I contains six articles on general methodology The topics range from formal methods to the plurality of science Part II contains six articles on causality and explanation The emphasis is almost entirely on probabilistic approaches Part III contains six articles on probability and measurement The importance of representation theorems for both probability and measurement is stressed Part IV contains five articles on the foundations of physics The first three articles are concerned with action at a distance and space and time the last two with quantum mechanics Part V contains eight articles on the foundations of psychology This is the longest part and the articles reflect my continuing strong interest in the nature of learning and perception Within each part the articles are arranged chronologically I turn now to a more detailed overview of the content The first article of Part I concerns the role of formal methods in the philosophy of science Here I discuss what is the new role for formal methods now that the imperialism of logical positivism has disappeared Statistical Models and Methods for Data Science Leonardo Grilli, Monia Lupparelli, Carla Rampichini, Emilia Rocco, Maurizio Vichi, 2023-07-24 This book focuses on methods and models in classification and data analysis and presents real world applications at the interface with data science Numerous topics are covered ranging from statistical inference and modelling to clustering and factorial methods and from directional data analysis to time series analysis and small area estimation The applications deal with new developments in a variety of fields including medicine finance engineering marketing and cyber risk The contents comprise selected and peer reviewed contributions presented at the 13th Scientific Meeting of the Classification and Data Analysis Group of the Italian Statistical Society CLADAG 2021 held online in Florence Italy on September 9-11 2021 CLADAG promotes advanced methodological research in multivariate statistics with a special focus on data analysis and classification and supports the exchange and dissemination of ideas methodological concepts numerical methods algorithms and computational and applied results at the interface between classification and data science **Analytic Hierarchy Process - Models, Methods, Concepts, and Applications** Antonella Petrillo, Fabio De Felice, 2023-07-12 Analytic Hierarchy Process is one of the most widely known and applied multi criteria decision making methodologies worldwide Its potential to analyze complex decision making problems is enormous This makes the methodology a very flexible tool that can be applied in various scenarios social engineering economic political environmental location market share etc The idea of the book is to present examples and case studies based on a rigorous scientific approach to Analytic Hierarchy Process This book is intended to be a useful resource for

anyone who deals with this issue **Quantitative Models for Value-Based Supply Chain Management** Marcus Brandenburg, 2012-10-25 Supply chain management SCM strives for creating competitive advantage and value for customers by integrating business processes from end users through original suppliers However the question of how SCM influences the value of a firm is not fully answered Various conceptual frameworks that explain the coherence of SCM and company value comprehended as value based SCM are well accepted in scientific research but quantitative approaches to value based SCM are found rather seldom The book contributes to this research gap by proposing quantitative models that allow for assessing influences of SCM on the value of a firm Opposed to existing models that limit the observation to chosen facets of SCM or selected value drivers this holistic approach is adequate to reflect configurational and operational aspects of SCM cover all phases of the product life cycle financially compare value impacts of profitability related and asset related value drivers and assess influences of dynamics and uncertainties on company value DSGE Models in Macroeconomics Nathan Balke, Fabio Canova, Fabio Milani, Mark Wynne, 2012-11-29 This volume of Advances in Econometrics contains articles that examine key topics in the modeling and estimation of dynamic stochastic general equilibrium DSGE models Because DSGE models combine micro and macroeconomic theory with formal econometric modeling and inference over the past decade they have become an established framework for analysis **A Survey of Human Factors Methodologies and Models for Improving the Maintainability Design of Emerging Army Aviation Systems** John W. Ruffner, 1990 **Network Bioscience, 2nd Edition** Marco Pellegrini, Marco Antoniotti, Bud Mishra, 2020-03-27 Network science has accelerated a deep and successful trend in research that influences a range of disciplines like mathematics graph theory physics statistics data science and computer science just to name a few and adapts the relevant techniques and insights to address relevant but disparate social biological technological questions We are now in an era of big biological data supported by cost effective high throughput genomic transcriptomic proteomic metabolomic data collection techniques that allow one to take snapshots of the cells molecular profiles in a systematic fashion Moreover recently also phenotypic data data on diseases symptoms patients etc are being collected at nation wide level thus giving us another source of highly related causal big data This wealth of data is usually modeled as networks aka binary relations graphs or webs of interactions including protein protein metabolic signaling and transcription regulatory interactions The network model is a key view point leading to the uncovering of mesoscale phenomena thus providing an essential bridge between the observable phenotypes and omics underlying mechanisms Moreover network analysis is a powerful hypothesis generation tool guiding the scientific cycle of data gathering data interpretation hypothesis generation and hypothesis testing A major challenge in contemporary research is the synthesis of deep insights coming from network science with the wealth of data often noisy contradictory incomplete and difficult to replicate so to answer meaningful biological questions in a quantifiable way using static and dynamic properties of biological networks **XML Data Mining: Models, Methods, and Applications** Tagarelli,

Andrea,2011-11-30 The widespread use of XML in business and scientific databases has prompted the development of methodologies techniques and systems for effectively managing and analyzing XML data This has increasingly attracted the attention of different research communities including database information retrieval pattern recognition and machine learning from which several proposals have been offered to address problems in XML data management and knowledge discovery XML Data Mining Models Methods and Applications aims to collect knowledge from experts of database information retrieval machine learning and knowledge management communities in developing models methods and systems for XML data mining This book addresses key issues and challenges in XML data mining offering insights into the various existing solutions and best practices for modeling processing analyzing XML data and for evaluating performance of XML data mining algorithms and systems *Prediction Techniques for Renewable Energy Generation and Load Demand Forecasting* Anuradha Tomar,Prerna Gaur,Xiaolong Jin,2023-01-20 This book provides an introduction to forecasting methods for renewable energy sources integrated with existing grid It consists of two sections the first one is on the generation side forecasting methods while the second section deals with the different ways of load forecasting It broadly includes artificial intelligence machine learning hybrid techniques and other state of the art techniques for renewable energy and load predictions The book reflects the state of the art in distributed generation system and future microgrids and covers theory algorithms simulations and case studies It offers invaluable insights through this valuable resource to students and researchers working in the fields of renewable energy integration of renewable energy with existing grid and electrical distribution network
