Perception And The Physical World:

Perception and the Physical World David Malet Armstrong,1966 *Perception and the Physical World* David Malet Armstrong,2023 First published in 1961 *Perception and the Physical World* contends that there are insuperable difficulties for the Representative and Phenomenalist theories Unreflective common sense thinks of sense perception as a direct grasping of the nature of the physical world But when we are confronted with facts about sensory illusion about the physical and physiological causes of perception and with modern scientific views of the real nature of matter it is hard to maintain such a Direct Realist theory of perception We tend to substitute a Copy or Representative theory which puts sense impressions between ourselves and physical reality Some philosophers overwhelmed by the difficulties of the Copy theory retreat into Phenomenalism which identifies the physical world with our sense impressions The author re examines all the traditional objections to a Direct Realist theory and tries to show that they can be overcome This book will be of interest to students of philosophy **PERCEPTION AND THE PHYSICAL WORLD. D. M. ARMSTRONG,2023** **Perception and the Physical World** David Malet Armstrong,1970 *Visual Space Perception* Maurice Hershenson,1999 A renewed interest in the study of vision has attracted scholars from such diverse fields as neuroscience computer science mathematics physics and philosophy At the same time the development of imaging devices and popularization of stereoscopic effects has increased student interest in vision This primer provides an overview of the principles of space perception in a handbook format that should appeal to researchers as well as students Topics covered include geometrical and distal proximal relationships spatial localization stereopsis cyclopean perception stimulus inadequacy pictorial cues perceived size and shape Gibsonian psychophysics lateral motion motion in depth perceived object motion and motion detection Perception and the Physical World Dieter Heyer,Rainer Mausfeld,2002-05-22 Perception is a subject of great current interest and one that is likely to escalate over coming years The focus of this book is on conceptual and philosophical issues of perception including the classic notion of unconscious inferences in perception The book consists of contributions from a group of international researchers who spent a year together as distinguished fellows at the German Centre for Advanced Study Feeling Present in the Physical World and in Computer-Mediated Environments J. Waterworth,G. Riva,2014-11-21 This concise volume presents for the first time a coherent and detailed account of why we experience feelings of being present in the physical world and in computer mediated environments why we often don t and why it matters for design psychotherapy tool use and social creativity amongst other practical applications **Perception and the Physical World** Jacques Louis Lions,1961 Mental States and Conceptual Worlds Jason Brown,2019-03-22 An account of perception is essential for an interpretation of memory thought and the mental state The theory expounded in this book developed from clinical studies of brain damaged individuals is a dynamic process account that departs from static computational models of the mind with implications for our understanding of all aspects of mental function including the mind brain problem The various topics are

discussed in lengthy essays that cover such phenomena as imagery reality and illusion time and the present moment subjectivity will and agency and psychoanalysis and group psychology *Psychology* Richard A. Griggs,2008-02-15 The updated 2nd edition of this brief introduction to Psychology is more accessible and ideal for short courses This is a brief accessible introductory psychology textbook The updated 2nd edition of this clear and brief introduction to Psychology is written by the award winning lecturer and author Richard Griggs The text is written in an engaging style and presents a selection of carefully chosen core concepts in psychology providing solid topical coverage without drowning the student in a sea of details **The Nature of Perception** John Foster,2000-03-09 John Foster presents a penetrating investigation of the question what is it to perceive a physical object Is perceptual contact with a physical object he asks something fundamental or does it break down into further factors If the latter what are these factors and how do they combine to secure the contact For most of the book Foster addresses these questions in the framework of a realist view of the physical world But the arguments which thereby unfold arguments which undermine direct realism and establish a version of the sense datum theory lead to the conclusion that we do not perceive physical objects at all The only way to avoid this conclusion is by abandoning physical realism for a form of idealism and this is the option which Foster finally embraces The Nature of Perception makes a valuable contribution to the ongoing debate it sheds light on the traditional issues and breathes new life into positions which most current philosophers assume to be dead **Merleau-Ponty's Philosophy** Lawrence Hass,2008 A clear and comprehensive introduction to the thought of French philosopher Maurice Merleau Ponty *Portalism* Jeffrey Laird,2022-11-25 The mind is not the brain The locus of our consciousness is in the world Portalism embraces radical phenomenal externalism and represents a contemporary form of dualism that rejects materialist assumptions of mind brain identity As a philosophy of mind Portalism breaks with traditional thinking in two significant ways first by holding that consciousness is in fact a fifth fundamental force of nature endowed with behavioural attributes not unlike that of gravity and second by arguing how consciousness inheres in all living organisms regardless of their biological sophistication Portalism compels us to reject traditional monist theories about the nature of consciousness and boldly enter into a new way of thinking about our own reality *Knowledge and Justification* John L. Pollock,2015-03-08 One of the most firmly entrenched beliefs of contemporary philosophy is that the only way to analyze a concept is to state its truth conditions In epistemology this has led to the search for reductive analyses to phenomenalism behaviorism and their analogues in other areas of knowledge Arguing that these attempts at reductive analysis have invariably failed John L Pollock defends an alternative theory of conceptual analysis in this book The author suggests that concepts should be analyzed in terms of their justification conditions rather than their truth conditions After laying a theoretical foundation for this alternative scheme of analysis Professor Pollock applies his theory in proposing solutions to a number of traditional epistemological problems Among the areas of knowledge discussed are perception knowledge of the past induction knowledge of other minds and a priori

Wong, 2013-07-27 Growing up in Singapore in the 80s has been challenging I didn't know much about life or economy I didn't know what I want to do apart from playing I know I had to study and get a job In school we had to write composition about our profession when we grow up I had never wanted to be a philosopher let alone writing about social philosophy It is just that growing up with a single parent is tough It is tougher when she is uneducated and I had to learn most things by myself After my National Service I decided to further studies That was when I was exposed to philosophy and psychology in the UK After graduation in 1999 with a degree in Electronics I came back home to resume my National Service I disrupt it and had about 2 months left The life in UK exposed me to something that I did not notice when growing up in Singapore I find local social scene unsatisfactory They are Confucians Muslims Christians freethinkers and humanists Most time they are preoccupied with how to earn more money Religion does not give me the fulfillment that it promised In addition most were based on Singaporeans interpretation of the Bible and Buddhism's dharma Most times I feel that everything that Singaporeans do has got to do with wealth creation or at least with the expenditure of it It end up like what Pope Francis referred to as the cult of money Organised religion involves more fear mongering than cultivating an inner grace and peace Hence this book is about how I relate an ancient thinker's ethics Aristotle to the present day I find Aristotle's ethics to most suit my needs as a man and lover It does not pretend to be more than what it seek the golden mean It does require us to think and explore the values to find balance and achieve wisdom with intellectual and moral virtues I also find other philosophers French or not particularly insightful and thought provoking They offer me explanation and exploration on subjects like love sex and death Freudian psychoanalysis are also very penetrating in their findings and insights Moreover I needed some contemporary psychological theory not in depth psychoanalysis to back Aristotle's model of ethics intellectual and moral virtues Hence the psychological background of my book I got acquainted with these psychological theories when I was preparing myself to be a financial consultant I later found out more about them and they became useful in my work and life Hence I would like to share it with people in Asia so that they can ask the right kind of questions in life in order to learn more about themselves and the social milieu they are living in Because everyone of us are affected by the social sciences politics economics and sociology This book will I hope allow us to understand why we are irrational and how we can make rational changes through reasonings in their life and achieving eudaimonia My wish is simply to share what I enjoy doing apart from creating useful ideas to improve the world Through my book I hope to make others understand religion science
