---

- Begum (not her real name), a married Rohingya refugee in her early twenties is on treatment for HIV at a Malaysian hospital. She has lived in Malaysia for 7 years with her husband and 2 children. She claims that none of her family members are HIV positive.
- Her HIV status was detected during her first pregnancy years ago, at a government health clinic. She dropped out and only made contact with the health service (government hospital) for delivery of the baby.
- During her second pregnancy one year ago, she was tested at the health clinic and was confirmed positive. She was referred to Sungai Buloh Hospital for treatment before delivery in July, 2011. She has been on treatment since August 2011 under the Individual Assistance program of UNHCR.

Featuring Engaging Podcasts Highlighting Major Public Health Case Studies in all 15 Chapters. Public Health: An Introduction to the Science and Practice of Population Health is a foundational textbook designed for students who are launching their public health studies and preparing for professions in the field. Our health is generated throughout our lives and by the world around us, by where we live, where we work, and who we interact with on a daily basis. This book therefore takes a unique approach to teach public health. It combines an eco-social framework with a life course perspective on population health to help the student understand how our experiences and context shape our health and how this informs the practice of public health. Written by leading public health educators, the textbook begins with the foundations: a history of public health and a discussion of the core values of health equity and disease prevention. An engaging survey of the eco-social framework and life course factors affecting health follows. The book concludes with a section dedicated to population health methods, implementation science, community engagement, advocacy, and health promotion. The book is illustrated throughout by cases that cross disciplines that engage the student with issues of contemporary concern that are the remit of public health and that offer systematic analyses that point toward solutions. With a focused approach to public health that guides the student through the causes of health across levels and across stages in the life course, this groundbreaking first of its kind textbook integrates the core components of the field in clear and lucid language. Timely and relevant case studies, practical learning objectives, discussion questions in all chapters, numerous tables

and illustrations throughout chapter based podcasts and more make Public Health an innovative and lively platform for understanding the science of population health and the practice of public health Key Features A modern approach to the field that grounds the study of public health in life course and eco social frameworks to better organize the science of population health and the practice of public health Explains the central role that prevention and health equity play in improving population health Features case studies that discuss contemporary issues affecting population health including heart disease Ebola environmental exposures gun violence the opioid epidemic health policy and many more High volume of figures and tables to illustrate key points Includes a robust Instructor ancillary package with PowerPoints an Instructor s Manual test banks discussion questions and conversion guide
