Restivo,2012-12-06 The problems I address in this book are among the least studied in the sociology of science and knowledge Part I is a critique of the claim that there are parallels between ancient mysticism and modern physics and a sociological analysis of this claim as a strategy in intellectual conflict This study must ultimately be rooted more firmly in a type of sociology of knowledge that is just now beginning to crystallize and which I discuss in Chapter 7 and a sociology of religion that is not so much unknown as underground and timid that is a non worshipful materialist sociology of religion My study of physics mysticism parallelism is a vehicle for exploring epistemic strategies I thus conclude Part I by sketching a materialist emancipatory epistemic strategy My conclusion brings together a number of ideas formulated by myself and others over the past several years but stops short of a systematic synthesis A more integrated and coherent model than what I can sketch here must wait on the results of research now in progress in the critical as opposed to apologetic or worshipful sociology of knowledge **Philosophy and the New Physics** Jonathan H Powers,2023-07-14 First Published in 1982

Philosophy and the New Physics is a compact and yet remarkably rich excursion through the history of physics from Newtonian mechanics to quantum physics The theory of relativity quantum mechanics and ideas about the fundamental constituents of matter have attracted a great deal of philosophical comment Indeed the originators of some of these theories thought they were solving philosophical problems as well as scientific ones Classical physics is often portrayed as epitomizing mechanistic materialism and the revolution in modern physics is variously claimed to vindicate logical positivism operationalism organicism dialectical materialism and Buddhist metaphysics In this book Jonathan Powers criticizes all of these claims and argues that such varied and conflicting interpretations are possible because of ineradicable elements of

conventionality in scientific theories This is a must read for scholars and researchers of philosophy of science and philosophy in general     *An Investigation of the Laws of Thought* George Boole,1854     *Return to Philosophy* C. E. M. Joad,2019-01-13

Many people today adopt an instinctively derogatory attitude to reason It is not they say a free activity of the mind reaching conclusions under no compulsion save that of the evidence it is the tool of instinct and the handmaid of desire They are sceptical also in their attitude towards values Beauty they hold is not an intrinsic quality of things it is merely the compliment which we bestow upon the objects which have been fortunate enough to give us pleasure One man s pleasure is as good as another s and all the art criticism in the world is only an elaborate series of variations upon the theme This is what I happen to like As with art so with morals To act rightly is merely to act in a way of which other people approve It is the object of the following pages to criticize this subjectivist attitude and to expose its inadequacy in art in morals and in thought The book is therefore in effect a restatement in modern terms of certain traditional beliefs that reason if properly employed can give us truth that beauty is a real value which exists and that we can train our minds and form our tastes to discern it that some things are really right in a sense in which others are really wrong and that the endeavour to know truth and to discern value is the noblest pursuit of the adult civilized intelligence The best name for this pursuit is philosophy This conclusion is reached by a number of different routes each of which starting from some distinctive characteristic of modern life or thought an aeroplane shed a quasi religious cult or an essay of Aldous Huxley converges upon the same position The defence of reason the affirmation of values and the plea for philosophy thus constitute the underlying theme which links together the various essays which follow Foreword     **On Frost** Edwin Harrison Cady,Louis J. Budd,1991 From 1929 to the latest issue American Literature has been the foremost journal expressing the findings of those who study our national literature The journal has published the best work of literary historians critics and bibliographers ranging from the founders of the discipline to the best current critics and researchers The longevity of this excellence lends a special distinction to the articles in American Literature Presented in order of their first appearance the articles in each volume constitute a revealing record of developing insights and important shifts of critical emphasis Each article has opened a fresh line of inquiry established a fresh perspective on a familiar topic or settled a question that engaged the interest of experts     The Humanistic Background of Science Philipp Frank,2021-10-01 Philipp Frank 1884 1966 was an influential philosopher of science public intellectual and Harvard educator whose last book The Humanistic Background of Science is finally available Never published in his lifetime this original manuscript has been edited and introduced to highlight Frank s remarkable but little known insights about the nature of modern science insights that rival those of Karl Popper and Frank s colleagues Thomas Kuhn and James Bryant Conant As a leading exponent of logical empiricism and a member of the famous Vienna Circle Frank intended his book to provide an accessible engaging introduction to the philosophy of science and its cultural significance The book is steadfastly true to science to aspirations of peace unity and human flourishing after World War II and to the pragmatic philosophies of

Charles S Peirce William James and John Dewey that Frank embraced in his new American home Amidst the many recent surveys and retrospective analyses of midcentury philosophy of science *The Humanistic Background of Science* offers an original first hand view of Frank's post European life and of intellectual dramas then unfolding in Chicago New York City and Boston

**Contemporary Issues in Islam and Science** Muzaffar Iqbal, 2017-05-15 The articles selected for this volume explore emergent issues in the contemporary relationship between Islam and science and present studies of eight major voices in the discourse Also included is a section on the operationalization of Islamic science in the modern world and a section on studies in traditional Islamic cosmology

**Space--time--matter** Hermann Weyl, 1922 [Determinations](#), 1969

**Living without God: A Multicultural Spectrum of Atheism** Sanjit Chakraborty, Anway Mukhopadhyay, 2022-11-16 This book deals with the intricate issue of approaching atheism methodologically as well as conceptually from the perspective of cultural pluralism What does atheism mean in different cultural contexts Can this term be applied appropriately to different religious discourses which conceptualize God gods Goddess goddesses and also godlessness in hugely divergent ways Is my God the same as yours If not then how can your atheism be the same as mine In other words this volume raises the question Is it not high time that we proposed a comparative study of atheism's alongside that of religions rather than believing that atheism is centered in the Western experience Apart from answering these questions the book highlights the much needed focus on the philosophical negotiations between atheism theism and agnosticism The fine chapters collected here present pluralist negotiations with the notion of atheism and its ethical theological literary and scientific corollaries Previously published in *Sophia* Volume 60 issue 3 September 2021 Chapters Religious Conversion and Loss of Faith Cases of Personal Paradigm Shift and On Being an Infidel are available open access under a Creative Commons Attribution 4.0 International License via link [springer.com](https://www.springer.com)

*Sustainable Development of Business 4.0* Elena G. Popkova, 2025-06-28 This second volume is devoted to the disclosure of the peculiarities of sustainable development of business 4.0 as a subject of the digital economy It systematizes the components of sustainable development of business 4.0 in the digital economy markets The key areas of sustainable development management in business 4.0 in the digital economy markets are identified Corporate environmental responsibility in support of sustainable development of business 4.0 in the digital economy markets is considered The international experience of sustainable development of business 4.0 in the digital economy markets is highlighted Recommendations for the sustainable development of business 4.0 in the digital economy of the Decade of Action are proposed

[African American Philosophers and Philosophy](#) Stephen Ferguson II, John McClendon III, 2019-06-13 This book presents the first introduction to African American academic philosophers exploring their concepts and ideas and revealing the critical part they have played in the formation of philosophy in the USA The book begins with the early years of educational attainment by African American philosophers in the 1860s To demonstrate the impact of their philosophical work on general problems in the discipline chapters are broken down into four major areas of study Axiology Social Science

Philosophy of Religion and Philosophy of Science Providing personal narratives on individual philosophers and examining the work of figures such as H T Johnson William D Johnson Joyce Mitchell Cooke Adrian Piper William R Jones Roy D Morrison Eugene C Holmes and William A Banner the book challenges the myth that philosophy is exclusively a white academic discipline Packed with examples of struggles and triumphs this engaging introduction is a much needed approach to studying philosophy today

**The Philosophy of Nature** Andrew G. Van Melsen, 2022-04-19 This book offers a fresh approach to the problem of the philosophy of nature Written by a specialist whose competence is unquestionable the book aims at simplicity without sacrificing profundity The important problems raised by modern science with respect to the philosophy of nature are treated in such a way as to be understandable even to those whose knowledge of physical science is rather limited Careful considerations is given to historical factors which have in the past so often led to confusion of philosophy and science and which even in the present time remain a source of conflict between scientist and philosophers

**The God of Covenant and Creation** Larry S. Chapp, 2013-05-01 According to Larry Chapp theology is left with two dire options in the aftermath of naturalism s apparent cultural triumph provide modernity with an intellectually cogent theological vision or perish along with that same culture in the wasteland of our nihilism Chapp s important book is grounds for hope that theology may live to see another day and that the pervasive nihilism may not have the last word He correctly diagnoses the intellectual and cultural dangers posed by so called scientific naturalism lifting the lid on its alleged metaphysical neutrality and exposing this naturalism for what it fundamentally is a bad theology which doesn t know itself And more importantly still he restores theology to its proper cosmological scope Not only does creation become intellectually compelling in Chapp s deft hands it elicits wonder and praise for its Creator and restores what is human in us This is a hopeful development indeed and a sign of an indispensable book Michael Hanby on back cover
