Quarterly Colorado School Of Mines Volume 51:

Quarterly of the Colorado School of Mines ,1926 *Catalog of Books and Reports in the Bureau of Mines Technical Library, Pittsburgh, Pa* United States. Bureau of Mines. Technical Library, Pittsburgh,1968 **Rock Mechanics as a Multidisciplinary Science** Jean-Claude Roegiers,2020-12-18 Papers in the proceedings of the 32nd U S Symposium on Rock Mechanics were solicited to address the theme of Rock Mechanics as a Multidisciplinary Science The major goal was to assemble scientists and practitioners from various fields with interrelated interests in rock mechanics to share their common problems and approaches The proceedings include three papers related to a special session on Lunar Rock Mechanics as well as 121 technical papers covering areas such as field observations in situ stresses instrumentation measurement techniques fracturing rock properties dynamics seismicity modelling laboratory testing discontinuities fluid flow design wellbore stability and analysis **Bulletin** ,1938 Geologic Literature on North America ,1917 **Bulletin of the United States Geological Survey** Geological Survey (U.S.),1917 *High-Pressure Shock Compression of Solids II* Lee Davison,Dennis E. Grady,Mohsen Shahinpoor,2012-12-06 This volume concerns the fracture and fragmentation of solid materials that occurs when they are subjected to extremes of stress applied at the highest possible rates The plan for the volume is to address experimental theoretical and computational aspects of high rate dynamic fracture and fragmentation with emphasis on recent work We begin with several chapters in which the emphasis falls on experimental methods and observations These chapters address both macroscopic responses and the microscopic cause of these responses This is followed by several chapters emphasizing modeling the physical explanation and mathematical representation of the observations Some of the models are deterministic while others focus on the stochastic aspects of the observations Often the overall objective of investigation of dynamic fracture and fragmentation phenomena is provision of a means for predicting the entire course of an event that begins with a stimulus such as an impact and proceeds through a complicated deformation and fracture process that results in disintegration of the body and formation of a rapidly expanding cloud of debris fragments Analysis of this event usually involves development of a continuum theory and computer code that captures the experimental observations by incorporating models of the important phenomena into a comprehensive description of the deformation and fracture process It is to this task that the work of the last few chapters is devoted **Rock Mechanics in Productivity and Protection** C. H. Dowding,Madan M. Singh,1984 *Extractives, Manufacturing, and Services* David O. Whitten,1997-04-22 The second volume in the Handbook of American Business History series this book offers concise histories of extractive manufacturing and service industries as well as extensive bibliographic essays pointing to the leading sources on each industry and bibliographic checklists Supplementing other bibliographic materials in business history this volume provides researchers with a much needed path through the vast array of material available in the library and on the Internet Indicating which resources to check and which to bypass the book is a guide to a sometimes overwhelming amount of information Each of the

book's chapters provide a concise industry history beginning with the industry's rise to importance in the U S and continuing to the present. The bibliographic essays provide a narrative outline of the leading sources published or made available in archives, libraries or museum collections since 1971 when Lovett's American Economic and Business History Information Sources was published. Each discussion concludes with a bibliographic checklist of the titles mentioned in the essay as well as other titles. In a rapidly expanding information society, researchers, teachers and students may be easily overwhelmed by the exhaustive material available in print and electronically. What is useful and what can be ignored is a strategic question and few know where to begin. This book provides a guide.
