Transforming Borders Alejandra C.

Elenes,2010-11-15 Transforming Borders Chicana o Popular Culture and Pedagogy contributes to transformative pedagogies scholarship by adding the voices of Chicana feminist pedagogies epistemologies and ontologies C Alejandra Elenes develops her conceptualizations of border transformative pedagogies by linking the relationship between cultural practices knowledge and teaching in everyday life She analyzes Chicana feminist cultural workers educational actors re imagining three Mexican figures La Llorona the weeping woman the Virgen of Guadalupe and Malintzin Malinche as epistemological and pedagogical meanings The three figures represent multiple meanings traditional views on femininity religion and nationalist views on women yet at the same time feminists have re imagined these three figures and developed counter narratives that can offer alternatives to the traditional meanings In developing border transformative pedagogies Elenes looks at the significance of historical events such as the creation of the Mexico U S border to understand the experiences of people of Mexican descent in the United States She also examines oral histories of the legend of La Llorona in the Southwest historical documents on the Spanish conquest of Mexico and Chicana artists such as Ester Hernandez Yolanda Lopez Consuelo Jimenez Underwood and Alma Lopez re imagining of the Virgen of Guadalupe The conflicts over the meanings of the three figures can help us understand how Chicanas have used their voices to counter economic and gender inequalities and how pedagogical practices show that cultural productions are sites where forms of domination can be contested and recreated in ways that allow for the creation of alternative identities and subjectivities

Intersectionality and Urban Education Carl A. Grant, Elisabeth

Zwier,2014-08-01 In urban education urban is a floating signifier that is imbued with meaning positive or negative by its users Urban can be used to refer to both the geographical context of a city and a sense of less than most often in relation to race and or socioeconomic status Watson 2011 For Noblit and Pink 2007 Urban rather is a generalization as much about geography as it is about the idea that urban centers have problems problems of too many people too much poverty too much crime and violence and ultimately too little hope p xv Recently urban education scholars such as Anyon 2005 Pink and Noblit 2007 Blanchett Klinger and Harry 2009 and Lipman 2013 have elucidated the social construction of oppression and privilege for urban students teachers schools families and communities using intersectionality theories Building on their work we see the need for an edited collection that would look across the different realms of urban education theorizing identity markers in urban education education in urban schools and communities thinking intersectionally in teacher education higher education educational policies urban spaces seeking to better understand each topic using an intersectional lens Such a collection might serve to conceptually frame or provide methodological tools or act as a reference point for scholars and educators who are trying to address urban educational issues in light of identities and power Secondly we argue that education questions and or problems beg to be conceptualized and analyzed through more than one identity axis Policies and practices that do not take into account urban students intertwining identity markers risk reproducing patterns of privilege and oppression

perpetuating stereotypes and failing at the task we care most deeply about supporting all students learning across a holistic range of academic personal and justice oriented outcomes Can educational policies and practices address the social justice issues faced in urban schools and communities today We argue that doing intersectional research and implementing educational policies and practices guided by these frameworks can help improve the fit Particular attention needs to be paid to intersectionality as a lens for educational theory policy and practice As urban educators we would be wise to consider the intertwining of these identity axes in order to better analyze educational issues and engage in teaching learning research and policymaking that are better tuned to the needs of diverse students families and communities

Young People, Border Spaces and Revolutionary Imaginations Stuart Aitken, Fernando Bosco, Thomas Herman, Kate Swanson, 2013-12-16 Drawing from discussions that pulled together child researchers working near the borders of Mexico the United States and Canada this book explores how material and metaphoric borders give way to young people's experimentations with cultural social and political change The contributors highlight the capacities of children to revolutionize thought and practice through creative reimagining of the boundaries borders events circumstances and familial relations that affect their everyday lives The first section in different ways highlights borders and movements through them as a bricolage of images symbols tensions and joys In the second section the idea of a portable border is explored in three chapters that consider a migrants lifecourse citizenship and political activism respectively The last section of the book brings together three chapters that uncover how youth resist confront and transform the borders that envelop their lives By weaving narratives pertaining to young people's creative stories transnational migrations personal identities pen pal programs masculinities intergenerational change border crossings political activism and addictions the contributors in toto raise the idea of young people taking bounded and embodied events places and institutions and moving them towards something emancipatory sin fronteras without borders This book was published as a special issue of Children's Geographies

Handbook of Cultural Politics and Education, 2010-01-01 In academia the effects of the cultural turn have been felt deeply In everyday life tenets from cultural politics have influenced how people behave or regard their options for action such as the reconfiguration of social movements protests and praxis in general Many authors writing in this field are known for their scholarship and social activism both of which are arguably guided by principles of cultural politics about the nature of representation and the deployment of power in political discourses The Handbook of Cultural Politics and Education is less an attempt to standardize contemporary educational scholarship and more a collection that engages the problems and promises of recent themes in social and cultural thought which require our attention and demand a response In other words it opens doors to questions rather than convenient answers to difficult educational dilemmas The Handbook is part of the appraisal of an opening created by interdisciplinary writings on such themes as representation civil society cultural struggle subjectivity and media within the context of education Indeed cultural politics troubles traditional frameworks in search of critical explanations concerning

education's place within society. The contributions in the collection support this endeavor. **Fragmented Lives, Assembled Parts** Alejandro Lugo, 2009-09-15 Southwest Book Award Border Regional Library Association 2008 Association of Latina and Latino Anthropologists Book Award 2009 Established in 1659 as Mision de Nuestra Señora de Guadalupe de los Mansos del Paso del Norte Ciudad Juárez is the oldest colonial settlement on the U.S.-Mexico border and one of the largest industrialized border cities in the world. Since the days of its founding, Juárez has been marked by different forms of conquest and the quest for wealth as an elaborate matrix of gender, class, and ethnic hierarchies struggled for dominance. Juxtaposing the early Spanish invasions of the region with the arrival of late twentieth-century industrial conquistadors, *Fragmented Lives, Assembled Parts* documents the consequences of imperial history through in-depth ethnographic studies of working-class factory life. By comparing the social and human consequences of recent globalism with the region's pioneer era, Alejandro Lugo demonstrates the ways in which class mobilization is itself constantly being unmade at both the international and personal levels for border workers. Both an inside account of maquiladora practices and a rich social history, this is an interdisciplinary survey of the legacies, tropes, economic systems, and gender-based inequalities reflected in a unique cultural landscape. Through a framework of theoretical conceptualizations applied to a range of facets from multiracial mestizo populations to the notions of border crossings and inspections, as well as the recent brutal killings of working-class women in Ciudad Juárez, *Fragmented Lives, Assembled Parts* provides a critical understanding of the effect of transnational corporations on contemporary Mexico, calling for official recognition of the desperate need for improved working and living conditions within this community.

Youth Moves Nadine Dolby, Fazal Rizvi, 2008-03-25 This collection of original essays focuses attention on the actual practices of twenty-first-century youth in the brave new world of globalization, addressing the possibilities and dangers of young people's transnational commodified identities.

Transnational Encounters Alejandro L. Madrid, 2011-09-29 Through the study of a large variety of musical practices from the U.S.-Mexico border, *Transnational Encounters* seeks to provide a new perspective on the complex character of this geographic area. By focusing not only on norteña, banda, or conjunto musics, the most stereotypical musical traditions among Hispanics in the area, but also engaging a number of musical practices that have often been neglected in the study of this border's history and culture—indigenous musics, African American musical traditions, pop musics—the authors provide a glance into the diversity of ethnic groups that have encountered each other throughout the area's history. Against common misconceptions about the U.S.-Mexico border as a predominant Mexican area, this book argues that it is diversity, not homogeneity, which characterizes it. From a wide variety of disciplinary and multidisciplinary enunciations, these essays explore the transnational connections that inform these musical cultures while keeping an eye on their powerful local significance in an attempt to redefine notions like border, nation, migration, diaspora, etc. Looking at music and its performative power through the looking glass of cultural criticism allows this book to contribute to larger intellectual concerns and help redefine the field of U.S.-Mexico border studies beyond

the North South and American Mexican dichotomies Furthermore the essays in this book problematize some of the widespread misconceptions about U S Mexico border history and culture in the current debate about immigration
