Creating Connections in Teaching and Learning Lindy Abawi, Joan Conway, Robyn Henderson, 2011-12-01 This book explores the wide range of contexts in which research into creating connections in learning and teaching may take place Creating connections can encompass making links crossing divides forming relationships building frameworks and generating new knowledge The cognitive cultural social emotional and or physical aspects of understanding meaning making motivating acting researching and evaluating are explored as constituent forms of creativity in relation to such connections From this exploration the authors identify varied connective contexts and means which include the learner the educator the organisation and the relevant community The crossing of divides forming learner educator relationships bringing together

diverse groups of learners establishing networks and partnerships among educators and establishing links between organisations and communities are all considered as connections which can be created by and within the learning and teaching dynamic. By examining the factors which help to facilitate and or restrict the possibilities for creating connections in educational contexts, implications for and outcomes of learning and or teaching arise from the connections created. The final chapter of this book will explicate the realisations that have emerged for educators and researchers working to create connections. These offer suggestions for future directions and enunciate what and how connections might contribute to both educational institutions and the broader society.

from professionals in the field of service innovation *School Peer Review for Educational Improvement and Accountability* David Godfrey,2020-09-03 This book explores how peer reviews are used in school improvement accountability and education system reform Importantly these issues are studied through numerous international cases and new empirical evidence This volume also identifies and describes barriers and facilitators to the development use sustainability and expansion of school peer review School peer reviews are a form of internal evaluation driven by schools themselves rather than externally imposed such as with school inspections Schools collaborate with other schools in networks collect data through self evaluation and in school review visits They provide feedback challenge and support to each other Despite the increased use of school peer review in system reform and school improvement very little research has been conducted on this model and there is a dearth of literature that looks at the phenomenon internationally This book fills this gap and will be an invaluable source for academics in school leadership and educational evaluation and accountability as well as those working at the level of executive leadership in school networks NGOs and in government policy making *The Making of Australia's Gold Coast* Alan J.
