## **Quest Canadas Search For Arctic Oil:**

**Quest** Tom Kennedy, 1988 History of exploration for oil and gas in the Canadian arctic islands *Breaking Ice for Arctic Oil* Ross Coen, 2012-04-15 In 1969 an icebreaking tanker the SS Manhattan was commissioned by Humble Oil to transit the Northwest Passage in order to test the logistical and economic feasibility of an all marine transportation system for Alaska North Slope crude oil Proposed as an alternative to the Trans Alaska Pipeline the Manhattan made two voyages to the North American Arctic and collected volumes of scientific data on ice conditions and the behavior of ships in ice Although the Manhattan successfully navigated the Northwest Passage closing a five hundred year chapter of Arctic exploration by becoming the first commercial vessel to do so the expedition ultimately demonstrated the impracticality of moving crude oil using icebreaking ships *Breaking Ice for Arctic Oil* details this historic voyage establishing its significant impact on the future of marine traffic and resource development in the Arctic and setting the stage for the current oil crisis **Competing**

**Arctic Futures** Nina Wormbs, 2018-08-06 This edited collection explores how narratives about the future of the Arctic have been produced historically up until the present day The contemporary deterministic and monolithic narrative is shown to be only one of several possible ways forward This book problematizes the dominant prediction that there will be increased shipping and resource extraction as the ice melts and shows how this seemingly inevitable future has consequences for the action that can be taken in the present This collection looks to historical projections about the future of the Arctic evaluating why some voices have been heard and championed while others remain marginalised It questions how these historical perspectives have shaped resource allocation and governance structures to understand the forces behind change in the Arctic region Considering the history of individuals and institutions their political and economic networks and their perceived power the essays in this collection offer new perspectives on how the future of the Arctic has been produced and communicated **Developing Alberta's Oil Sands** Paul Anthony Chastko, 2004 Alberta's oil sands represent a vast and

untapped oil reserve that could reasonably supply all of Canada's energy needs for the next 475 years With an estimated 300 billion barrels of recoverable oil at stake the quest to develop this natural resource has been undertaken by many powerful actors both nationally and internationally Using research that integrates the economic political scientific and business factors that have been influential in discovering and developing the sands this book provides a comprehensive history of the oil sands project and a window on the nature of the complex relationships between industry government and transnational players This book is the first comprehensive volume that examines the origins and development of the oil sands industry over the last century **Remote Sensing of Sea Ice and Icebergs** Simon Haykin, Edward O. Lewis, R. Keith Raney, James R. Rossiter, 1994-10-28 Describes the latest remote sensing technologies used to detect ice hazards in the marine environment map surface currents sea state and surface winds study ice dynamics over ice transportation oil spill countermeasures climate changes and ice reconnaissance Includes such technologies as acoustic sensing ice thickness measurement passive
