Quest For Perfection The Drive To Breed Better Human Beings:

Quest for Perfection Gina Maranto, 1996 In *Quest for Perfection* Gina Maranto traces the history of society's attempts to control human destiny by regulating birth outcomes Drawing together material from the fields of animal behavior paleontology anthropology embryology genetics and reproductive medicine Maranto provides a riveting account of how the perfecting impulse has colored Western social and political thought and history More importantly she explores how the development of birth technologies from artificial insemination in the 1800s to in vitro fertilization in the 1970s was carried out by scientists who foresaw and in many cases championed the eugenical potential of manipulating sperm eggs and embryos Maranto reveals that eugenics rightly reviled for the crimes committed in its name in Nazi Germany and elsewhere is far from a dead enterprise Today in treating couples for infertility medicine has edged closer than ever to the made to order baby With the knowledge gained from the massive worldwide effort to map the human chromosome the Human Genome Project scientists will gain greater power to dictate the essential makeup of future children Promoted on therapeutic grounds the enterprise of assisted reproduction has raised exhilarating and frightening prospects from infants born without debilitating defects and inherited diseases to the likelihood that individuals and governments will decide which embryos are worthy of being brought to term based not on the sanctity of life but upon parental whim or societal fiat *Quest for Perfection* is an important contribution to the debate over the ethical and political implications of attempts to direct our own evolution

Anatomy of Spirituality: Portrait of the Soul Chander Behl, 2015-04-27 The domain of spirituality separated from its theological overburden believes in the existence of a spiritual self presumed to be distinctly separate from the psychological self The spiritual eternal self also known as the soul or spirit sometimes supported by an overarching Spirit is asserted to be operating behind the ephemeral self This book takes a contrarian stance it argues that the premise of the soul concept is obtained through the magic of language maintained through the marvel of the brain's biochemistry and sustained through the mirage of the psychological juggernauts of the brain The magic the marvel and the mirage together bring about subtle shifts as the linguistic brain suppresses many psychological details habitually applies mental templates such as inversions and dichotomies and enhances its language by coining religious and spiritual metaphors The consequence of these changes is that the usual flickering self begins to be impressed by itself believing it is buttressed by something transcendental and eternal within the soul or the spirit The self although indoctrinated during its formative years also begins to assimilate and accept the opinion that the overwhelming weight of religious doctrines and dogmas the overburden signifies as the legitimate proof for the eternal soul

Women in Biotechnology Francesca Molfino, Flavia Zucco, 2008-08-05 Johannes Klumpers Biotechnologies such as genetic engineering cloning and biodiversity raise many legal and ethical concerns so it is important that people understand these issues and feel able to express their opinions This is why the European Commission has been for a number of years supporting actions to improve communication among scientists in these diverse areas The project Women in Biotechnology WONBIT financed under the 6th Framework programme of the

European Commission is an excellent example of what can be done to target opinion formers such as scientists economists and lawyers in bottom up activities and to encourage a debate on gender issues triggered by developments in the life sciences WONBIT gave rise to a successful international conference highlighting the importance of adopting good practices and ethical considerations in parallel with the rapid pace of progress in biotechnology from a woman s point of view In particular the conference addressed women in decision making positions in biotechnology with specific reference to scientific excellence social competencies and management qualities as well as issues relating to environment society and the younger generation But it did not stop there a key part of the conference was dedicated to stimulating public debate among non specialists which has led to a number of recommendations to policy makers on better communication in biotechnology on taking better account of the gender aspects of research and on involving more women in the decision making process that surrounds developments in biotechnology
