## **Quest For Quality Sixteen Forms Of Heresy In Higher Education:**

*The Quest for Quality* Sinclair Goodlad, 1995 Sinclair Goodlad asks why is it so difficult to define quality what are the key issues that should be addressed and what action can and should be taken in the absence of any agreed definition of quality In so doing he examines a number of issues concerning the basic stuff of higher education curriculum teaching methods research college organization that go deeper than the administrative shell that is the usual focus of the quality debate At the same time he offers examples and case studies in which broad issues regarding good practice are earthed in particularities Throughout his provocative notion of heresies offers grist for discussion wherever the aims purposes and practices of higher education are being examined The Quest for Quality sets out the basis for a systematic approach to higher education and is an important book for anyone who has a serious interest in what modern universities should be and do Quality And Power In Higher Education Morley, Louise, 2003-04-01 Quality and Power in Higher Education covers a wide range of issues including the policy contexts new managerialism the costs of quality assurance collegiality peer review gender and equity implications occupational stress commodification and consumer values in higher education performance league tables benchmarking increasing workloads and the long term effects on the academy *Enhancing Quality in Higher Education* Ray Land, George Gordon, 2013-06-19 Interest in the quality of higher education provision has been steadily increasing over the last twenty years This has been driven largely by the international creation of explicit policies and reporting requirements to review audit and evaluate provision The interest is associated in many countries with the granting by governments of greater autonomy to higher education institutions This crucially comes bound with increased requirements for accountability in the exercise of such power Enhancing provision promoting innovation cultivating exploration and adopting information led approaches to practice are at the very heart of higher education As such quality enhancement comes in many guises and is under constant scrutiny Enhancing Quality in Higher Education looks critically at recent developments in higher education taking snapshots of changing practices around the world and analysing the varied theoretical perspectives of quality enhancement that are emerging The opening section draws upon this theoretical base whilst the second section contextualises it through the analysis of a diverse range of international case studies The concluding section considers future prospects for the enhancement agenda in the light of the international pressures facing all systems of higher education in the future Policy will inevitably be shaped by the historical contexts within which national systems are located The book draws on a wide range of international case studies examined by a host of contributing experts The movement towards quality enhancement can be seen as stimulating action at the grassroots of the academy to self generate improvement It is a counter to the prevalent view that change in higher education is essentially about the institutional response to increasing societal pressure and state control and as such is a welcome contribution to the literature This comprehensive volume is essential reading for anyone involved in higher education and educational policy **Higher**

**Education: Handbook of Theory and Research** J.C. Smart, 2001-06-30 Published annually since 1985 the Handbook series provides a compendium of thorough and integrative literature reviews on a diverse array of topics of interest to the higher education scholarly and policy communities

**Learning Together** Nancy Falchikov, 2003-08-27 The number of students in higher education has expanded dramatically in recent years but funding has not kept pace with this growth The result is less contact time for lecturers and their students and corresponding worries about how the quality of teaching and learning can be improved Peer tutoring is one method which is growing in popularity and has already proved successful in a number of countries This book provides an introduction to the methods and practice of peer tutoring focusing on how to set up schemes and how to cope with common problems It discusses the theory behind this form of learning and the beneficial effects associated with it Summaries are included at the end of each chapter

**International Simulation and Gaming Yearbook** Peter Saunders, Benita Cox, 2014-03-18 This text brings together topical contributions from figures in the field of games and simulations representing the current international thinking and best practice

**Benchmarking and Threshold Standards in Higher Education** Michael Armstrong, Sally Brown, Helen Smith, 2014-05-12 The specification of standards in higher education has long been the subject of international debate This text covers the rationales operational issues and perspectives on benchmarking and standards from international viewpoints

**Mentoring and Tutoring by Students** Sinclair Goodlad, 2013-04-15 Schemes involving students as tutors are in place in many countries This work aims to stimulate and encourage the use of an educational technique through which teachers in tertiary and secondary education can amplify and extend their influence through the deployment of students as tutors

**Teaching with Integrity** Bruce Macfarlane, 2004 While many books focus on the broader socially ethical topics of widening participation and promoting equal opportunities this text focuses specifically on the lecturer's professional responsibilities It covers everyday real life moral dilemmas and encourages a practical reflective approach

**The RoutledgeFalmer Reader in Higher Education** Malcolm Tight, 2004 All those with an interest in higher education and higher education research will find this comprehensive collection of the past two decades most influential readings on the topic an absolutely essential companion

**Innovating University Education** Jude Ssempebwa, Peter Neema-Abooki, 2017-09-26 Makerere University started in 1922 as a humble technical school enrolling 14 day students of Carpentry Building and Mechanics Nine decades later the University has made giant strides enrolling over 35 000 students in over 145 study programmes hosted by nine colleges spread across various campuses As one of the first higher education institutions in East and Central Africa the university has had to contend with a multiplicity of issues including relevance curricula reform community engagement and graduate employability access equity massification and quality assurance national politics regulation institutional autonomy and academic freedom funding and financial management student politics and activism staff unionisation management and brain drain physical resources expansion utilisation and maintenance liberalisation privatisation commercialisation and internationalisation Information and

Communication Technology ICT and institutional leadership and integrity Today the University stands out proudly as a hallmark of innovation and excellence in teaching research and community engagement notwithstanding the challenges it has experienced over the years As it celebrates 90 years the higher education scholarly and policy fraternity take the opportunity to honour and continue the University's tradition of scholarship and innovation through contributing ideas for dealing with some of the challenges that the University and similar institutions are contending with Although studies of Makerere University have been included it must be understood that this book is not necessarily about the University Additional studies have been drawn from Botswana Ethiopia Ghana Kenya Malawi Nigeria Tanzania and other institutions in Uganda

*EBOOK: Educational Development* Ray Land, 2004-11-16 What do educational developers see as the main issues to be tackled within their work How does the educational context and culture in which they work affect the practice of educational developers How do educational developers perceive change occurring within higher education organisations In higher education institutions worldwide issues relating to quality in teaching and learning have gained prominence over the last two decades as student numbers and the need to be publicly accountable have increased During this time a sizeable community of educational developers has emerged whose work and research focuses on the enhancement of the student experience in higher education A significant issue for these developers is how change can be effected in organisations with well established academic cultures and practices beset by many other priorities and pressures This first book length analysis of developers as a community of practice illustrates in their own words the issues they face their differing orientations to development given their differing organisational cultures and how they see their institutional role What emerges is the contested notion of development itself and a tribe of developers who though fragmented offer a rich variation in their discourse identity and practice Drawing upon developers own voices the book offers a lively and accessible narrative approach to this rapidly evolving area It is a useful guide to help individual developers compare their own practice with that of others and development teams to map the effectiveness of their own centre's provision Educational Development is essential reading for educational developers teaching and learning co ordinators and teaching fellows as well as senior managers with remits for academic development and directors of quality assurance It is also of interest to those in higher education who are concerned with bringing about organisational or cultural change

Resources in Education ,1998

**Productivity** ,2003 Higher Education: A Critical Business Ronald Barnett, 1997-06-16 Higher Education A Critical Business is a bold statement about higher education in the modern age It continues Ronald Barnett's thinking of his earlier books but offers a completely new set of ideas in a challenging but engaging argument A defining concept of the Western university is that of critical thinking but that idea is completely inadequate for the changing and unknowable world facing graduates Instead we have to displace the idea of critical thinking with the much broader idea of critical being In this idea students reflect critically on knowledge but they also develop their powers of critical self reflection and critical action This

critique is transformatory An education for critical being calls for a new approach to the process of higher education It also has implications for the organization and management of universities and for the relationship of universities to the wider worlds of work professionalism and intellectual life Barnett reviews what the academy customarily means when it talks about critical thought explains why that talk is so often shallow and pessimistic and holds up for contemplation a positive conception of a very wide self formed through education He breathes completely new life into the dead notion of academic as intellectual Professor Sheldon Rothblatt University of California Berkeley and Royal Institute of Technology Sweden Anyone interested in understanding how we might develop universities and higher education for the modern world should read this important book

Improving Quality in Education Dr Colin C Bayne-Jardine, Charles Hoy, Dr Margaret Wood, 2005-08-11 Explores the best acknowledged ways to maintain and improve school education in the UK Highlights ways for achieving required standards such as DfEE standards Explores the need to find the right balance between external inspection and internal self examination as methods for identifying sustainable improvements in schools While predominantly directed at quality in schools the book looks outward to quality assurance routes used in FE HE colleges It provides a practical opportunity for assessing the effectiveness of methods of quality measurement and shows that inspection is a necessary but not solely sufficient condition to develop quality

**Leadership for Quality and Accountability in Education** Mark Brundrett, Christopher Rhodes, 2010-10-04 The study of educational leadership makes little sense unless it is in relation to who the leaders are how they are leading what is being led and with what effect Based on the premise that learning is at the heart of leadership and that leaders themselves should be learners the Leadership for Learning series explores the connections between educational leadership policy curriculum human resources and accountability Each book in the series approaches its subject matter through a three fold structure of process themes and impact Series Editors Clive Dimmock Mark Brundrett and Les Bell What is the role of leadership in developing strategies that enhance learning outcomes Leadership for Quality and Accountability in Education addresses the interconnected issues of quality and accountability in the education system and provides a coherent framework within which these issues can be analysed The authors outline the significance of promoting quality in all educational establishments and go on to discuss why quality and accountability have become so essential to the framework of leadership in education how quality and accountability have been utilised on a national and international scale and what the defining characteristics of these terms are The book is divided into three sections which explore three linked key aspects Part I focuses on the concept and nature of quality and accountability and the process of developing a culture of quality Part II addresses the issues of managing staff and resources leadership for high quality teaching and learning and relationships with stakeholders Part III considers the impact and prospect of quality and accountability including internal evaluation and external inspection The book will appeal to educational leaders and managers advisors and inspectors and academic researchers It will also be of particular relevance to Masters and doctoral

degree students specialising in school leadership and management      *The Academic Citizen* Bruce Macfarlane,2006-09-27  
 With increasing focus on excellence in research and teaching the service role of the individual academic is often neglected  
 This book calls for greater recognition of this important aspect of academic life highlighting the importance of mentoring  
 committee work and pastoral care in the daily running of universities Drawing from extensive examples from models around  
 the world *The Academic Citizen* points to the benefits of effective communication with colleagues in the faculty across the  
 university and in corresponding faculties across the world as well as those in maintaining positive associations with the wider  
 world      **Understanding Pedagogy** Peter Mortimore,1999-06-18 This presents a useful and thoughtful overview of the  
 ways in which thinking about pedagogy has changed in research and practice Dr A Loveless University of Brighton I  
 commend it to anyone with a concern for teaching in any of its forms *School Leadership and Management* In this  
 controversial book Peter Mortimore and a team from London University's Institute of Education explore what is meant by the  
 term pedagogy They investigate its context and describe some of the recent shifts in thinking about it Pedagogy affects the  
 way hundreds of thousands of learners of different ages and stages are taught Yet until recently it has been a neglected topic  
 Instead of having access to systematic evidence about its impact innovative teachers have been guided only by ideological  
 positions folk wisdom and fashionable enthusiasms for particular approaches The contributors to this book all with  
 professional backgrounds as teachers have scoured the literature to examine the impact of different pedagogies on nursery  
 primary and secondary schools as well as on further education colleges universities and the workplace The book also  
 considers learners with special educational needs and the implications of using information and communications technology  
 The authors open up debates on the following key topics how best to define pedagogy what we know about the impact of  
 particular pedagogies on learning what is still not known whether there are important differences between the pedagogy  
 used for learners of different ages and stages whether any lessons for the future can be gleaned from current practice This  
 important book is invaluable reading for interested teachers working with learners of all ages The issues raised affect the  
 way we think about the teaching of the under fives through to university students and continuing lifelong learners It is  
 essential reading for policymakers practitioners and tutors      **Creative Knowledge Environments** Sven Hemlin,Carl  
 Martin Allwood,Ben R. Martin,2004-01-01 Although there is an ever increasing demand for new technology and innovations  
 in the economy and society in general we currently know little about the conditions for stimulating creativity in relation to  
 research and innovative activity This book fills a significant gap in the literature by examining the environmental factors that  
 encourage creative working processes for research and innovation
