Argumentation, Communication, and Fallacies Frans H. van Eemeren, Rob Grootendorst, 2016-07-22 This volume gives a theoretical account of the problem of analyzing and evaluating argumentative discourse After placing argumentation in a communicative perspective and then discussing the fallacies that occur when certain rules of communication are violated the authors offer an alternative to both the linguistically inspired descriptive and logically inspired normative approaches to argumentation The authors characterize argumentation as a complex speech act in a critical discussion aimed at resolving a difference of opinion The various stages of a critical discussion are outlined and the communicative and interactional aspects of the speech acts performed in resolving a simple or complex dispute are discussed After dealing with crucial aspects of analysis and linking the evaluation of argumentative discourse to the analysis the authors identify the fallacies that can occur at various stages of discussion Their general aim is to elucidate their own pragma dialectical perspective on the analysis and evaluation of argumentative discourse bringing together pragmatic insight concerning speech acts and dialectical insight concerning critical discussion

The Cambridge Companion to Aquinas Norman Kretzmann, Eleonore Stump, 1993-05-28 Among the great philosophers of the Middle Ages Aquinas is unique in pursuing two apparently disparate projects On the one hand he developed a philosophical understanding of Christian doctrine in a fully integrated system encompassing all natural and supernatural reality On the other hand he was convinced that Aristotle's philosophy afforded the best available philosophical component of such a system In a relatively brief career Aquinas developed these projects in great detail and with an astonishing degree of success In this volume ten leading scholars introduce all the important aspects of Aquinas thought ranging from its historical background and dependence on Greek Islamic and Jewish philosophy and theology through the metaphysics epistemology and ethics to the philosophical approach to Biblical commentary **Evolutionary Debunking Arguments** Diego E. Machuca, 2022-09-09 Recent years have seen an explosion of interest in evolutionary debunking arguments directed against certain types of belief particularly moral and religious beliefs According to those arguments the evolutionary origins of the cognitive mechanisms that produce the targeted beliefs render these beliefs epistemically unjustified The reason is that natural selection cares for reproduction and survival rather than truth and false beliefs can in principle be as evolutionarily advantageous as true beliefs The present volume brings together fourteen essays that examine evolutionary debunking arguments not only in ethics and philosophy of religion but also in philosophy of mathematics metaphysics and epistemology The essays move forward research on those arguments by shedding fresh light on old problems and proposing new lines of inquiry The book will appeal to scholars and graduate students interested in the possible skeptical implications of evolutionary theory in any of the above domains **Seeker the Role Playing Game** ,

The Posing of Questions A. Wisniewski, 2013-11-27 This book is a study in the logic of questions sometimes called erotetic logic The central topics in erotetic logic have been the structure of questions and the question answer relationship This book doesn't neglect these problems but much of it is focussed on other issues The main subject is the logical analysis of certain relations between questions and the contexts of their appearance And our aim is to elaborate the conceptual apparatus of the inferential approach to the logic of questions Questions are asked for many reasons and for different purposes Yet before a question is asked or posed a questioner must arrive at it In many cases arriving at a question resembles coming to a conclusion there are some premises involved and some inferential thought processes take place If we agree that a conclusion need not be conclusive we may say that sometimes questions can play the role of conclusions But questions can also perform the role of premises we often pass from some initial question to another question In other words there are inferential thought processes we shall call them erotetic inferences in which questions play the roles of conclusions or conclusions and premises The inferential approach to the logic of questions focusses its attention on the analysis of erotetic inferences This book consists of eight chapters

The Humane Perspective John Cottingham, 2024-07-03 The book brings together fourteen essays from the work of John Cottingham on moral philosophy and the philosophy of religion spanning the past fifteen years The papers are closely related in so far as they all deal with the perennial moral and spiritual challenges of human existence and the search for meaning and value in human life As well as being thematically linked they also share a common style and methodology illustrating the distinctive goal that has increasingly informed the author's work in recent years that of promoting a more humane conception of philosophizing While in no way discarding the technical tools of the professional philosopher such as abstract argumentation and analysis whose value and importance are unquestionable this approach is notable for drawing on the full range of resources available to the human mind including those that depend on literary artistic poetic imaginative aesthetic and emotional modes of awareness In contrast to the model of the philosopher as a kind of detached scrutineer the essays exemplify the belief that there is a distinctive and valuable kind of philosophical understanding that requires a more involved and engaged stance The philosophical questions dealt in the volume all fall broadly within the familiar domains of moral philosophy and the philosophy of religion but the reflections offered on these areas of human thought and practice always aim to be sensitive to how morality and religion actually operate in the lives of the human beings involved

Realism, Value, and Transcendental Arguments between Neopragmatism and Analytic Philosophy Sami Pihlström, 2023-05-05 The essays collected in this volume and authored by Sami Pihlström emphasize that our relation to the world we live in and seek to represent and get to know better through our practices of conceptualization and inquiry is irreducibly valuational There is no way of even approaching let alone resolving the philosophical issue of realism without drawing due attention to the ways in which human values are inextricably entangled with even the most purely factual projects of inquiry we engage in This entanglement of the factual and the normative is as explicitly argued in

Chapter 7 but implicitly suggested in all the other chapters as well both pragmatic practice embedded and practice involving and transcendental operating at the level of the necessary conditions for the possibility of our representing and cognizing the world in general The author claims we need to carefully examine the complex relations of realism value and transcendental arguments at the intersection of pragmatism and analytic philosophy This book does so by offering case studies of various important neopragmatists and philosophers close to the pragmatist tradition including Hilary Putnam Nicholas Rescher Joseph Margolis and Ludwig Wittgenstein It appeals to scholars and advanced graduate students focusing on pragmatism and analytic philosophy

Choosing Tomorrow's Children Stephen Wilkinson, 2010-02-18 To what extent should parents be allowed to use reproductive technologies to determine the characteristics of their future children And is there something morally wrong with parents who wish to do this Choosing Tomorrow's Children provides answers to these and related questions In particular the book looks at issues raised by selective reproduction the practice of choosing between different possible future persons by selecting or deselecting for example embryos eggs and sperm Wilkinson offers answers to questions including the following Do children have a right to an open future and if they do what moral constraints does this place upon selective reproduction Should parents be allowed to choose their future children's sex Should we screen out as much disease and disability as possible before birth or would that be an objectionable form of eugenics Is it acceptable to create or select a future person in order to provide lifesaving tissue for an existing relative Is there a moral difference between selecting to avoid disease and selecting to produce an enhanced child Should we allow deaf parents to use reproductive technologies to ensure that they have a deaf child

Debating Equal Pay for All Anders Örtengren, 2020-12-09 This anthology debates the idea of giving all people no matter which profession or position they have and whether they have a job or not the same pay Some contributors argue against equal pay for all some for increased pay equality but not for total pay equality and some argue for equal pay for all There is no common conclusion in the book instead the book aims to encourage reflection as well as further debate on something that is often taken for granted namely differentiated pay by offering a set of various standpoints in the debate backed up with various kinds of arguments Among bases for arguments that are put forward in the book economy practicability and ethics belong to the most frequently occurring ones This book is the first one to be published in the book series Palgrave Debates in Business and Management

Teaching Women Philosophers Ruth Edith Hagengruber, 2024-08-30 This book expands the known canon by presenting arguments and concepts from women philosophers from all periods of the history of philosophy from antiquity to the present day The collaborative collection is an undertaking that emerged from intensive discussions on how to expand the philosophical canon which formed the conclusion of the Libori Summer School 2019 This Libori Summer School the third in a row was held to enhance the study of texts written by women philosophers from Antiquity up to now and intended to give opportunity to young scholars to connect and to build networks Presenting such a collection is even more urgent today

because a diversification of the canon has long been called for Nevertheless to date there is little explicit material available for this purpose To make this book suitable for both academics and students it is structured in such a way that readers can use excerpts and individual chapters from it that suit their needs be it in moral philosophy politics or phenomenology etc Containing chapters on women such as Suor Juana Emilie Du Ch telet and Nisia Floresta and supplemented by contextualization namely by some brief biographical information and by the systematic integration of her argument into the debates of the respective periods this book is an important resource highlighting the achievements and value of women in philosophy and calling for a further diversification of the canon *The Blackwell Dictionary of Western Philosophy* Nicholas Bunnin, Jiyuan Yu, 2008-04-15 The Blackwell Dictionary of Western Philosophy The Blackwell Dictionary of Western Philosophy The style is fresh and engaging and it gives a broad and accurate picture of the western philosophical tradition It is a pleasure to browse in even if one is not looking for an answer to a particular question David Pears Its entries manage to avoid the obscurities of an exaggerated brevity without stretching themselves out as if seeking to embody whole miniature essays In short it presents itself as a model of clarity and clarification Alan Montefiore **The Questions of Jesus in John** Douglas Charles Estes, 2012-10-19 Why do the New Testament gospels depict a Jesus who asks questions almost as often as he gives answers In *The Questions of Jesus in John* Douglas Estes crafts a highly interdisciplinary theory of question asking based on insights from ancient rhetoric and modern erotetics the study of interrogatives in order to investigate the logical and rhetorical purposes of Jesus questions in the Gospel of John While scholarly discussion about Jesus cares more for what he says and not what he asks Estes argues a better understanding of the rhetorical and dialectical roles of questions in ancient narratives sheds a more accurate light on both John s narrative art and Jesus message in the Fourth Gospel
