## **Questioning Geopolitics Political Projects In A Changing World System:**

Questioning Geopolitics Georgi M. Derluguian, Scott L. Greer, 2000-08-30 This volume takes an enlightened step back from the ongoing discussion of globalization. The authors reject the notion that globalization is an analytically useful term. Rather, this volume shows globalization as merely the framework of the current political debate on the future of world power. Some of the many other novel ideas advanced by the authors include the explicit prediction that East Asia is not going to become the center of the world, the contention that the USSR collapsed for the same reasons that nearly brought down the United States in 1973, and the notion that the regional economic networks that are emerging from under the modern states are in fact rather old formations. The articles in the volume are organized around three main themes. Part One explores both the changing patterns of global power from the viewpoint of geopolitics and the Gramscian approach to the study of international relations. Part Two further develops the debate among a number of eminent historians and sociologists, challenging both the apologists for and the opponents of globalization in new and unexpected ways. Part Three traces the emergence of regional economic networks and explores the ambiguous problems of security and identity posed by the old new transborder formations.

**Bourdieu's Secret Admirer in the Caucasus** Georgi M. Derluguian, 2005-07-15 Bourdieu's *Secret Admirer in the Caucasus* is a gripping account of the developmental dynamics involved in the collapse of Soviet socialism. Fusing a narrative of human agency to his critical discussion of structural forces, Georgi M. Derluguian reconstructs from firsthand accounts the life story of Musa Shanib, who from a small town in the Caucasus grew to be a prominent leader in the Chechen revolution. In his examination of Shanib and his keen interest in the sociology of Pierre Bourdieu, Derluguian discerns how and why this dissident intellectual became a nationalist warlord. Exploring globalization, democratization, ethnic identity, and international terrorism, Derluguian contextualizes Shanib's personal trajectory from de-Stalinization through the nationalist rebellions of the 1990s to the recent rise in Islamic militancy. He masterfully reveals not only how external economic and political forces affect the former Soviet republics but how those forces are in turn shaped by the individuals, institutions, ethnicities, and social networks that make up those societies. Drawing on the work of Charles Tilly, Immanuel Wallerstein, and of course Bourdieu, Derluguian's explanation of the recent ethnic wars and terrorist acts in Russia succeeds in illuminating the role of human agency in shaping history.

*The Modern/Colonial/Capitalist World-System in the Twentieth Century* Ramón Grosfoguel, Ana Margarita Cervantes-Rodríguez, 2002-07-30 An important building block for further advancing world system theory, this book considers the theory from the perspectives of global processes and antisystemic movements, feminist theory, and the aftermath of the colonial system. The volume addresses three myths tied to Eurocentric forms of thinking: objectivist and universalist knowledge, the decolonization of the modern world, and developmentalism. All three myths, the authors argue, conceal the continued hierarchical and unequal relations of domination and exploitation between European and Euro-American centers and non-European peripheral regions. In this volume, world

system scholars address these and related aspects of the modern colonial capitalist world system Addressing the myth of universalist knowledge the volume reminds us that our knowledge is situated in the gender class racial and sexual hierarchies of a specific region in the world system while the colonality of power additionally situates our knowledge The volume further argues that the postcolonial era retains the hierarchy of colonialism and the possibility of national development without global structural changes is one of the greatest 20th century myths Taking these perspectives into consideration the contributors examine and help to refine classic world system theory *Images of Gramsci* Andreas Bieler, Adam Morton, 2014-06-03 A comprehensive reassessment of the relevance of Gramsci's theory and practice at the beginning of the twenty first century Whilst commentaries on Antonio Gramsci and arguments surrounding his political and intellectual legacy have proliferated little attention has been hitherto directed to linking the connections and contentions between Political Theory and International Political Economy This volume brings together leading authorities engaged in common debates to produce for the first time a major collection that clarifies addresses and lays bare the manifest connections and contentions within political and international theory surrounding the legacy of Antonio Gramsci In Part I scholars examine various approaches to Gramsci's thought including his methodological principles the specific conception of civil society he offers his writings on war and cultural struggle the spatial dimension of his thinking and his philosophy of history Part II focuses on very new developments in Gramsci scholarship concerning the questioning of contemporary world order This includes reflections on his relevancy to issues of globalising capitalism transformations in the state revolutionary praxis orientalism and empire as well as European regionalism This book was previously published as a special issue of the leading Critical Review of International Social and Political Philosophy CRISPP *Geopolitics* John Agnew, 2004-03-01 Geopolitics identifies and scrutinizes the central features of geopolitics from the sixteenth century to the present The book focuses on five key concepts of the modern geopolitical imagination Visualising the world as a whole The definition of geographical areas as advanced or primitive The notion of the state being the highest form of political organization The pursuit of primacy by competing states The necessity for hierarchy **Mentoring, Methods, and Movements:**
