## ***Is the alcoholism an disease?***

Alcohol dependence is, of course, a serious problem that affects the health of the person who suffers from it in the broadest sense of the word.

Furthermore, it is a problem that affects one of the essential elements of the human being: freedom .

The person who develops alcohol dependence loses his ability to decide whether or not to drink in certain situations, little by little he loses self-control of his own behavior, in short: he loses his freedom.

We can therefore consider it a disease, because it affects the personal balance of those who suffer from it and those around them, and because adequate treatment is necessary to recover from it.

On the other hand, it is not a common disease that can be "cured" by taking certain medications, by means of a surgical operation or by some other common medical procedure.
