Questions Of Consciousness:

Questions of Consciousness Anthony P. Cohen, Nigel Rapport, 2003-12-16 First published in 1995 Routledge is an imprint of Taylor Francis an informa company

Questions of Consciousness Anthony P. Cohen, This book explores the importance of the conscious self and of the conscious collectively in the construction and interpretation of social relations and process

Questions on A Study in Consciousness ,1905

Actual Consciousness Ted Honderich, 2014 What is it for you to be conscious There is no consensus in philosophy or science it has remained a mystery Ted Honderich develops a brand new theory of consciousness according to which perceptual consciousness is external to the perceiver It exists in a subjective physical world dependent on both you and the objective physical world

Integrating Philosophical and Scientific Approaches in Consciousness Research Christopher Gutland, Wenjing Cai, Anthony Vincent Fernandez, 2021-06-29

[What is Consciousness?](#) Amy Kind, Daniel Stoljar, 2023-06-30 What is consciousness and why is it so philosophically and scientifically puzzling For many years philosophers approached this question assuming a standard physicalist framework on which consciousness can be explained by contemporary physics biology neuroscience and cognitive science This book is a debate between two philosophers who are united in their rejection of this kind of standard physicalism but who differ sharply in what lesson to draw from this Amy Kind defends dualism 2 0 a thoroughly modern version of dualism the theory that there are two fundamentally different kinds of things in the world those that are physical and those that are mental decoupled from any religious or non scientific connotations Daniel Stoljar defends non standard physicalism a kind of physicalism different from both the standard version and dualism 2 0 The book presents a cutting edge assessment of the philosophy of consciousness and provides a glimpse at what the future study of this area might bring

Key Features

Outlines the different things people mean by consciousness and provides an account of what consciousness is

Reviews the key arguments for thinking that consciousness is incompatible with physicalism

Explores and provides a defense of contrasting responses to those arguments with a special focus on responses that reject the standard physicalist framework

Provides an account of the basic aims of the science of consciousness

Written in a lively and accessibly style

Includes a comprehensive glossary

[Methodological Issues in Consciousness Research, volume II](#) Axel Cleeremans, 2025-04-16 This Research Topic is the second volume of the Research Topic Methodological Issues in Consciousness Research Please see the first volume here

The simplest and perhaps the first notion of consciousness in the West as a sentience or awareness of internal or external existence was introduced in the Seventeenth century by the English physician Robert Fludd though similar and even more refined notions of consciousness were developed centuries before in Indian philosophy and contemplative wisdom traditions

Because it permeates human existence in so many different ways the study of consciousness is a profoundly interdisciplinary endeavour and engages disciplines such as philosophy including Eastern philosophy cognitive neuroscience anthropology psychiatry and psychopathology and even physics

The study of consciousness may

involve domains as diverse as perceptual awareness cognition and metacognition reasoning executive control theory of mind self sleep and dreaming emotional competence and empathy It concerns both healthy e g aging meditation spiritual experiences and pathological conditions e g epilepsy neglect and locked in syndromes minimally conscious states anesthesia and involves considerations operating at different time scales e g evolution development expertise Today however and despite almost thirty years of concerted interdisciplinary efforts the nature and mechanisms of consciousness remain as elusive as ever Theoretically different conceptual frameworks aimed at characterizing both its functional and phenomenal aspects take sometimes radically different assumptions as their starting point but often fail to make sufficiently precise differential predictions to be falsifiable While most recent views generally consider methods investigating human higher order reflective or access consciousness the theoretical and experimental foundations of primary proto consciousness often remain vague and ignore evolutionary considerations Influential distinctions such as the distinction between phenomenal and access consciousness between pre reflective minimal and the reflective narrative self between graded and all or none processing or even between conscious and unconscious processing all remain unsettled or controversial The field is also rife with methodological challenges and controversies some of which remain largely unsolved Questions such as how to best measure awareness or to how establish its absence issues such as what kind of neuroscientific data would convincingly make it possible to isolate the neural correlates of consciousness or what types of confounds contaminate extant findings challenges such as how to imagine crucial experiments that are sufficiently sensitive to falsify some theoretical proposals all need to be addressed in open interdisciplinary dialogue This Frontiers Research Topic is aimed at stimulating discussion about current methodological issues and trends in consciousness research We welcome theoretical and empirical contributions as well as empirical articles from both experts and young scientists who work in the field of consciousness research Submissions of related hypotheses original research articles case reports perspectives reviews opinions and commentaries are welcome We very much hope that this Frontiers Research Topic will contribute to enhancing our characterization and understanding of the methodological and conceptual challenges associated with the study of human consciousness

The Conscious Code Prof. Rocky Scopelliti, 2023-12-08 In an age where Artificial Intelligence AI evolves at a breakneck pace the boundaries of machine capabilities are constantly being redefined Propelled by advancements in deep learning and related technologies AI is inching ever closer to mimicking human intellect But can it achieve consciousness And if so at what cost to humanity This book delves deep into the multi faceted debate surrounding artificially conscious AI It untangles ethical quandaries philosophical dilemmas technological challenges political considerations and the regulatory landscape By drawing connections between AI research neuroscience and cognitive science the narrative provides a comprehensive understanding of what consciousness might mean in the context of AI As over a thousand AI luminaries globally sound the alarm urging a pause on certain AI developments the book underscores the urgency of its message Recent

incidents have spotlighted AI systems with capabilities so advanced that even their creators grapple to fully grasp or control them It s imperative now more than ever to critically assess the implications of AI consciousness weighing its potential risks against its benefits This book offers both a timely warning and a call to informed action **Consciousness** Susan Blackmore,2013-11-26 Is there a theory that explains the essence of consciousness Or is consciousness itself just an illusion The last great mystery of science consciousness is a topic that was banned from serious research for most of the last century but is now an area of increasing popular interest as well as a rapidly expanding area of study for students of psychology philosophy and neuroscience This ground breaking textbook by best selling author Susan Blackmore was the first of its kind to bring together all the major theories of consciousness studies from those based on neuroscience to those based on quantum theory or Eastern philosophy The book examines topics such as how subjective experiences arise from objective brain processes the basic neuroscience of consciousness altered states of consciousness out of body and near death experiences and the effects of drugs dreams and meditation It also explores the nature of self the possibility of artificial consciousness in robots and the question of whether animals are conscious The new edition has been fully revised to include the latest developments in neuroscience brain scanning techniques and artificial consciousness and robotics The new website includes self assessment exercises advanced further reading flashcards and MCQs For all those intrigued by what it means to be to exist this book could radically transform your understanding of your own consciousness The Conceptual Representation of Consciousness Thomas Natsoulas,2015-09-11 This book seeks to explicate six basic concepts of consciousness from a variety of psychological philosophical historical and lexicographic perspectives The Oxford Handbook of the Philosophy of Consciousness Uriah Kriegel,2020 This handbook provides a panoramic view of current philosophical research on consciousness Bringing together contributions from experts in the field it covers the various types of consciousness the many related psychological phenomena and the relationship between consciousness and physical reality

The Natural Problem of Consciousness Pietro Snider,2017-06-12 The Natural Problem of Consciousness is the problem of understanding why there are presently conscious beings at all Given a non reductive naturalist framework taking consciousness as an ontologically subjective biological phenomenon how can we rationally explain the fact that the actual world has turned out to be one where there are presently living beings that can feel rather than having developed as a zombie world in which there would be no conscious experiences of any kind This book introduces the Natural Problem by relating it to central problems in the philosophy of mind metaphysical mind body problem Hard Problem of consciousness and emphasizing the distinctive interest of its diachronic dimension Ranging from philosophy to biology and neuroscience it offers a thorough analysis aimed at better understanding what could explain why phenomenal consciousness has been preserved throughout evolution by natural selection This is an original engaging and thought provoking philosophical study of a neglected but fundamental question regarding the nature and origin of consciousness *The Blackwell Companion to*

Consciousness Susan Schneider, Max Velmans, 2017-03-16 Updated and revised the highly anticipated second edition of *The Blackwell Companion to Consciousness* offers a collection of readings that together represent the most thorough and comprehensive survey of the nature of consciousness available today Features updates to scientific chapters reflecting the latest research in the field Includes 18 new theoretical empirical and methodological chapters covering integrated information theory renewed interest in panpsychism and more Covers a wide array of topics that include the origins and extent of consciousness various consciousness experiences such as meditation and drug induced states and the neuroscience of consciousness Presents 54 peer reviewed chapters written by leading experts in the study of consciousness from across a variety of academic disciplines

The Ethics of Uncertainty L. Syd M. Johnson, 2022 This is the first book length empirically informed philosophical treatment of disorders of consciousness The book puts forward a compelling ethical approach focused on uncertainty epistemic and ethical risk and justice Bioethicist L Syd M Johnson rejects longstanding ethical dogmas about the significance of consciousness for moral standing and personhood and provides a new approach to medical decision making in the presence of uncertainty With applications to medical decisions and beyond this ethical approach enables surrogate decision makers facing fraught and risky choices to fulfill their obligations as moral and epistemic agents **New**

Conversations on the Problems of Identity, Consciousness and Mind Jonathan O. Chimakonam, Uti Ojah Egbai, Samuel T. Segun, Aribiah D. Attoe, 2019-02-23 This book introduces concepts in philosophy of mind and neurophilosophy Inside three scholars offer approaches to the problems of identity consciousness and the mind In the process they open new vistas for thought and raise fresh controversies to some of the oldest problems in philosophy The first chapter focuses on the identity problem The author employs an explanatory model he christened sense phenomenalism to defend the thesis that personal identity is something or a phenomenon that pertains to the observable perceptible aspect of the human person The next chapter explores the problem of consciousness It deploys the new concept equiphénoménalism as a model to show that mental properties are not by products but necessary products of consciousness Herein the notion of qualia is a fundamental and necessary product that must be experienced simultaneously with neural activities for consciousness to be possible The last chapter addresses the mind body problem It adopts the new concept proto phenomenalism as an alternative explanatory model This model eliminates the idea of a mind As such it approaches the mind body problem from a materialistic point of view with many implications such as the meaning lessness of our existence the possibility of thought engineering as well as religious implications

How Could Conscious Experiences Affect Brains? Max Velmans, 2002 In daily life we take it for granted that our minds have conscious control of our actions at least for most of the time But many scientists and philosophers deny that this is really the case because there is no generally accepted theory of how the mind interacts with the body Max Velmans presents a non reductive solution to the problem in which conscious mental control includes voluntary operations of the preconscious mind On this account biological determinism is compatible with experienced free will Velmans

harnessing biological nitrogen fixation in plant leaves - May 16 2022

web jun 2 2023 the importance of biological nitrogen fixation bnf in securing food production for the growing world population with minimal environmental cost has been increasingly acknowledged leaf

global inputs of biological nitrogen fixation in agricultural systems - Feb 10 2022

web jul 11 2008 biological dinitrogen N_2 fixation is a natural process of significant importance in world agriculture the demand for accurate determinations of global inputs of biologically fixed nitrogen N is strong and will continue to be fuelled by the need to understand and effectively manage the global N cycle in this paper we review and

harnessing biological nitrogen fixation in plant leaves - Jun 28 2023

web jun 1 2023 biological nitrogen fixation bnf the process carried out by diazotrophs which convert nitrogen gas N_2 from the atmosphere into plant usable form NH_4 subsequently incorporated into amino acids and other vital compounds

frontiers diazotrophs for lowering nitrogen pollution crises - Sep 19 2022

web may 24 2021 one of the best studied symbioses is the symbiotic nitrogen fixation that involves plants both legumes and non legumes and specific diazotrophs rhizobia and frankia during this symbiotic relationship a niche and carbon molecules are provided to the microorganisms by the plant in exchange for nitrogen fixation schwember et al

biological nitrogen fixation and beneficial plant microbe interaction - Aug 31 2023

web about this book this book covers the most recent advances in all the topics with which researchers and professionals need to be familiar in order to obtain a better understanding of and to better exploit beneficial plant microbe interactions

nitrogen signalling in plant interactions with associative and - Nov 21 2022

web biological nitrogen fixation bnf is an important source of nitrogen N input in agriculture and represents a promising substitute for chemical N fertilizers diazotrophic bacteria have the ability to develop different types of

current progress in nitrogen fixing plants and microbiome research - May 28 2023

web jan 13 2020 it has been estimated that worldwide biological nitrogen fixation produces roughly 200 million tons of nitrogen annually 15 16 in fact nearly 50 of the total nitrogen in crop fields is the contribution of bnf by diazotrophic bacteria of the total biosphere nitrogen 17

harnessing biological nitrogen fixation in plant leaves pubmed - Jul 18 2022

web the importance of biological nitrogen fixation bnf in securing food production for the growing world population with minimal environmental cost has been increasingly acknowledged leaf surfaces are one of the biggest microbial habitats on earth harboring diverse free living N_2 fixers

biological nitrogen fixation and beneficial plant microbe interactions - Jul 30 2023

web jan 1 2016 biological nitrogen fixation bnf a microbiological process which converts atmospheric nitrogen into a plant usable form offers this alternative

harnessing biological nitrogen fixation in plant leaves - Apr 14 2022

web jun 1 2023 the importance of biological nitrogen fixation bnf in securing food production for the growing world

population with minimal environmental cost has been increasingly acknowledged leaf surfaces are one of the biggest microbial habitats on earth harboring diverse free living n₂ fixers

biological nitrogen fixation to improve plant growth and productivity - Jan 12 2022

web jan 4 2016 this review focuses on the improvement of the growth and yield of plants having biological nitrogen fixation ability due to certain microorganisms symbiotic and free living nitrogen fixing

plant breeding for biological nitrogen fixation a review - Jun 16 2022

web jul 14 2015 abstract symbiotic biological nitrogen fixation is an important feature of the beneficial role played by legume crops in the farming system this symbiosis is facilitated by a complex chemical signaling process between the host legume plant and rhizobia bacteria

harnessing biological nitrogen fixation in plant leaves cell press - Dec 23 2022

web the importance of biological nitrogen fixation bnf in securing food production for the growing world population with minimal environmental cost has been increasingly acknowledged leaf surfaces are one of the biggest microbial habitats on earth harboring diverse free living n₂ fixers

biological nitrogen fixation for sustainable agriculture - Apr 26 2023

web sep 21 2017 biological nitrogen fixation bnf involving beneficial microorganism is a process of converting the free atmospheric nitrogen into plant available form this biological process harmonizes the ecosystem and offers an economic and environment friendly approach for reducing the external inputs and improving internal sources

diversity and regulation of symbiotic nitrogen fixation in plants - Feb 22 2023

web jun 5 2023 plants associate with nitrogen fixing bacteria to secure nitrogen which is generally the most limiting nutrient for plant growth endosymbiotic nitrogen fixing associations are widespread among diverse plant lineages ranging from microalgae to angiosperms and are primarily one of three types cyanobacterial actinorhizal or rhizobial

identification and evolution of nsllps in the root nodule nitrogen - Aug 19 2022

web sep 25 2023 as frankia in the nodule is viable and has an active nitrogen fixation to provide nitrogen to the plant we investigated the molecular response of f alni acn14a under n free conditions in contact

biological nitrogen fixation learn science at scitable nature - Jan 24 2023

web figure 1 nitrogen fixing organisms found in agricultural and natural systems the process the reduction of atmospheric nitrogen is a complex process that requires a large input of energy to

nitrogen fixing azotobacter species as potential soil biological - Mar 26 2023

web feb 25 2021 biological nitrogen fixation bnf refers to a microbial mediated process based upon an enzymatic nitrogenase conversion of atmospheric nitrogen n₂ into ammonium readily absorbable by roots n₂ fixing microorganisms

collectively termed as diazotrophs are able to fix biologically N_2 in association with plant roots

plants free full text exploiting biological nitrogen fixation a - Oct 21 2022
