Schizoanalysis and Animal Science Education Helena Pedersen,2019-02-07 Within the education system acts of violence toward animals take place and are manifested on a routine basis in science classes in lecture halls in school canteens and during study visits to zoos farms and slaughterhouses Taken for granted as necessary for teaching and learning this violence profoundly affects animals as well as students It also provides new entry points for understanding education as a multispecies power regime driven by numerous other investments than knowledge dissemination alone What then is the nature of this educational violence and how exactly does education work through techniques of interference with student and animal bodies Based on ethnographic research within upper secondary schools and higher education this book challenges the use of animals in education by innovative engagement of Deleuze and Guattari s tool of schizoanalysis Sparking a fundamental rethinking of educational processes relations and aims the book explores how scientific knowledge about animals proliferates through complex interplay of power and desire in contested spaces of teaching and learning Configuring animal science education as a set of machines working in tandem with the animal industry Helena Pedersen offers radical new insights into how education forms subjectivities and social orders under conditions of capitalist expansion that capture students and animals alike Bringing together education studies science studies critical animal studies and continental philosophy Pedersen also provides examples of disruptive action that can put education to work for transformation and liberation

Alternation between L1 (Italian) and L2 (English) in Three CLIL and EMI Contexts (2nd Edition) Francesca Costa,2025-05-29 For years the alternation between the L1 and the L2 was banned in language

classes since it was thought that this would impair the learning of the second language In recent years however there has been a recognition of the validity of alternation That is why this book aims at investigating the alternation of the L1 and L2 in Content and Language Integrated Learning CLIL and English Medium Instruction EMI contexts at three educational levels primary secondary tertiary in Italy To do so an overarching qualitative research approach was applied with both quantitative and qualitative elements The results of the study point at three main pedagogical implications which highlight the originality of this research The first implication is connected to the function of alternation between the L1 and the L2 Alternation played a mainly lexical role to explain specific lexis or at least to provide the students with lexis in both languages English and Italian The second implication highlights the fact that despite the contextual differences that exist the three educational levels primary secondary and tertiary show a very similar use of alternation thereby pointing at similarities more than differences The third implication worth noting is the drive toward and preservation of multilingualism that comes from the use of alternation

The Human Animal Earthling Identity Carrie P. Freeman, 2020-12-01 With *The Human Animal Earthling Identity* Carrie P Freeman asks us to reconsider the devastating division we have created between the human and animal conditions leading to mass exploitation injustice and extinction As a remedy Freeman believes social movements should collectively foster a cultural shift in human identity away from an egoistic anthropocentrism human centered outlook and toward a universal altruism species centered ethic so people may begin to see themselves more broadly as human animal earthlings To formulate the basis for this identity shift Freeman examines overlapping values supporting life fairness responsibility and unity that are common in global rights declarations and in the current campaign messages of sixteen global social movement organizations that work on human civil rights nonhuman animal protection and or environmental issues such as Amnesty International Human Rights Watch CARE People for the Ethical Treatment of Animals the World Wildlife Fund the Sea Shepherd Conservation Society the Nature Conservancy the Rainforest Action Network and Greenpeace She also interviews the leaders of these advocacy groups to gain their insights on how human and nonhuman protection causes can become allies by engaging common opponents and activating shared values and goals on issues such

as the climate crisis enslavement extinction pollution inequality destructive farming and fishing and threats to democracy Freeman s analysis of activist discourse considers ethical ideologies on behalf of social justice animal rights and environmentalism using animal rights respect for sentient individuals as a bridge connecting human rights to a more holistic valuing of species and ecological systems Ultimately Freeman uses her findings to recommend a set of universal values around which all social movements campaign messages can collectively cultivate respectful relations between human animal earthlings fellow sentient beings and the natural world we share **Animal Intelligence** Fred Goodwin,1998-10

Language, Ethics and Animal Life Niklas Forsberg,Mikel Burley,Nora Hamalainen,2012-10-11 New research into human and animal consciousness a heightened awareness of the methods and consequences of intensive farming and modern concerns about animal welfare and ecology are among the factors that have made our relationship to animals an area of burning interest in contemporary philosophy Utilizing methods inspired by Ludwig Wittgenstein the contributors to this volume explore this area in a variety of ways Topics discussed include scientific vs non scientific ways of describing human and animal behaviour the ethics of eating particular animal species human nature emotions and instinctive reactions responses of wonder towards the natural world the moral relevance of literature the concept of dignity and the question whether non human animals can use language This book will be of great value to anyone interested in philosophical and interdisciplinary issues concerning language ethics and humanity s relation to animals and the natural world
