Hiz,2012-12-06 To the philosopher the logician and the linguist questions have a special fascination The two main views of language that it describes the world and that it expresses thought are not directly applicable to questions Questions are not assertions A question may be apt sharp to the point important or it may be inappropriate ambiguous awkward irrelevant or irreverent But it cannot be true or false It does not have a truth value not just because an utterance like Was the letter long does not indicate which letter is being talked about The indicative The letter was not long has the same indeterminacy In actual context the anaphoric definite article will be resolved both for a question and for an indicative sentence Contextual resolutions are easily found for most cross references A question cannot be either true or it does not describe a state of affairs Neither does it express false because thought because it is an expression of suspended thought of lack of judgment To dress it in other philosophical styles a question is not a judgment it is not a proposition it is not an assertion A philosopher may try to paraphrase a question as an indicative sentence for instance as a statement of ignorance or as a statement of the desire to know Hintikka Wachowicz and Lang explore this territory Or he may interpret it as a meta statement intimating the direction in which the flow of the discourse is going Reauthorization of the Nuclear Regulatory Commission United States. Congress. House. Committee on Commerce. Subcommittee on Energy and Power,1998 **Question Answering for the Curated Web** Rishiraj Saha Roy,Avishek Anand,2022-05-31 Question answering QA systems on the Web try to provide crisp answers to information needs posed in natural language replacing the traditional ranked list of documents QA posing a multitude of research challenges has emerged as one of the most actively investigated topics in information retrieval natural language processing and the artificial intelligence communities today The flip side of such diverse and active interest is that publications are highly fragmented across several venues in the above communities making it very difficult for new entrants to the field to get a good overview of the topic Through this book we make an attempt towards mitigating the above problem by providing an overview of the state of the art in question answering We cover the twin paradigms of curated Web sources used in QA tasks trusted text collections like Wikipedia and objective information distilled into large scale knowledge bases We discuss distinct methodologies that have been applied to solve the QA problem in both these paradigms using instantiations of recent systems for illustration We begin with an overview of the problem setup and evaluation cover notable

sub topics like open domain multi hop and conversational QA in depth and conclude with key insights and emerging topics We believe that this resource is a valuable contribution towards a unified view on QA helping graduate students and researchers planning to work on this topic in the near future
