Aesthetics and the Sciences of Mind Greg Currie,Matthew Kieran,Aaron Meskin,Jon Robson,2014-07-24 Through much of the twentieth century philosophical thinking about works of art design and other aesthetic products has emphasized intuitive and reflective methods often tied to the idea that philosophy s business is primarily to analyze concepts This philosophy from the armchair approach contrasts with methods used by psychologists sociologists evolutionary thinkers and others who study the making and reception of the arts empirically How far should philosophers be sensitive to the results of these studies Is their own largely a priori method basically flawed Are their views on aesthetic value interpretation imagination and the emotions of art to be rethought in the light of best science The essays in this volume seek answers to these questions many through detailed studies of problems traditionally regarded as philosophical but where empirical inquiry seems to be shedding interesting light No common view is looked for or found in this volume a number of authors argue that the current enthusiasm for scientific approaches to aesthetics is based on a misunderstanding of the philosophical enterprise and sometimes on misinterpretation of the science others suggest various ways that philosophy can and should accommodate and sometimes yield to the empirical approach The editors provide a substantial introduction which sets the scene historically and conceptually before summarizing the claims and arguments of the essays

The Mind's Provisions Vincent Descombes,2021-08-10 Vincent Descombes brings together an astonishingly large body of philosophical and anthropological thought to present a thoroughgoing critique of contemporary cognitivism and to develop a powerful new philosophy of the mind Beginning with a critical examination of American cognitivism and French structuralism Descombes launches a more general critique of all philosophies that view the mind in strictly causal terms and suppose that the brain and not the person thinks Providing a broad historical perspective Descombes draws surprising links between cognitivism and earlier anthropological projects such as L vi Strauss s work on the symbolic status of myths He identifies as incoherent both the belief that mental states are detached from the world and the idea that states of mind are brain states these assumptions beg the question of the relation between mind and brain In place of cognitivism Descombes offers an anthropologically based theory of mind that emphasizes the mind s collective nature Drawing on Wittgenstein he maintains that mental acts are properly attributed to the person not the brain and that states of mind far from being detached from the world require a historical and cultural context for their very intelligibility Available in English for the first time this is the most outstanding work of one of France s finest contemporary philosophers It provides a much needed link between the continental and Anglo American traditions and its impact will extend beyond philosophy to anthropology psychology critical theory and French studies
