

La Teoría de la Relatividad

La **teoría de la relatividad**, desarrollada por **Albert Einstein** a principios del siglo XX, consta de dos partes: la especial y la general.

La teoría especial de la relatividad postula que el tiempo y el espacio son relativos, dependiendo de la velocidad del observador, desafiando la percepción clásica de la realidad.

La teoría general de la relatividad extiende estos conceptos al incorporar la gravedad como una curvatura del espacio-tiempo causada por la masa.

Estas ideas revolucionaron la comprensión de la física, unificando espacio, tiempo y gravedad, proporcionando una nueva perspectiva del universo.
