Integrative Family and Systems Treatment (I-FAST) J. Scott Fraser PhD,David Grove LISW-S,Mo Yee Lee PhD,Gilbert Greene PhD,Andy Solovey MSW,2014-03-28 Funders of mental health services to youth and families have increasingly required providers to use treatments deemed to be evidence based There are several evidence based family treatment EBFT approaches found to be effective with the same types of presenting problems and populations All of these EBFTs claim to be based on similar theoretical approaches and have specified treatment protocols that providers must follow to be faithful to the model These EBFTs are expensive for agencies to establish and maintain Many agencies that initially adopted one of these EBFTs later de adopted it because they could not sustain it when billing Medicaid is the only way to pay for such services Meta analyses of treatment outcome studies have found that various theoretical approaches to therapy are

effective but no one approach is more effective than any other What accounts for client improvement is not the specific treatment approach but rather the factors they all have in common To provide an effective affordable and flexible approach to family treatment the authors of this book developed and have conducted researched on an approach they call Integrative Family and Systems Treatment I FAST I FAST is a meta model organized around the common factors to family treatment Such a model does not require practitioners to learn a completely new way to provide treatment but rather it builds on and incorporates the clinical strengths and skills they already possess This book is a manual for how to faithfully and flexibly provide I FAST A manual for a meta model to treatment based on the common factors has never been provided This book provides clear guidelines illustrated by cases examples for not only how to provide I FAST but also how to teach and supervise it as well as how to integrate I FAST with the rest of an agency s services and programs **Systematic**
