The Columbia Companion to American History on Film Peter C. Rollins, 2004-03-24 American history has always been an irresistible source of inspiration for filmmakers and today for good or ill most Americans sense of the past likely comes more from Hollywood than from the works of historians In important films such as *The Birth of a Nation* 1915 *Roots* 1977 *Apocalypse Now* 1979 and *Saving Private Ryan* 1998 how much is entertainment and how much is rooted in historical fact In The Columbia Companion to American History on Film more than seventy scholars consider the gap between history and Hollywood They examine how filmmakers have presented and interpreted the most important events topics eras and figures in the American past often comparing the film versions of events with the interpretations of the best historians who have explored the topic Divided into eight broad categories Eras Wars and Other Major Events Notable People Groups Institutions and Movements Places Themes and Topics and Myths and Heroes the volume features extensive cross references a filmography of discussed and relevant films notes and a bibliography of selected historical works on each subject The Columbia Companion to American History on Film is also an important resource for teachers with extensive information for research or for course development appropriate for both high school and college students Though each essay reflects the unique body of film and print works covering the subject at hand every essay addresses several fundamental questions What are the key films on this topic What sources did the filmmaker use and how did the film deviate or remain true to its sources How have film interpretations of a particular historical topic changed and what sorts of factors technological social political historiographical have affected their evolution Have filmmakers altered the historical record with a view to enhancing drama

or to enhance the truth of their putative message      **Winning Our Freedoms Together** Nicholas Grant, 2017-10-18 In this transnational account of black protest Nicholas Grant examines how African Americans engaged with and were inspired by the South African anti apartheid movement Bringing black activism into conversation with the foreign policy of both the U S and South African governments this study questions the dominant perception that U S centered anticommunism decimated black international activism Instead by tracing the considerable amount of time money and effort the state invested into responding to black international criticism Grant outlines the extent to which the U S and South African governments were forced to reshape and occasionally reconsider their racial policies in the Cold War world This study shows how African Americans and black South Africans navigated transnationally organized state repression in ways that challenged white supremacy on both sides of the Atlantic The political and cultural ties that they forged during the 1940s and 1950s are testament to the insistence of black activists in both countries that the struggle against apartheid and Jim Crow were intimately interconnected      **Resources in Education** ,1992
