With and Without the White Coat Lata Murti, 2014-12-15 This study examines the role of occupational status in the racialization of Indian physicians in Southern California Since the liberalization of U S immigration policy in 1965 the number of first and second generation Indian doctors in the U S has grown to nearly seven percent of the nation s physician workforce however Indians constitute less than one percent of the total U S population Overrepresented in one of America s most prestigious professions Indians are more visible in U S medicine than in the U S at large Previous scholarship in immigration research Asian American Studies and the sociology of occupations has paid little attention to these professional non white immigrants and their racial experience in the U S Asian American Studies in particular has focused primarily on the racial ethnic identity formation of economically disadvantaged non white groups under the assumption that professional Asian Americans class status and occupations in the sciences effectively shield them from racist harm and preclude their engagement in racial politics This research shows that Indian doctors high occupational status and class privilege provide them only partial situational protection from racism They have what I call occupational citizenship access to most of the same rights and privileges as whites only when perceived as being both professionally successful and economically beneficial to the U S They are clearly marked as occupational citizens during clinical interactions with patients when they are in the white coat But outside of this context they are subject to racist treatment from colleagues staff health care institutions and the general public The particular forms of racism these doctors face as well as how they interpret this racism have as much to do with their gender immigrant generation and perception of others race and class as with their own professional class status These findings are based on fifty two interviews with first and second generation Indian doctors in Southern California as well as participant observation at the monthly meetings of two regional Indian medical associations I also observed seven Indian doctors at work noting their interactions with patients staff and colleagues Southern California represents an ideal case for understanding the racial formation of Indian physicians in the U S because of its large but dispersed population of established Indian physicians and its overall diversity of race ethnicity and class

Creating Subaltern Counterpublics A-gwi Sö, 2017 This is a study of a political and social movement instigated by older Korean women in Japan beginning in the 1990s Koreans in Japan have occupied an unique position among ethnic minority groups Until recently they constituted the largest group of foreign nationals yet they have been marginalized politically socially economically and culturally Korean women are doubly disadvantaged treated as inferior to men by both Korean and Japanese society Furthermore the first generation of Korean women migrants were not educated as children rendering them functionally illiterate and thus triply marginalized Late in life when family and work responsibilities became less onerous local authorities created educational opportunities which the women took up in unexpected numbers overloading the facilities The authorities responses effectively re marginalized them The elderly Korean women took a stance and in the process reconstituted themselves as social and political actors This book examines that self transformation process

Distinct Identities Nadia E. Brown, Sarah Allen Gershon, 2016-04-14 Minority women in the United States draw from their unique personal experiences born of their identities to impact American politics Whether as political elites or as average citizens minority women demonstrate that they have a unique voice that more often than not centers on their visions of justice equality and fairness In this volume Dr Nadia E Brown and Sarah Allen Gershon seek to present studies of minority women that highlight how they are similar and dissimilar to other groups of women or minorities as well as variations within groups of minority women Current demographic and political trends suggest that minority populations specifically minority women will be at the forefront of shaping U S politics Yet scholars still have very little understanding of how these populations will behave politically This book provides a detailed view of how minority women will utilize their sheer numbers collective voting behavior policy preferences and roles as elected officials to impact American politics The scholarship on intersectionality in this volume seeks to push beyond disciplinary constraints to think more holistically about the politics of identity

Postcolonial Representation of the African Woman in the Selected Works of Ngugi and Adichie Eren Bolat, 2022-03-07 Until the lives and issues of African women arrived on the agenda of postcolonial

writers African women who continued their lives under double colonization by patriarchy and dominant powers did not have much standing in literary works and in the world of literature Postcolonial African women have often been represented as weak subaltern and speechless by western writers and have even been underrepresented by some postcolonial writers This book shows how the African woman who is usually represented in clichéd and stereotyped forms is depicted a versatile way in Ngugi and Adichie's novels
