scholars have been biased against the notion of Egyptian and Phoenician influence on Western civilization. The contributors to this volume argue that Bernal's claims are exaggerated and in many cases unjustified. Topics covered include race and physical anthropology, the question of an Egyptian invasion of Greece, the origins of Greek language, philosophy and science, and racism and anti-Semitism in classical scholarship. In the conclusion to the volume, the editors propose an entirely new scholarly framework for understanding the relationship between the cultures of the ancient Near East and Greece and the origins of Western civilization. The contributors are John Baines, professor of Egyptology, University of Oxford; Kathryn A. Bard, assistant professor of archaeology, Boston University; C. Loring Brace, professor of anthropology and curator of biological anthropology in the Museum of Anthropology, University of Michigan; John E. Coleman, professor of classics, Cornell University; Edith Hall, lecturer in classics, University of Reading, England; Jay H. Global Mixed Race Rebecca Chiyoko King-O'Riain, Stephen Small, Minelle Mahtani, 2014. Patterns of migration and the forces of globalization have brought the issues of mixed race to the public in far more visible, far more dramatic ways than ever before. *Global Mixed Race* examines the contemporary experiences of people of mixed descent in nations around the world, moving beyond US borders to explore the dynamics of racial mixing and multiple descent in Zambia, Trinidad and Tobago, Mexico, Brazil, Kazakhstan, Germany, the United Kingdom, Canada, Okinawa, Australia, and New Zealand. In particular, the volume's editors ask how new global flows of ideas, goods, and people affected the lives and social placements of people of mixed descent. Thirteen original chapters address the ways mixed race individuals defy, bolster, speak, and live racial categorization, paying attention to the ways that these experiences help us think through how we see and engage with social differences. The contributors also highlight how mixed race people can sometimes be used as emblems of multiculturalism and how these identities are commodified within global capitalism while still considered by some as not pure or inauthentic. A strikingly original study, *Global Mixed Race* carefully and comprehensively considers the many different meanings of racial mixedness.

"Race" and Racism R. Perry, 2007-10-15 *Race and Racism* examines the origins and development of racism in North America. It addresses the inception and persistence of the concept of race and discusses the biology of human variance, addressing the fossil record of human evolution, the relationship between creationism and science, population genetics, race-based medicine, and other related issues. The book explores the diverse ways in which people in a variety of cultures have perceived, categorized, and defined one another without reference to any concept of race. It follows the history of American racism through slavery, the perceptions and treatment of Native Americans, Jim Crow laws, attitudes toward Irish and Southern European immigrants, the internment of Japanese Americans during World War II, the civil rights era, and numerous other topics.

Cultural Expertise, Law, and Rights Livia Holden, 2023-05-19 *Cultural Expertise: Law and Rights* introduces readers to the theory and practice of cultural expertise in the resolution of conflicts and the claim of rights in diverse societies. Combining theory and case studies of the use of cultural expertise in real situations and in a great variety of fields, this is the first book to offer a comprehensive examination of the field of cultural expertise, its intellectual orientations, practical applications, and ethical implications. This book engages an extensive and interdisciplinary variety of topics ranging from race, language, sexuality, Indigenous rights, and women's rights to immigration and asylum laws, international commercial arbitration, and criminal law. It also offers a truly global perspective, covering cultural expertise in Africa, Asia, Australia, Europe, Latin America, the Middle East, and North America. Finally, the book offers theoretical and practical guidance for the ethical use of cultural expert knowledge. This is an essential volume for teachers and students in the social sciences, especially law, anthropology, and sociology, and members of the legal professions who engage in cross-cultural dispute resolution, asylum, and migration, private international law, and other fields of law in which cultural arguments play a role. Race in Mind Paul Spickard, 2015-11-19 These essays analyze how race affects people's lives and relationships in all settings, from the United States to Great Britain and from Hawai'i to Chinese Central Asia. They contemplate the racial positions in various societies of people called Black and people called White, of Asians and Pacific Islanders, and especially of those people whose racial ancestries and identifications are multiple. Here, for the first time, are Spickard's trenchant analyses of the creation of race in the South Pacific, of DNA testing for racial ancestry, and of the meaning of multiplicity in the age of Barack Obama.
