Race Markets And Social Outcomes:

Race, Markets, and Social Outcomes Patrick L. Mason, Rhonda M. Williams, 2012-12-06 THE JANUS FACE OF RACE REFLECTIONS ON ECONOMIC THEORY Patrick L. Mason and Rhonda Williams Many economists are willing to accept that race is a significant factor in US economic and social affairs Yet the professional literature displays a peculiar schizophrenia when faced with the task of actually formulating what race means and how race works in our political economy On the one hand race matters when the discussion is focused on anti social behavior social choices and undesired market outcomes Inexplicably African Americans are more likely to prefer welfare lower labor force participation and unemployment On the other hand race does not matter when the subject of discussion is economically productive or socially acceptable activities and legal market choices for example wages and employment This Janus faced construction of race is maintained by economists stubborn adherence to the market power hypothesis The market power hypothesis asserts that racial discrimination and market competition are inversely correlated Discriminatory behavior will persist only in those sectors of society where the competitive forces of the market are least operative When applied to the labor market the market power hypothesis suggests that pre and post labor market decisions represent disjoint sets On average members of a disadvantaged social group may accumulate a lower amount of or a lower quality of productive attributes because of discrimination in marital residential or school choice or because of substantial animosity in day to day interpersonal relations with members of a privileged group

Handbook of the Sociology of Racial and Ethnic Relations Hernan Vera, Joe R Feagin, 2007-08-03 The study of racial and ethnic relations has become one of the most studied aspects in sociology and sociological research In both North America and Europe many traditional cultures are feeling threatened by immigrants from Latin America Africa and Asia Sociology is at the hub of the human sciences concerned with racial and ethnic relations Since this discipline is made of multiple paradigms and methodological orientations it has been able to make relevant contributions to disciplines ranging from individual psychology social psychology and psychiatry to economics anthropology linguistics cultural studies health care delivery and education

Handbook on the Economics of Discrimination William M. Rodgers, 2009-01-01 The papers contained in the first part of the book are particularly valuable as a primer for researchers interested in economic discrimination On this basis alone this book is recommended for researchers seeking an overview of current techniques for assessing economic discrimination The final section nicely highlights both the importance in understanding the interaction of policy and economic discrimination and the difficulties in isolating policy effects Education Economics Editor Rodgers has compiled a very useful book that summarizes the current state of the literature on economic discrimination This reviewer learned something new and interesting in every chapter and particularly appreciated the clear survey of the age discrimination literature This book will be of value to academics and to those in the legal arena Highly recommended J P Jacobsen

Choice Discrimination's dynamic nature means that no single theory method data or study should be relied upon to

assess its magnitude causes or remedies Despite some gains in our understanding these remain active areas of debate among researchers practitioners and policymakers The specially commissioned papers in this volume all by distinguished contributors present the full range of issues related to this complex and challenging problem Part 1 explores innovations in methods and data collection that help to provide richer descriptions of inequality Part 2 reviews empirical evidence on discrimination that people with disabilities older workers and gay lesbian and bisexual individuals face Although discrimination among these groups is not new this Handbook shows that economists are beginning to more fully document their experiences Part 3 presents a balanced discussion of anti discrimination policies and the impact of affirmative action The methods and data chapters are particularly designed to encourage researchers to utilize the new approaches and develop new data sources Accessible and comprehensive the Handbook is the seminal reference on the economics of discrimination for academic and professional economists graduate students advanced undergraduates practitioners policymakers and funders of social science research

African Americans in the U.S. Economy Cecilia Conrad, 2005 Over the last several decades academic discourse on racial inequality has focused primarily on political and social issues with significantly less attention on the complex interplay between race and economics *African Americans in the U S Economy* represents a contribution to recent scholarship that seeks to lessen this imbalance This book builds upon and significantly extends the principles terminology and methods of standard economics and black political economy Influenced by path breaking studies presented in several scholarly economic journals this volume is designed to provide a political economic analysis of the past and present economic status of African Americans The chapters in this volume represent the work of some of the nation s most distinguished scholars on the various topics presented The individual chapters cover several well defined areas including black employment and unemployment labor market discrimination black entrepreneurship racial economic inequality urban revitalization and black economic development The book is written in a style free of the technical jargon that characterizes most economics textbooks While the book is methodologically sophisticated it is accessible to a wide range of students and the general public and will appeal to academicians and practitioners alike

Intergovernmental Fiscal Relations Ronald C. Fisher, 2012-12-06 The main objective of this book is to restate the important theories and evidence from economic analysis concerning intergovernmental fiscal issues More importantly the second objective of the book is to identify gaps in knowledge empirical uncertainties and missing theoretical structures and then to establish a preliminary agenda for new research on this topic The book is organized in two sections The first covers the core body of intergovernmental fiscal relations including optimal size for jurisdictions and assignment of public sector functions the formulation and execution of tax policy in an intergovernmental setting and the appropriate structure and use of intergovernmental transfers In the second section the core knowledge is applied to four major policy areas education welfare fiscal interaction in urban areas and economic development In thinking about a new research agenda the authors call for more current and authoritative estimates of fiscal incidence including interjurisdictional spillovers for more fundamental research about the federation process and effects of consolidation for new evidence about the long run general equilibrium effects of interjurisdictional competition and for basic research about the choice process and establishment of intergovernmental fiscal institutions and policies by federal and subnational governments

Coasean

Economics Law and Economics and the New Institutional Economics Steven G. Medema, 2012-12-06 Upon hearing that Ronald Coase had been awarded the Nobel Prize a fellow economist's first response was to ask with whom Coase had shared the Prize Whether this response was idiosyncratic or not I do not know I expect not Part of this type of reaction can no doubt be explained by the fact that Coase has often been characterized as an economist who wrote only two significant or influential papers *The Nature of the Firm* 1937 and *The Problem of Social Cost* 1960 And by typical professional standards of significant and influential i.e. widely read and cited this perception embodies a great deal of truth even subsequent to Coase's receipt of the Prize This is not to say that there have not been other important works *The Marginal Cost Controversy* 1946 and *The Lighthouse in Economics* 1974 come immediately to mind here only that in a random sample of say one hundred economists one would likely find few who could list a Coase bibliography beyond the two classic pieces noted above in spite of Coase's significant publication record The purpose of this collection is to assess the development of tensions within and prospects for Coasean Economics those aspects of economic analysis that have evolved out of Coase's path breaking work Two major strands of research can be identified here law and economics and the New Institutional Economics

Dynamics of Globalization and Development Satya Dev Gupta, 2012-12-06 *Dynamics of Globalization and Development* debates the role of structural adjustment programs and policies the implication of financial liberalization for growth and stability the effects of foreign direct investment and the associated behavior of multinationals in terms of intellectual property rights the diffusion of technology growth and development Many contributors offer innovative insights into the complexities of the process in terms of its micro foundations and propose efficiency based multinational policy frameworks A general thrust of most of the studies in this volume is that the market driven process of globalization alone will not lead to stable and equitable economic growth Consequently several contributors recommend a set of proactive policies to promote greater stability in the system and a more equitable distribution of the benefits of globalization This anthology will provide valuable insights and important background analysis for scholars working in the field of globalization as well as senior undergraduate and graduate students

Globalization, Growth and Sustainability Satya Dev Gupta, 2012-12-06 Globalization Growth and Sustainability focuses on the implications of both regional and global trade liberalization and complementary macroeconomics policy reforms on growth equity and sustainability The volume is organized into three sections Part One addresses the issue of economic growth with a special reference to less developed economies Part Two examines the pros and cons of the regional economic integration movement for the countries either participating in or outside of the regional groups Part Three focuses on the issues of equity and sustainability Globalization Growth and Sustainability will provide valuable insights and important background analysis for scholars working in the field of globalization as well as senior undergraduate and graduate students in a variety of curricula including economics development studies and international studies

The Political Economy of Globalization Satya Dev Gupta, 2012-12-06 Globalization is transforming the world at an accelerated pace Integration of the world continues widening and intensifying international linkages in economic political and social relations Liberalization of trade and finance lubricated by revolutionary changes in information technology has resulted in significant economic growth at the global level On the other hand the process of globalization is changing the nature of production relations threatening the traditional roles of the nation state and carrying with it far reaching implications for sustainable growth development and the environment Although both developed and developing countries are actively participating in this saga of globalization nearly ninety countries as the United Nations Human Development Report 1996 indicates are worse off economically than they were ten years ago leading to global polarization between haves and have nots The report further indicates that the gap between the per capita incomes of the industrialized world and the developing countries far from narrowing has more than tripled during the last thirty years Further a majority of the countries benefitting from this globalization drive have seen a rise in inequality and poverty This failure of market driven globalization to reward the benefits equitably led the United Nations to proclaim 1996 as the International Year for the Eradication of Poverty IYEP and the decade of 1997 2006 as the international decade for the eradication of poverty and to promote people centered sustainable development

Glass Walls and Glass Ceilings Margaret Reid, William Miller, Brinck Kerr, 2003-12-30 Reid Kerr and Miller seek to redress the lack of systematic generalizable research on women's representation in state and municipal bureaucracies by focusing specifically on the representation of female managers in high level policy and decision making positions in their agencies or departments Their primary interest is in examining the distribution of women and men in state and municipal administrative and professional positions by agency and over time from 1987 through 1997 in order to determine if first agency missions are associated with glass walls and

glass ceilings and second whether relative to white women African American women and Latinas have made progress in laying claim to a greater share of managerial positions in public sector agencies Their analysis reveals a richly textured and complicated set of factors and interrelationships that vary widely across different policy areas agency contexts and levels of government They show continued patterns of underrepresentation in agencies with regulatory and distributive policy commitments while showing some improvements in those agencies that tend to be traditionally populated by women health welfare and social services for example *African Americans, Labor, and Society* Patrick L. Mason, 2001 Over the past twenty five years union participation has declined among the nation as whole Coupled with increasing racial tensions cutbacks in public programs at the federal state and local levels and a shift in the distribution of wealth these changes have undermined the standard of living for American workers families especially African American families as they created greater wealth for the American elite African Americans Labor and Society examines these changes in particular their effects on the entire African American community and suggests a move toward a more egalitarian future This collection of essays written by legal scholars professional organizers and economists suggests integrating civil rights and labor laws to strengthen both anti discrimination and union organizing efforts The volume demonstrates the negative effects for union workers of arbitration agreements that undermine civil rights legislation in the workplace It also provides a detailed case study of the nature and extent of racial conflict within a major industrial union and analyzes and suggests policy changes that would increase the political and economic power of American workers as a whole while aggressively attacking racism in social economic and political institutions African Americans Labor and Society presents strategies for creating better opportunities for African Americans through private sector employment that will appeal to legal union and labor students and scholars as well as economists *Leading Issues in Black Political Economy* Thomas D. Boston, 2018-01-16 *Leading Issues in Black Political Economy* brings together the foremost experts on issues ranging from employment training and education of African Americans It also emphasizes macro economic concerns of business development with special emphasis on long term trends of black owned businesses The work emphasizes welfare considerations in an anti welfare epoch and the role of affirmative action now that it is under attack Attention is given to the role of race in the continuing disparity of income distribution in American society The highlights of *Leading Issues* include An Employment and Business Strategy for the Next Century A Comment by Thomas D Boston Long Term Trends and Prospects for Black owned Business by Andrew F Brimmer Is the U S Small Business Administration a Racist Institution by Timothy Bates Worker Re Training and Labor Market Outcomes A New Focus for Labor Research by James B Stewart Race Cognitive Skills Psychological Capital and Wages by Arthur H Goldsmith William Darity Jr and Jonathan R Veum and Reparations and Public Policy by Richard F America The overall findings suggest that empirical wage equation specifications do matter The role of psychological capital is critical in the marketplace Race is indeed an important determinant of wages especially when the influence of both cognitive skills and psychological capital are

included in the wage equation This volume will be of crucial interest to economists political scientists sociologists and policy analysts studying African American life Thomas D Boston is editor of the Review of Black Political Economy and professor of economics at the Georgia Institute of Technology He is the co editor with Catherine L Ross of The Inner City Urban Poverty and Economic Development in the Next Century also available from Transaction The Political Economy of War and Peace Murray Wolfson,2012-12-06 cancer n any malignant tumor Metastasis may occur via the bloodstream or the lymphatic channels or across body cavities setting up secondary tumors Each individual primary tumor has its own pattern There are probably many causative factors Treatment depends on the type of tumor the site of the primary tumor and the extent of the spread Oxford Concise Medical Dictionary 1996 97 Let us begin by stating the obvious Acts of organized violence are not necessarily of human nature but they are endogenous events arising within the an intrinsic part evolution of complex systems of social interaction To be sure all wars have features in common people are killed and property is destroyed but in their origin wars are likely to be at least as different as the social structures from which they arise Consequently it is unlikely that there can be a simple theory of the causes of war or the maintenance of peace The fact that wars are historical events need not discourage us On the contrary we should focus our understanding of the dimensions of each conflict or classes of conflict on the conjuncture of causes at hand It follows that the study of conflict must be an interdisciplinary one It is or a penchant for eclecticism that leads to that conclusion but the not humility multi dimensionality of war itself **IS-LM and Modern Macroeconomics** Warren Young,Ben-Zion Zilberfarb,2012-12-06 IS LM is perhaps the prime example of cognitive dissonance in economics and is problematic to many economists On the one hand the IS LM model is still taught by many academic economists or they use it to derive the AD AS approach On the other hand the same economists realize the limitations of the basic IS LM model and would not now use it for policy analysis as they did in the past The distinction between pedagogical and analytical efficacy is made by all the authors in this volume regarding the IS LM model Indeed even those who would reject using the model for modern policy analysis still see the basic model as useful for teaching purposes Moreover in an augmented form some of the authors in this volume would even see fit to use IS LM for modern policy analysis As will be seen therefore the IS LM model is not yet dead Rather the model s plasticity has enabled it to undergo a metamorphosis into augmented form enabling its continuing utilization in economics accordingly **Evolutionary Economics: Program and Scope** Kurt Dopfer,2012-12-06 Evolutionary Economics Program and Scope offers a fresh look at the paradigmatic foundations and basic theoretical propositions of economics Twelve authors each of them with his own distinct contribution to economics make a step forward by reinterpreting major areas of micro and macroeconomics in line with modern evolutionary thinking This volume offers a unified approach to economics that allows recent developments in various strands of Evolutionary Economics to be integrated and major positions of Neoclassical Economics to be reconsidered The chapters on Evolutionary Macro Economics explore macro areas such as the division of labor and knowledge technology

and institutions population thinking meso economics techno economic trajectories and industrial sectors By telescoping structure into time they highlight the processes of structural change and co evolution between technologies and institutions and provide a causal explanatory core for a modern evolutionary theory of economic growth and economic development The chapters on Evolutionary Micro Economics offer insights into the knowledge based theories of the firm and take up the issues of cognitive and behavioral routines The contributions explore the processes of complex human choice creativity and adaptation in selective and path dependent environments The discussions make an essential contribution to the cognitive and behavioral foundations of a modern institutional economics
