Graham, 2019-10-01 Now in its third edition this project management classic has been updated with an array of field tested tools to help upper management ensure the success of projects within organizations For over twenty years Creating an Environment for Successful Projects has been a staple for upper managers who want to help projects succeed This new edition includes case studies from companies that have successfully applied the approach along with practical tools such as templates surveys and benchmark reports for savvy leaders who want to ensure project success throughout their organizations The insights in this book will help management speed projects along instead of getting in their way All too

often well intentioned managers put roadblocks in the team's way instead of empowering them with the tools they need to succeed. This approach to project environments grounded in decades of research and practice will help you make your organization the most project friendly it's ever been. Organizational changes rarely work unless upper management is heavily involved. Although project managers are most closely responsible for the success of projects, upper managers are the ones who ultimately create an environment that supports those projects. The way upper managers define structure and act toward projects has an important effect on the success or failure of those projects and consequently the success or failure of the organization. This book helps all managers understand the need for project management changes and shows how to develop project management as an organizational practice. If You Want to Lead, Not Just Manage Dennis R. Dunklee, 2000-03-13

Effective, timely and engaging. A practical approach to transforming educators into successful and reflective school administrators. John C. Daresh, Author of *Beginning The Principalship*. Insight into the perceptions, personal values and personalities that help principals succeed. A successful principal is more than a good manager. Becoming an effective school leader means understanding the culture as well as acquiring the technical skills. *If You Want to Lead, Not Just Manage* tells you what the Masters programs don't about the personalities and value systems that school leaders need to succeed. First year administrators and graduate students will find this a practical gauge in determining what it takes to become a successful principal. More experienced administrators will find it a useful tool for reflection and validation of their own practices and approaches within the school and district. Key issues include: Matching your personality with the role of principal; Navigating the school culture successfully; Changing the organization without alienating the culture; Blending the best of management and leadership; Fitting in; marketing yourself as well as your school; Culture shock when teachers become principals. This is the book that closes the gap between theory and practice, teaching prospecting and current administrators how to lead at every level. **Yield Management: The Leadership Alternative for Performance and Net Profit**

Cultural Values in Strategy and Organization T. K. Das, 2021-06-01

The field of strategy science has grown in both the diversity of issues it addresses and the increasingly interdisciplinary approaches it adopts in understanding the nature and significance of problems that are continuously emerging in the world of human endeavor. These newer kinds of challenges and opportunities arise in all forms of organizations encompassing private and public enterprises and with strategies that experiment with breaking the traditional molds and contours. The field of strategy science is also perhaps inevitably being impacted by the proliferation of hybrid organizations such as strategic alliances, the upsurge of approaches that go beyond the customary emphasis on competitiveness and profit making, and the intermixing of time-honored categories of activities such as business, industry, commerce, trade, government, the professions, and so on. The blurring of the boundaries between various areas and types of human activities points to a need for academic research to address the consequential developments in strategic issues. Hence, research and thinking about the nature of issues to be tackled by strategy science should also cultivate requisite variety in issues recognized for research inquiry, including the conceptual foundations of strategy and strategy making, and the examination of the critical roles of strategy makers, strategic thinking, time and temporalities, business and other goal choices, diversity in organizing modes for strategy implementation, and the complexities of managing strategy, to name a few. This book series on *Research in Strategy Science* aims to provide an outlet for ideas and issues that publications in the field do not provide either expressly or adequately, especially as regards the comprehensive coverage deserved by certain emerging areas of interest. The topics of the volumes in the series will keep

in view this objective to expand the research areas and theoretical approaches routinely found in strategy science the better to permit expanded and expansive treatments of promising issues that may not sufficiently align with the usual research coverage of publications in the field Cultural Values in Strategy and Organization contains contributions by leading scholars on the role of cultural values in the field of strategy science research The 11 chapters in this volume cover the topics of ecological organizing and evolving cultural values corporate cultural responsibility cultural integration in mergers and acquisitions culture and paradoxical frames cultural values in the fair trade market national culture and legitimacy family businesses as values driven organizations cultural intelligence of executives building an alliance culture personal values of civil engineers and architects and cultural characteristics of Chilean and Brazilian workforces The chapters collectively present a wide ranging review of the noteworthy research perspectives on the role of cultural values in strategy and organization
