Schaffner, Jesse H. Rhodes, Raymond J. La Raja, 2020-07-09 Local governments play a central role in American democracy providing essential services such as policing water and sanitation Moreover Americans express great confidence in their municipal governments But is this confidence warranted Using big data and a representative sample of American communities this book provides the first systematic examination of racial and class inequalities in local politics We find that non whites and less affluent residents are consistent losers in local democracy Residents of color and those with lower incomes receive less representation from local elected officials than do whites and the affluent Additionally they are much less likely than privileged community members to have their preferences reflected in local government policy Contrary to the popular assumption that governments that are closest govern best we find that inequalities in representation are most severe in suburbs and small towns Typical reforms do not seem to improve the situation and we recommend new approaches

Race Power and Political Emergence in Memphis examines black political behavior and empowerment strategies in the city of Memphis Each chapter of the text focuses on three themes mobilization emergence and incorporation By analyzing the effects of race on black political development in Memphis scholars will be able to examine broader questions about its effects in other cities How do political machines use substantial black electorates to their advantage What forms of protest do black communities conduct to rebel against machine rule What primary mobilization tactics have black citizens used during the different periods of their political development Why do blacks mobilize more quickly in some cities In cities with large and predominantly black populations what elements prevent black candidates from winning citywide races What constraints do newly elected black mayors face What benefits do black citizens gain from their representation After a predominantly black governing coalition is elected what obstacles remain Can black citizens translate proportional representation into strong political incorporation How much power can African Americans realistically expect to gain in cities This book is the most comprehensive case study of the city's political scene written to date The text primarily shows that white racism is not the only obstacle to black political development Black citizens can have population majorities but lose elections for other reasons Their ability to win elections and gain full incorporation depends heavily on whether they minimize internal conflict and

establish coalitions with middle class citizens and the business establishment

Segregation by Design Jessica Trounstein, 2018-11-15 Segregation by Design draws on more than 100 years of quantitative and qualitative data from thousands of American cities to explore how local governments generate race and class segregation Starting in the early twentieth century cities have used their power of land use control to determine the location and availability of housing amenities such as parks and negative land uses such as garbage dumps The result has been segregation first within cities and more recently between them Documenting changing patterns of segregation and their political mechanisms Trounstein argues that city governments have pursued these policies to enhance

the wealth and resources of white property owners at the expense of people of color and the poor Contrary to leading theories of urban politics local democracy has not functioned to represent all residents The result is unequal access to fundamental local services from schools to safe neighborhoods to clean water

Postsecular Cities Justin Beaumont,Christopher Baker,2011-06-16 This book reflects the wide spread belief that the twenty first century is evolving in a significantly different way to the twentieth which witnessed the advance of human rationality and technological progress including urbanisation and called into question the public and cultural significance of religion In this century by contrast religion faith communities and spiritual values have returned to the centre of public life especially public policy governance and social identity Rapidly diversifying urban locations are the best places to witness the emergence of new spaces in which religions and spiritual traditions are creating both new alliances but also bifurcations with secular sectors *Postsecular Cities* examines how the built environment reflects these trends Recognizing that the turn to the postsecular is a contested and multifaceted trend the authors offer a vigorous open but structured dialogue between theory and practice but even more excitingly between the disciplines of human geography and theology Both disciplines reflect on this powerful but enigmatic force shaping our urban humanity This unique volume offers the first insight into these interdisciplinary and challenging debates

The Urban Underclass Christopher Jencks,Paul E. Peterson,2001-08-09 Many believe that the urban underclass in America is a large rapidly increasing proportion of the population that crime teenage pregnancy and high school dropout rates are escalating and that welfare rolls are exploding Yet none of these perceptions is accurate Here noted authorities including William J Wilson attempt to separate the truth about poverty social dislocation and changes in American family life from the myths that have become part of contemporary folklore

Antiracism John Solomos,2024-11-18 While there has been a wealth of research and conversation about the role of racism in shaping our social political and economic structures antiracism its highly publicized counterpart has been very little studied discussed or debated Veteran race scholar John Solomos argues in this slim intervention that we urgently need to re focus research and activist agendas to address this gap in knowledge The core questions addressed in the book include what does antiracism mean in the contemporary environment How do states political institutions and civil society define and practise antiracism What is the role of alliances across race class and gender in shaping possible futures beyond racism Moving beyond the valuable work which has already uncovered the ways in which race and racism are made and re made these questions cut to how to develop meaningful political and policy initiatives framed by antiracist ideas and values If we hope to make sense of the evolution of contemporary racisms in the world around

us in order to tackle them head on antiracism needs to be better understood **The Metropolis in Black and White**
George C. Galster, 2017-07-12 The Metropolis in Black and White highlights a stark fact America's metropolitan areas are more polarized along racial lines than at any time since the mid 1960s Though urban areas have become multicultural the editors argue that black white racial differences will outlast ethnic differences in metropolitan America and that the race issue in most urban areas is perceived as a black white one Galster and Hill perceive that the theme of place power and polarization is most powerful when blacks and whites are contrasted African Americans on average are the poorest most segregated most disadvantaged urban racial or ethnic group because they are deeply entangled in the web of interrelationships connecting place power and polarization Since these interrelationships form a comprehensive set of social structures that oppress African Americans they can be judged to be racist at their core Race not merely class continues to play a pivotal role in shaping urban African Americans In clear analyses the contributors examine employment income the underclass education housing health and mortality political participation and racial politics Intertwined themes of spatial isolation political empowerment and racial disparities place power and polarization guide the analyses This is a vital text for courses in urban affairs American studies economics geography sociology political science urban planning and racial and ethnic studies In clear analyses the contributors examine employment income the underclass education housing health and mortality political participation and racial politics Intertwined themes of spatial isolation political empowerment and racial disparities place power and polarization guide the analyses This is a vital text for courses in urban affairs American studies economics geography sociology political science urban planning and racial and ethnic studies Racism, the City and the State Malcolm Cross, Michael Keith, 1993 The contributors to this volume address urban social theory contemporary cultural change and analysis of racial subordination in order to explore and confront the relationship between racism the city and the state
