Dyson, 2010-10-29 Covering many different diagnostic tools this essential resource explores both traditional treatments and alternative therapies for conditions that can cause gait abnormalities in horses. Broader in scope than any other book of its kind, this edition describes equine sporting activities and specific lameness conditions in major sport horse types and includes up to date information on all imaging modalities. This title includes additional digital media when purchased in print format. For this digital book edition, media content may not be included. Cutting edge information on diagnostic application for computed tomography and magnetic resonance imaging includes the most comprehensive section available on MRI in the live horse. Coverage of traditional treatment modalities also includes many aspects of alternative therapy with a practical and realistic perspective on prognosis. An examination of the various types of horses used in sports describes the lameness conditions to which each horse type is particularly prone as well as differences in prognosis. Guidelines on how to proceed when a diagnosis cannot easily be reached help you manage conditions when faced with the limitations of current diagnostic capabilities. Clinical examination and diagnostic analgesia are given a special emphasis. Practical hands on information covers a wide range of horse types from around the world. A global perspective is provided by a team of international authors, editors and contributors. A full color insert shows thermography images. Updated chapters include the most current information on topics such as MRI, foot pain, stem cell therapy and shock wave treatment. Two new chapters include The Biomechanics of the Equine Limb and its Effect on Lameness and Clinical Use of Stem Cells, Marrow Components and Other Growth Factors. The chapter on the hock has been expanded substantially and the section on lameness associated with the foot has been completely rewritten to include state of the art information based on what has been learned from MRI. Many new figures appear throughout the book. A companion website includes 47 narrated video clips of gait abnormalities including typical common syndromes as well as rarer and atypical manifestations of lameness and neurological dysfunction with commentary by author editors Mike Ross and Sue Dyson. References on the companion website are linked to the original abstracts on PubMed.

The Global Horseracing Industry Phil McManus, Glenn Albrecht, Raewyn Graham, 2013

Horseracing thoroughbred breeding and gambling on racing are global industries worth several hundred billion dollars. They are also industries facing serious challenges from the rise of alternative forms of leisure gambling to concerns about the ethical treatment of animals in all equestrian sports. This book offers a broad ranging examination of the contemporary horseracing industry from geographical, economic, social, ethical and environmental perspectives. The book draws on in depth mixed method research into the racing and breeding industries in the US, Australia, the UK, Canada and New Zealand and includes comparative material on other key racing centres such as Ireland, Singapore and Hong Kong. It explores the economic structure of the global racing business including comparisons with other major international sport businesses and other equestrian sports. It examines the social and cultural roots of the sport through its association with and impact on rural places, communities and environments from Kentucky to Newmarket, highlighting racing's particular blend of tradition and

scientific and technological innovation The book also explores the ethical issues at the heart of horseracing from reproduction to the use of the whip and the inescapable tension between the horse as an instrumentally valuable commodity and the horse as an intrinsically valuable animal with needs and interests The Global Horseracing Industry concludes by considering alternative futures for this major international sports business The book is illuminating reading for anybody with an interest in sport business cultural geography animal studies or environmental studies     Baily's Magazine of Sports & Pastimes ,1908     **Baily's Magazine of Sports and Pastimes** ,1875     *Baily's Magazine of Sports and Pastimes* Tresham Gilbey,1882     **British Sport: a Bibliography to 2000** Richard Cox,2013-12-16 Volume one of a bibliography documenting all that has been written in the English language on the history of sport and physical education in Britain It lists all secondary source material including reference works in a classified order to meet the needs of the sports historian     **The Weekly Notes, New South Wales** ,1917     *The New South Wales Weekly Notes* ,1917     Manual of British Rural Sports John Henry Walsh,1867
