birds that are accustomed to a free mode of life in captivity they will be slow breeders in a state of bondage He further says that the places in which they are kept should consist of high walls covered in to prevent their ying away That is proof of the partial domestication as it could scarcely be expected that they would be tamed in the first generation Dixon states 1 that he is inclined to consider our race of farmyard ducks as an importation through whatever channel From the East and to point out the discovery of the passage of the Cape of Good Hope 1493 as the approximate date The early voyagers speak of finding them in the East Indies exactly similar to ours and the transmission of a few pairs would be a much easier task than to subdue the shyness and wildness of the mallard It is possible that such importations took place 400 years ago as they have within the last half century and may thus have introduced specific races but the evidence of Columella given above shows that prior to that time domestication had taken place in Europe and we are justified in assuming that the same method was adopted in Asia Mr Dixon says further I know of no instance in which anyone has finally succeeded in founding a permanent tame farmyard race of ducks by breeding from the mallard About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
