

A stylized, abstract profile of a human face, rendered in vibrant red and pink hues against a dark grey background. The face is oriented towards the right, with its features defined by smooth, flowing curves and sharp angles. The hair and facial structure are suggested by the layered, wavy lines of the color. The overall effect is modern and artistic, serving as a backdrop for the book's title.

"Brown" in Baltimore Howell S. Baum, 2011-01-15 In the first book to present the history of Baltimore school desegregation Howell S Baum shows how good intentions got stuck on what Gunnar Myrdal called the American Dilemma Immediately after the 1954 Brown v Board of Education decision the city s liberal school board voted to desegregate and adopted a free choice policy that made integration voluntary Baltimore s school desegregation proceeded peacefully without the resistance or violence that occurred elsewhere However few whites chose to attend school with blacks and after a few years of modest desegregation schools resegregated and became increasingly segregated The school board never changed its policy Black leaders had urged the board to adopt free choice and despite the limited desegregation continued to support the policy and never sued the board to do anything else Baum finds that American liberalism is the key to explaining how this happened Myrdal observed that many whites believed in equality in the abstract but considered blacks inferior and treated them unequally School officials were classical liberals who saw the world in terms of individuals not races They adopted a desegregation policy that explicitly ignored students race and asserted that all students were equal in freedom to choose schools while their policy let whites

who disliked blacks avoid integration School officials liberal thinking hindered them from understanding or talking about the city s history of racial segregation continuing barriers to desegregation and realistic change strategies From the classroom to city hall Baum examines how Baltimore s distinct identity as a border city between North and South shaped local conversations about the national conflict over race and equality The city s history of wrestling with the legacy of Brown reveals Americans preferred way of dealing with racial issues not talking about race This avoidance Baum concludes allows segregation to continue

Gold, 2010-10-16 The Store in the Hood is a comprehensive study of conflicts between immigrant merchants and customers throughout the U S during the 20th century From the lynchings of Sicilian immigrant merchants in the late 1800s to the riots in L A following the acquittal of the police officers who beat Rodney King to present day Detroit recurrent conflicts between immigrant business owners and their customers have disrupted the stability of American life Devastating human lives property and public order these conflicts have been the subject of periodic investigations that are generally limited in scope and emphasize the outlooks and cultural practices of the involved groups as the root of most disputes This book develops a more nuanced understanding by exploring merchant customer conflicts over the past hundred years across a wide range of ethnic groups and settings Utilizing published research official statistics interviews and ethnographic data collected from diverse locations the book reveals how powerful groups and institutions have shaped the environments in which merchant customer conflicts occur These conflicts must be seen as products of the larger society s values policies and structures not solely as a consequence of actions by immigrants the urban poor and other marginal groups

Black Rights/White Wrongs Charles W. Mills, 2017-03-01 Liberalism is the political philosophy of equal persons yet liberalism has refused equality to those it saw as sub persons Liberalism is the creed of fairness yet liberalism has been complicit with European imperialism and African slavery Liberalism is the classic ideology of Enlightenment and political transparency yet liberalism has cast a dark veil over its actual racist past and present In sum liberalism s promise of equal rights has historically been denied to blacks and other people of color In Black Rights White Wrongs The Critique of Racial Liberalism political philosopher Charles Mills challenges mainstream accounts that ignore this history and its current legacy in self conceived liberal polities today Mills argues that rather than bracket as an anomaly the role of racism in the development of liberal theory we should see it as shaping that theory in fundamental ways As feminists

have urged us to see the dominant form of liberalism as a patriarchal liberalism so too Mills suggests we should see it as a racialized liberalism It is unsurprising then if contemporary liberalism has yet to deliver on the recognition of black rights and the correction of white wrongs These essays look at racial liberalism past and present white ignorance as a guilty ignoring of social reality that facilitates white racial domination Immanuel Kant's role as the most important liberal theorist of both personhood and sub personhood the centrality of racial exploitation in the United States and the evasion of white supremacy in John Rawls's ideal theory framing of social justice and in the work of most other contemporary white political philosophers Nonetheless Mills still believes that a deracialized liberalism is both possible and desirable He concludes by calling on progressives to Occupy liberalism and develop accordingly a radical liberalism aimed at achieving racial justice

Styles for Flourishing Gabriel Alejandro Torres Colón, 2024-11-05 Racial experiences vary widely in everyday life and in different social contexts They range from damaging to fulfilling spanning discrimination unquestioned assumptions and political solidarity Drawing on years of cross cultural ethnographic research Gabriel Alejandro Torres Colón develops an innovative theory to grasp racial experiences in their full sociocultural complexity with vital implications for both social science and antiracist politics This book demonstrates how people draw from their experiences to fashion styles for flourishing embodied strategies for survival in racialized societies that can both reproduce and contest racial orders In performing their styles individuals embrace their racialized selves and communities helping them flourish in broader social worlds They are able to creatively reconfigure racialized existence into desires for recognition expressions of resistance and aspirations for alternative political orders Torres Colón explores how styles develop within racial niches through nuanced considerations of a boxing gym in the U S Rust Belt Afro Puerto Rican community organizing in an ancestral mangrove forest and Muslim political activism in the Spanish enclave of Ceuta in North Africa Each case highlights nuanced dimensions of racial experience to question how local efforts are seen in political ideologies and governance Bringing together humanistic social scientific and biological approaches with compelling ethnographic detail this interdisciplinary book provides generative theoretical insights regarding race and critical new perspective on racial inequality in liberal democracies

Managing Inequality Karen R. Miller, 2017 In *Managing Inequality* Karen R Miller examines the formulation uses and growing political importance of northern racial liberalism in Detroit between the two World Wars In the wake of the Civil War many white northern leaders supported race neutral laws and anti discrimination statutes These positions helped amplify the distinctions they drew between their political economic system

which they saw as forward thinking in its promotion of free market capitalism and the now vanquished southern system which had been built on slavery But this interest in legal race neutrality should not be mistaken for an effort to integrate northern African Americans into the state or society on an equal footing with whites During the Great Migration which brought tens of thousands of African Americans into Northern cities after World War I white northern leaders faced new challenges from both white and African American activists and were pushed to manage race relations in a more formalized and proactive manner The result was northern racial liberalism the idea that all Americans regardless of race should be politically equal but that the state cannot and indeed should not enforce racial equality by interfering with existing social or economic relations Miller argues that racial inequality was built into the liberal state at its inception rather than produced by antagonists of liberalism Managing Inequality shows that our current racial system where race neutral language coincides with extreme racial inequalities that appear natural rather than political has a history that is deeply embedded in contemporary governmental systems and political economies

The African American Urban Experience J. Trotter, E. Lewis, T. Hunter, 2004-03-17 From the early years of the African slave trade to America blacks have lived and laboured in urban environments Yet the transformation of rural blacks into a predominantly urban people is a relatively recent phenomenon only during World War One did African Americans move into cities in large numbers and only during World War Two did more blacks reside in cities than in the countryside By the early 1970s blacks had not only made the transition from rural to urban settings but were almost evenly distributed between the cities of the North and the West on the one hand and the South on the other In their quest for full citizenship rights economic democracy and release from an oppressive rural past black southerners turned to urban migration and employment in the nation's industrial sector as a new Promised Land or Flight from Egypt In order to illuminate these transformations in African American urban life this book brings together urban history contemporary social cultural and policy research and comparative perspectives on race ethnicity and nationality within and across national boundaries

The Cities on the Hill Thomas K. Ogorzalek, 2018 Over the second half of the 20th century American politics was reorganized around race as the tenuous New Deal coalition frayed and eventually collapsed What drove this change In The Cities on the Hill Thomas Ogorzalek argues that the answer lies not in the sectional divide between North and South but in the differences between how cities and rural areas govern themselves and pursue their interests on the national stage Using a wide range of evidence from Congress and an original dataset measuring the urbanicity of districts over time he shows how the trajectory of partisan politics in America today was set in the very beginning of the New Deal Both rural and urban America were riven with local racial conflict but beginning in the 1930s city leaders became increasingly unified in national politics and supportive of civil rights changes that sowed the seeds of modern liberalism As Ogorzalek powerfully demonstrates the red and blue shades of contemporary political geography derive more from rural and urban perspectives than clean state or regional lines but local institutions can help bridge the divides that

keep Americans apart *How Ideas Shape Urban Political Development* Richardson Dilworth, Timothy P. R. Weaver, 2020-05-15 A collection of international case studies that demonstrate the importance of ideas to urban political development Ideas interests and institutions are the holy trinity of the study of politics Of the three ideas are arguably the hardest with which to grapple and despite a generally broad agreement concerning their fundamental importance the most often neglected Nowhere is this more evident than in the study of urban politics and urban political development The essays in *How Ideas Shape Urban Political Development* argue that ideas have been the real drivers behind urban political development and offer as evidence national and international examples some unique to specific cities regions and countries and some of global impact Within the United States contributors examine the idea of blight and how it became a powerful metaphor in city planning the identification of racially defined spaces especially black cities and city neighborhoods as specific targets of neoliberal disciplinary practices the paradox of members of Congress who were active supporters of civil rights legislation in the 1950s and 1960s but enjoyed the support of big city political machines that were hardly liberal when it came to questions of race in their home districts and the intersection of national education policy local school politics and the politics of immigration Essays compare the ways in which national urban policies have taken different shapes in countries similar to the United States namely Canada and the United Kingdom The volume also presents case studies of city based political development in Chile China India and Africa areas of the world that have experienced a more recent form of urbanization that feature deep and intimate ties and similarities to urban political development in the Global North but which have occurred on a broader scale Contributors Daniel Bland Debjani Bhattacharyya Robert Henry Cox Richardson Dilworth Jason Hackworth Marcus Anthony Hunter William Hurst Sally Ford Lawton Thomas Ogorzalek Eleonora Pasotti Joel Rast Douglas S Reed Mara Sidney Lester K Spence Vanessa Watson Timothy P R Weaver Amy Widestrom Race, Riots, and Roller Coasters Victoria W. Wolcott, 2012-08-16 Throughout the twentieth century African Americans challenged segregation at amusement parks swimming pools and skating rinks not only in pursuit of pleasure but as part of a wider struggle for racial equality Well before the Montgomery bus boycott mothers led their children into segregated amusement parks teenagers congregated at forbidden swimming pools and church groups picnicked at white only parks But too often white mobs attacked those who dared to transgress racial norms In *Race Riots and Roller Coasters* Victoria W Wolcott tells the story of this battle for access to leisure space in cities all over the United States Contradicting the nostalgic image of urban leisure venues as democratic spaces Wolcott reveals that racial segregation was crucial to their appeal Parks pools and playgrounds offered city dwellers room to exercise relax and escape urban cares These gathering spots also gave young people the opportunity to mingle flirt and dance As cities grew more diverse these social forms of fun prompted white insistence on racially exclusive recreation Wolcott shows how black activists and ordinary people fought such infringements on their right to access public leisure In the face of violence and intimidation they swam at white only beaches boycotted

discriminatory roller rinks and picketed Jim Crow amusement parks When African Americans demanded inclusive public recreational facilities white consumers abandoned those places Many parks closed or privatized within a decade of desegregation Wolcott s book tracks the decline of the urban amusement park and the simultaneous rise of the suburban theme park reframing these shifts within the civil rights context Filled with detailed accounts and powerful insights *Race Riots and Roller Coasters* brings to light overlooked aspects of conflicts over public accommodations This eloquent history demonstrates the significance of leisure in American race relations *The Making of Urban America* Raymond A.
